- No. 28. Return shewing the time elapsing between the sentences of the prisoners and their removal to the Central Prison for the years 1879 and 1880, distinguishing those who were tried by the Judges alone at the Interim Sessions from those tried before a Jury. (*Not printed.*)
- No. 29. Return shewing the total number of applications made for loans under the Tile Drainage Act since 1878; the Municipalities by which such applications have been made; the length of drains completed in each Municipality; the kind of drain, whether tile, stone, or wood; the sums actually paid out of the Tile or Under-drainage Fund; the Municipalities to which such payments have been made; the amounts repaid by the different Municipalities, together with the number of persons availing themselves to the utmost limit allowed by the Act of borrowing \$1,000 by one individual.
- No. 30. Copies of all correspondence which has taken place between the Executive Council of the Province of Ontario, or any member thereof, and the Privy Council of Canada, or any Member thereof, respecting the award relating to the Boundaries of the Province of Ontario, and respecting the territory in dispute between the Dominion and the Province, and which has not yet been laid before this House.
- No. 31. Special Report of Minister of Education on the Upper Canada College and Royal Grammar School.

CONTENTS OF PART IV.

- No. 32. Return of Fees, Emoluments, and Disbursements of John Hoskin, Esquire, Guardian *ad litem* for the year 1879. (*Not printed.*)
- No. 33. Abstract of Returns of Receipts and Expenditures, Assets and Liabilities, made by Clerks of Municipalities in Ontario, pursuant to Sec. 6, Cap. 43, 43 Victoria.
- No. 34. Return of:—1st. Copies of all correspondence between the Minister or the Department of Education, or any member of the Ontario Government, and any of the officers or members of the University of Toronto, or University College, relating to filling vacancies in the staff of said University and College. 2nd. Copies of all correspondence between the said Minister, or his Department, or any member of the Ontario Government, and other persons not connected with the said Institution, on the same subject. 3rd. Copies of all Orders passed by His Honour the Lieutenant-Governor in Council, relating to filling vacancies, making changes or appointments relating to Professorships in said Institution, or of their salaries, since the appointment of a Minister of Education. 4th. A list of appointments made in said Institution under the present Government, with the salaries thereto attached, and copies of all advertisements issued relating thereto.
- No. 35. Return shewing the amount of the Debenture Indebtedness of each County, City, Town, Township, and Village Municipality in the Province, on 31st December, 1879; for what works or service the said Debentures were issued; the date and amount of the several issues made, and when maturing; the amount paid or redeemed, and the amount of principal still outstanding; the total amount of the Sinking Fund levied and raised to 31st December, 1878, and the investments thereof made to 31st December, 1879; in the case of counties the equalized value, and in other municipalities, the

assessed value of each ; also, the assessed value of each Municipality having such indebtedness, and the rate imposed for all purposes. (*Not printed.*)

- No. 36.. *Books* Return of all the School-books, authorized and in use in the Public Schools of Ontario on the 1st day of July, 1867, with the retail price in each case. A list of all School-books that have been authorized at different times for use in Public, Grammar and High Schools of Ontario since the above date, specifying the name of the author in each case, together with the retail price of the same. Said last mentioned list to indicate those text-books now authorized and in use, and, also, those now proposed to be authorized, also copies of all regulations respecting Public School text-books, as well as any data on which the retail prices have been based.
- No. 37.. *Joss* Return of the costs of conveying Lunatics to the Provincial Asylums, or Boys to the Reformatory, from the County Gaols, under Act 43 Vic., chap. 35 ; and, also, the costs of conveying the same classes by the Sheriffs during the years 1878 and 1879, giving the number so conveyed from each County or City, and the cost paid in connection with the conveyance of each Lunatic or Prisoner, the cost under Provincial Bailiff to include the sixty per cent. payable towards salary of Bailiff.
- No. 38.. *Harcourt* Return respecting the Collegiate Institutes of Ontario, shewing:—
 (1) Total number of pupils in attendance at each Institute, and the average attendance during the years 1877, 1878, 1879, 1880.
 (2) Number of pupils in each of these years who were preparing for the profession of a Public School Teacher.
 (3) Number of pupils who have matriculated during these years at Toronto University.
 (4) Number of such matriculants who have matriculated with honours, stating what honours they received.
 (5) Names of teachers, also their certificates or degrees, and the salaries paid to them.
 (6) Government allowance granted to these Institutes during these years.
- No. 39.. *Bell* Return of all cases now standing for Judgment in the Court of Chancery, which were heard on or before the first day of November, 1880, and shewing the dates of hearing in each case. (*Not printed.*)
- No. 40.. *Education* Special Report on County Model Schools, 1880, shewing the standing of Teachers, Terms kept open, Attendance, Results of Examinations, Grants from Government and Counties, &c., &c.
- No. 41.. Correspondence and Papers relating to the following Railways:—Stratford and Huron, Georgian Bay and Wellington, and Erie and Huron.
- No. 42.. Report of the Ontario Agricultural Commission, the statistical information collected, and the oral evidence taken by the Commissioners. (*Printed for distribution only.*)
- No. 43.. *Harvey* Return containing the Minutes of the Senate of the University of Toronto, from the date of the last Return down to close of 1880. (*Not printed.*)
- No. 44.. Reports of the Stipendiary Magistrates with respect to the Northerly and Westerly parts of Ontario. *Bowman*

No. 45.. Return shewing :—

1st. The number of prisoners committed to the Central Prison, in default of payment of fines imposed by the Toronto Police Magistrate since the opening of that institution.

2nd. The nature of the offences for which each prisoner was convicted and committed on non-payment of fines and fees imposed.

3rd. The amount of fines and fees imposed in each case shewn separately, together with the date of conviction.

4th. The amount of fines and fees paid at said Prison on discharge of such prisoners, and the date of each payment.

5th. The application of such fines and fees so paid, say :—

(1) Amount retained by Government.

(2) Amount paid to Municipality.

(3) Authority for such subdivision, or other application of such fines and fees. (Not printed.)

No. 46.. Special Report of the Minister of Education on the Mechanics' Institutes.

No. 47.. Return shewing, as far as appears from the Records in the Court, the amount of money collected by the Receiver, appointed by the Court of Chancery, to wind up the affairs of the Niagara District Mutual Fire Insurance Company, and how the moneys are disbursed; also, a complete statement of the assets and liabilities of the Company, so far as known to the Receiver, and as appears by the Records in the Court.

No. 48.. Statement of Receipts and Expenditures on account of the Mercer Estate, from 1st of January to the 31st December, 1880.

No. 49.. Copies of correspondence between the Government and any person, or persons, referring to the dissolving of Union School Section No. 9½, in the Township of Matilda and School Section No. 15, in the Township of Williamsburg; and, also, in reference to the confirmation or quashing of a By-law, passed by the Council of the Township of Matilda, on 3rd of September, 1880, dissolving such Union School Section. (Not printed.)

No. 50.. Return of all Market Fees and Market Rents received in each City, Town, and Village in Ontario, for the years 1879 and 1880. The amount of salaries paid to Market Clerks and the rates of fees charged.

No. 51.. Statement of the Assets, Liabilities, Revenue, Expenditure, etc., of Counties, Cities, and Towns in the Province of Ontario for the year 1879.

No. 52.. Return in accordance with the provisions of the Debentures Registration Act, Section 4, Chapter 176, R. S. O., for the year 1880.

No. 53.. Return shewing the indebtedness of the Town of Cobourg for principal and interest on account of the Municipal Loan Fund Settlement made in the 1873.

No. 54.. Return of all agreements or leases made between the Government of Ontario and any party or parties, relating to rights or privileges on the Niagara River at Clifton or Niagara Falls, shewing rates, rents or sums agreed to be paid, and terms of payment.

No. 55.. Return of the number of Bills filed in Chancery, and Writs of Summons issued out of the Superior and County Courts of Common Law in the Province of Ontario in the years 1879 and 1880, respectively. (Not Printed.)

REGISTRAR-GENERAL'S OFFICE, ONTARIO,

December 9th, 1880.

To His Honour the Honourable John Beverley Robinson, Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR,—

In compliance with the Statute in that behalf, the undersigned respectfully presents to Your Honour the Annual Report of Births, Marriages and Deaths for the year ending 31st December, 1879.

Respectfully submitted,

ARTHUR S. HARDY,

Registrar-General.

REPORT

RELATING TO THE REGISTRATION OF BIRTHS, MARRIAGES AND DEATHS,

IN THE

PROVINCE OF ONTARIO,

FOR THE YEAR ENDING 31ST DECEMBER, 1879.

PARLIAMENT BUILDINGS,

TORONTO, December 7th, 1880.

To the Honourable A. S. HARDY,

Registrar-General of the Province of Ontario.

SIR,—I have the honour to present a Report of the Births, Marriages and Deaths registered in this Province during the year ending 31st December, 1879.

During the year there were 41,035 Births, 12,509 Marriages and 17,958 Deaths registered in Ontario.

The registered number of Births was greater than in 1878 by 799 ; that of Marriages was less by 220, while the registered Deaths shewed an increase of 150.

The total registrations were 71,502, an increase of 25,902 in four years, or since 1876, the date the present Act came into force.

TABLE SHEWING THE TOTAL NUMBER OF BIRTHS, MARRIAGES AND DEATHS IN EACH COUNTY, WITH THE INCREASE AND DECREASE.

In these tables will be found the general statistics in relation to births, marriages and deaths in the counties, county towns, and principal cities and towns of the Province of Ontario during the year 1879.

The total number of births reported in the county towns was 8,925, against 8,682 last year, an increase of 243.

The Town of Brockville registered the greatest increase, viz., 39, and Toronto the smallest, viz., 1.

In 25 of the county towns the number of births registered was larger, and in 11 smaller, than in the previous year.

The City of Guelph shewed the largest decrease, viz., 42, and the Town of Sarnia the smallest.

During the year 3,513 marriages were recorded in these county towns as against 3,849 in 1878; a falling off to the extent of 336 in number. The most marked decrease was in the City of St. Catharines, where 82 marriages less were solemnized than in 1878.

The smallest decrease was in the Town of Pembroke, being one in number. No particular cause can be assigned for this decrease in the number of marriages. As, however, the ratio of marriages to population has in past years been above the standard, the decrease this year does not reduce the general average below what is considered, in towns in other countries similar in population to those in Ontario, to be about the true proportion.

22 county towns returned a decrease, and 13 an increase, in marriages, and one town, Goderich, returned exactly the same number as in 1878.

The table shews that 311 more deaths were registered in the county towns in 1879 than in 1878; the numbers being respectively 5,372 and 5,061—the largest increase, 69, was in the City of Kingston, and the smallest, 2, in the Town of Milton. Ottawa, which had the largest increase in 1878, has this year the largest decrease, 46, and Peterborough and Picton the smallest, 1. 28 county towns shew an increase, and 8 a decrease in the numbers returned.

The percentage of increase in the number of births registered is 2.8; the decrease in marriages amounts to 8.7 per cent.; and the increase in deaths to 5.3 per cent.

The returns from a majority of these county towns may be considered nearly if not quite complete.

The ratio of births in the principal cities and towns is 28 per 1,000 against 27 in 1878. Toronto, Hamilton, Ottawa, Guelph, Belleville, Peterborough, Windsor, Woodstock, and Barrie return a higher rate than 28 per 1,000, and the other cities and towns a lower rate; St. Catharines, with 17.7, being the lowest.

The ratio of marriages this year is only 10 per 1,000 of the population, while last year it was 11.9. Toronto, London, Brantford, Guelph, Belleville, Chatham, St. Thomas, Peterborough, Lindsay, and Barrie are above the average rate, and the rest of the cities and towns are below it. Chatham records the highest rate, 17.9 per 1,000, and Brockville the lowest, 4.1 per 1,000.

Eight marriages per 1,000 of the population are estimated as the standard; but in cities and towns the ratio is generally greater in consequence of many persons residing in the suburban districts resorting to them to be married.

Of the 20 cities and towns, 15 return a larger ratio than 8 per 1,000. That the marriages in Ontario were nearly all registered in 1879, notwithstanding the decrease in the number returned, is indicated by the fact that while there were 12,708 marriage licenses issued by the Marriage License Department, the returns from the various Division Registrars shew that 12,509 marriages were solemnized. The total population of these cities and towns, as given by the Assessors for 1879, was 276,843, an increase over 1878 of 5,430; the number of deaths registered was 4,629, an increase of 133, the ratio being 16.7 per 1,000. Toronto, Hamilton, Ottawa, London, St. Catharines, Kingston, Belleville, and Barrie are above this average rate; Belleville returns the highest death rate, 23.1 per 1,000; and Brockville the lowest, 8.5.

The following comparison between the cities of Ontario and some cities of the United States, similar in population, will be found worthy of notice.

BIRTHS.

BIRTHS BY MONTHS.

(For Table *see* Appendix, page iv.).

This table is a record of births registered in Ontario during the year 1879. The whole number reported was 41,035, an increase of 799 over 1878.

SEX OF THE CHILDREN BORN.

The number of births of males was 21,343, and of females 19,692. This gave 108.3 males to each 100 females; or 52 males and 48 females in each 100 children.

The number and proportion of male to female births in each month will be seen in the following table:—

SEX.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.
Males	2051	1872	2027	1628	1641	1510	1763	1858	1855	1717	1666	1755	21343
Females	1866	1753	1764	1560	1529	1406	1614	1638	1717	1632	1552	1661	19692
Males to each 100 Females	109.9	106.7	114.9	104.3	107.3	107.3	109.2	113.4	108.0	105.2	107.3	105.6	108.3

In March 114.9 males were born to each 100 females, while in October there were only 105.2 males born to 100 females.

ORDER OF BIRTHS BY MONTHS, 1878-1879.

MONTHS.	1878.			MONTHS.	1879.		
	Males.	Females	Total.		Males.	Females	Total.
March	1999	1826	3825	January	2051	1866	3917
August	1890	1677	3567	March	2027	1764	3791
April	1886	1608	3494	February	1872	1753	3625
January	1810	1664	3474	September	1855	1717	3572

February	1763	1590	3353	December	1755	1661	3416

ORDER OF BIRTHS BY MONTHS, 1878-1879.—Continued.

MONTHS.	1878.			MONTHS.	1879.		
	Males.	Females	Total.		Males.	Females	Total.
September	1710	1613	3323	July.	1763	1614	3377
December	1689	1532	3221	October	1717	1632	3349
November	1698	1501	3199	November	1666	1552	3218
July	1641	1544	3185	April	1628	1560	3188
May	1621	1533	3154	May	1641	1529	3170
June	1583	1457	3040	June	1510	1406	2916
	21008	19228	40236		21343	19692	41035

The births in January, 1879, preponderated, being 1,001 more than in the lowest month, June. March returned the largest number of births in 1878, and June, as in 1879, the lowest.

QUARTERLY RETURN OF BIRTHS, 1878-1879.

	1878.			1879.		
	Males.	Females	Total.	Males.	Females	Total.
Quarter ending March 31st	5572	5080	10652	5950	5383	11333
“ June 30th	5090	4598	9688	5468	5016	10484
“ September 30th	5241	4834	10075	5146	4798	9944
“ December 31st	5105	4716	9821	4779	4495	9274
Total	21008	19228	40236	21343	19692	41035

The average number of births within the several specified periods was as follows:—

For the year	41,035	—Males, 21,343 ;	Females, 19,692.
“ month	3,419	“ 1,778 ;	“ 1,641.
“ week	789	“ 410 ;	“ 379.
“ day	112	“ 58 ;	“ 54.

The difference between the number of male and female births during the last eight years is shewn in the following list:—

In 1872.....	1,027	more	male	children	were	born	than	female.
“ 1873.....	1,037	“	“	“	“	“	“	“
“ 1874.....	1,073	“	“	“	“	“	“	“
“ 1875.....	1,064	“	“	“	“	“	“	“
“ 1876.....	987	“	“	“	“	“	“	“
“ 1877.....	1,361	“	“	“	“	“	“	“
“ 1878.....	1,780	“	“	“	“	“	“	“
“ 1879.....	1,651	“	“	“	“	“	“	“

The following statement shews the total number of births in each quarter for the last six years, with percentages:—

QUARTER.	1874.	1875.	1876.	1877.	1878.	1879.	Total.	Percentage of the whole six years.
January to March.....	7610	6998	10012	12580	10652	11333	59185	27.7

ILLEGITIMATE BIRTHS, TWINS AND TRIPLETS.

YEAR.	No. of Illegitimate Births.	Proportion of Illegitimate to the whole number of Births.	No. of Twins.	No. of Triplets.
1872.....	235	One in every 99 Births.	76	0
1873.....	229	“ “ 120 “	200	1
1874.....	196	“ “ 144 “	255	2
1875.....	198	“ “ 131 “	264	1
1876.....	392	“ “ 98 “	349	1
1877.....	529	“ “ 75 “	411	5
1878.....	575	“ “ 70 “	425	9
1879.....	524	“ “ 78 “	378	1
Average for the 8 years	359	One in every 102 Births.	294	2.5

TWIN BIRTHS.

The number of twin births returned during the year was 378, or 47 less than in 1878.

TRIPLETS.

Only one case of three children at a birth was recorded in 1879, though there were nine returned in 1878.

The total number of births returned for the last eight years was 264,867. This gives one pair of twins to every 112 births, and one case of triplets to every 13,940 births; one child in every 56 was therefore a twin, and one in every 4,646 was one of triplets.

ILLEGITIMATE.

It is satisfactory to find that the births of illegitimate children have decreased in number. In 1879, 524 were registered, being 49 less than in 1878.

This gives one illegitimate to 78 legitimate births. In 1878 the proportion was one in 70.

The County of York returned the highest number of illegitimate births, 171; Wentworth, 42; Middlesex, 30; Frontenac, 29; Huron, 22; Wellington and Brant, 15 each. These counties contain the principal cities, which in a great degree accounts for the large number of illegitimate births reported.

MARRIAGES.

MARRIAGES BY DENOMINATIONS.

(For Table *see* Appendix, page xii.)

There were 25,018 persons married in 1879. Of this number the religious denominations of 24,728 were given, the remainder, 290, either were members of no Church, or the clergymen who solemnized the marriages neglected to ascertain the denomination to which they belonged.

It is to be regretted that clergymen, who are generally so correct in their returns, should omit this item of information, so necessary to complete the particulars of a marriage return. When the parties do not belong to any Church the clergyman should state the fact in his report.

The percentage to the whole number married of those whose religious denominations were given is as follows:—

37.37	per cent.,	or 1	in every 2.67,	were	Methodists.
20.87	“	1	“ 4.80,	“	Presbyterians.
16.98	“	1	“ 5.88,	“	Episcopalians.
12.78	“	1	“ 8.13,	“	Roman Catholics.
5.64	“	1	“ 17.72,	“	Baptists.
1.94	“	1	“ 51.51,	“	Lutherans.
1.88	“	1	“ 53.06,	“	Bible Christians.
.77	“	1	“ 128.79,	“	Congregationalists.
.57	“	1	“ 172.92,	“	Menmonites.
.05	“	1	“ 1902.15,	“	Quakers.
1.64	“	1	“ 61.46,	“	of other denominations.

11,153 or 89.19 per cent. of these marriages were by license, and 1,324 or 10.58 per cent. by banns, and of the remaining 32 it is not reported whether they were solemnized by license or banns.

MARRIAGES BY MONTHS.

“	“	“	“	week	“	240
“	“	“	“	day	“	34

As in former years, the winter appears to be the most popular season of the year for marrying. Of the months December returned the largest number of marriages—1,513, or 12.09 per cent. of the whole; and August the smallest number—591, or only 4 per cent. of the whole.

Dividing the year into periods of three months, according to numbers, we find that December, January and October form the highest quarter, with 4,093, or 32 per cent. of the whole number of marriages; while May, July and August form the lowest quarter, with 2,240, or 17 per cent. of the whole number.

MARRIAGES BY AGES.

(For Table *see* Appendix, page xxii.)

12,509 marriages were registered in 1879, being 220 less than in 1878. Whether the decrease was caused by there having been fewer marriages, or whether clergymen neglected to register them, is not known.

In 1879, 130 males who were under 20 years of age were married, while 2,842

females entered into the wedded state at or under that age, being a difference of 2,712. Between 20 and 25 (the great marrying period) the difference between the number of males and females marrying, though not so large as that under 20, was still very marked—4,820 males to 6,141 females, or 1,321 more females than males. In the next quinquennial period, between the ages of 25 and 30 years, a change takes place, and at these ages many more males were married than females, the numbers being 4,270 males to 2,126 females.

Throughout the remaining periods of life the males entering into the marriage state outnumbered the females.

The proportion of males and females married during the different quinquennial periods of life, for the years 1878-79, as compared with the whole number of marriages recorded, is shewn in the following table :—

QUINQUENNIAL PERIODS OF LIFE.	1878.		1879.	
	Per cent. of the whole number Married.		Per cent. of the whole number married.	
	Males.	Females.	Males.	Females.
Under 20 years	1.04	20.82	1.04	22.71
From 20 to 25 years	38.57	49.00	38.53	49.09
“ 25 “ 30 “	34.70	16.86	34.13	17.00
“ 30 “ 35 “	11.55	5.08	12.56	4.95
“ 35 “ 40 “	5.02	2.20	5.59	2.70

“ 80 and over	0.03	0.02	0.00

31 females of the age of 14 (who might very properly be called school girls), were married in 1879, and 35 entered the matrimonial state at the early age of 15. 5 young men married at the age of 17.

One of the remarkable features in the Returns of Marriages is the great difference sometimes shewn in the ages of the parties united. The following is a synopsis of the marriages exhibiting this disparity of years, and also giving the occupation of the bridegroom:—

COUNTIES.	BRIDEGROOM THE ELDER.		
	Occupation of Bridegroom.	Age of Bridegroom.	Age of Bride.
Halton	Gentleman	86	19
Huron	Farmer	70	37
Hastings	“	80	61
Grey	Labourer	70	37
Leeds and Grenville	Farmer	72	46

COUNTIES.	BRIDE THE ELDER.		
	Occupation of Bridegroom.	Age of Bridegroom.	Age of Bride.
Prescott and Russell	Farmer	56	70
Prince Edward	“	19	64

The oldest man married during the year, according to this synopsis, was an octogenarian of 86, who married a maiden of 19. They were wedded in the County of Halton.

The united ages of the oldest couple reached 150 years, the bridegroom being 82 and the bride 68. The County of York claims this ancient pair. The youngest couple belonged to the County of Middlesex. Their united ages amounted to 32 years, or about one-fifth of the combined ages of the oldest couple. The age of the male, in this case, was 17, and of the female 15 years.

DEATHS.

NUMBER OF DEATHS.

The total number of deaths registered in Ontario during the year 1879 was 17,958, of which 9,458 were males, and 8,500 females. There was consequently an increase over 1878 of 150 deaths, viz., 100 males and 50 females. Allowing for increase of population, the death rate was about the same as in 1878, a little over 11 per 1,000 of population, or one death to every 90 persons living.

It may here be observed that from the nine cities in the Province, the total returns shew a mortality of about 18 per 1,000 of estimated population. With the single exception of Guelph, which reported only about 9 per 1,000, the returns from each of the cities are, it appears, as complete as can be expected.

Again, from the county towns the total returns give a mortality of about 13 per 1,000.

It is clear, therefore, that the returns are much more complete from the more densely populated places. As has been before observed, there are probably two causes for this—first, the greater interest taken by the people in towns and cities in the subject of Vital Statistics, and, second, the proximity of the people to the Registrar.

For Tables E and F, giving the Causes of Death, alphabetically arranged, and classified by Months, by Ages, and by Sex, also for the different counties, see Appendix, from page xxx. to lxxv.

AGES AT DEATH.

The table shews that there was a still further decline in the proportion of deaths of persons under the age of one year; the proportion in 1879 being 22·1 per cent.; 2 per cent. less than in 1877, and ·8 per cent. less than in 1878. This is nearly 2 per cent. lower than in England, where the average is about 24 per cent.

There was also a further decline in the proportion of deaths between the ages of 1 and 5 years, the proportion being 2·3 per cent. less than in 1877, and 1·1 per cent. less than in 1878; it was also 1·4 per cent. less than in 1876. Hence it was more than 1 per cent. lower than in any one of the four years 1876-1879 inclusive.

It appears evident then that a considerably smaller proportion died under the age of 5 years in 1879 in the whole Province, than during any one of the past four years.

If we examine the returns of deaths from the cities of the Province alone, we find a very much larger infantile death rate. The total number of deaths registered in the nine cities was 3,794; while the total number registered as dying under 1 year was 1,016. Thus considerably more than one-fourth of the deaths were of children under one year, or 27·28 per cent.

In some of the cities, however, this high rate was greatly exceeded, while in others he rate was lower than the average.

The largest proportionate death rate of children under one year is shewn to have been in London, where it was 32·58 per cent. In Toronto it was 30·24. In Ottawa and Hamilton it was 27·3 and 27·8 per cent. respectively. In St. Catharines it was 24·3 per cent., and in Brantford 24 per cent. In Belleville it was 20·2 per cent. In Kingston it was only little over half the average, or 11·5 per cent., which was remarkably low. In Guelph it was 19 per cent.

The infantile death rate in any locality is, as a rule, the most reliable index of its sanitary condition. I say as a rule, and it may be regarded as an invariable rule, unless an exception be made in case of epidemics of diseases, such as scarlet fever and measles, which are more particularly prevalent and fatal amongst young children. But even in case such epidemics prevail, the death rate may be kept low by proper sanitary administration; indeed, disease may be checked in its course entirely by wise precautions, such as isolation, disinfection, etc., so that with good sanitary conditions and supervision the death rate amongst the young should not in any place, or at any time, greatly exceed the average.

It is worthy of notice, and interesting to observe, that in 1879, between the ages of 5 and 10, and also of 10 and 20, there was a marked decrease in the proportion of deaths below that of any one of the three previous years, and that between the ages of 20 and 30 the proportion was about the same, while after the age of 30 years there was a marked increase in the proportionate number of deaths in each of the decennial periods.

That is, as the table shews, of those who died in 1879, a smaller proportion than in any one of the three previous years were under 20 years of age; while at ages above 30 a larger proportion died than in any one of the three preceding years—1876 to 1879.

It should be observed that while the average proportion of deaths at and under 20 years of age for the three previous years—1876-1878, inclusive—was 49.3 per cent., or nearly one-half of the total number of deaths, the proportion of persons dying at and under 20 years, in 1879, was only 44.8 per cent.

In 1877 more than one-half, 51.4 per cent., of those who died were only 20 years of age or under. It is pleasing to observe then that 4.5 per cent. less died in 1879, under, or at the age of 20 years, than the average at these ages in the three preceding years. It is stated that in Norway only 25 per cent. die before the age of 20 years, as observed in my report of last year.

The returns shew that 3,015 died after reaching the age of 70 years; and that 1,340 of the decedents survived the age of 80 years; while 269 survived 90 years. A much larger number exceeded 70 years in 1879 than in any of the three previous years.

The proportion of deaths amongst males to that amongst females in Ontario during the last five years, is shewn in the following table, as well as the proportion in some of the States of the American Union:—

ONTARIO.

In 1875 there were	4,941	male decedents to	4,909	females, or	100.8	males to	100	females.
“ 1876	“ 9,746	“	“ 8,877	“	109	“	“	“

 NUMBER OF DEATHS AT VARIOUS PERIODS OF THE YEAR.

During the first quarter of the year 1879, 525 more deaths were registered than during the next quarter, and also a greater mortality than during any other quarter of the year. The next largest number was registered during the second quarter, or 265 more than during the third quarter; while 45 more died during the third than during the last quarter. 835, or about 20 per cent., more deaths were registered, therefore, during the first quarter of the year than during the last quarter. It more frequently occurs that the death rate in the third quarter is either greater than in any other quarter, or that it is greater than any except the first quarter; *i.e.*, it is either first or second in the list. In 1878 it was first; the greatest number dying in it.

According to the returns, 1,100 persons more died during the first half of 1879 than during the second half. In 1878, 121 less died during the first half of the year than during the second half. This is largely owing to the mortality in July and August of 1879 being comparatively low.

In 1879, the largest number of deaths was recorded in the month of March, and the smallest number in the month of October, while in the preceding year, 1878, the largest number was recorded in August, and the second largest in March—the smallest number was in December. April's record comes next to that of March in 1879, as it did in 1878, and is nearly 100 less.

As shewing the much greater mortality in March than in October, of 1879, 534, or 41 per cent., more deaths were recorded in the former than in the latter month.

THE DEATH WAVE IN 1879.

In tracing the rises and falls in the mortality from month to month during the year 1879, commencing with January, we find there are in that month 1,589 deaths recorded, or nearly 300 more than during the month of December, 1878. The mortality rises still higher in February, and though only 19 more deaths are recorded in this month than in January (February is a short month), the mortality is at the rate of about 6 per cent., or over, greater than in January. In March it increases at about the same ratio, and 1,830 deaths are recorded in this month, or 222 more than in the short month of February. The mortality has now reached its highest point in the year. In April it falls to about the same proportion that it had shewn in February. In May it drops rapidly, by over 300, or 17 per cent. less than in April—from 1736 to 1434. In June there is a further fall, but much less marked, and 102, or about 6 per cent., less die than in May. In July there is an apparent slight rise again, 38 more deaths being recorded in this month than in June; but as July is one day longer than June the actual mortality of the month is hardly so great as that of June. In August the mortality rises in a marked degree, and 158 more deaths are recorded than in the month of July. In September there is a marked fall again, and nearly 200 less deaths are recorded in it than in August. In October the mortality falls still lower, though not in so great a degree, and reaches its lowest point in the year. In November there is a rise again, and 94 more deaths are recorded than in October, while there is about the same increase also in the mortality in December.

The death wave then, in January, 1879, rises rapidly from the low point of the previous December (1878), and swells up through February and March at about the same rate each month, and reaches in March a point which is over 41 per cent. higher than the point of the wave in the previous December. In April it subsides a good deal, while in May it sinks about three times as rapidly, and falling in June at

about the same rate that it did in April, it reaches its first low point in this month, and keeps at about the same level in July. In August it swells a good deal again, but sinks in September to about the level of July, and in October still a little further, reaching its second low point. In November it swells again rapidly, and also at about the same rate in December, when it is not much lower than it is in the previous January.

The death wave, therefore, this year (1879), as usual, presents two high points and two low points; but the wave differs much from that of 1878. Though the two high points were reached, as in 1878, one in the cold, wet weather in March, and one in the hot, dry weather in August, the highest point in 1879 was in March, instead of in August, as in 1878. Again, the high point in March, 1879, is about 6 per cent. higher than the high point in August, 1878, while the second high point, in August, 1879, is about 8 per cent. lower than the high point in March, 1878. The high point in March, 1879, is 11 per cent. *higher* than the high point in March, 1878; while the high point in August, 1879, is 13 per cent. *lower* than the high point in August, 1878.

The second high point in the death wave in August, 1879, is not nearly so high as the high point in March, there being 302 more deaths recorded in March than in August, while the difference in the height of the two highest points in 1878 was not nearly so great as this; only about one-fourth as great as the difference between the two highest points in 1879; *i.e.*, the difference between the two highest points in 1879 is three times as great as the difference between the two highest points in 1878.

The two low points in 1879 were, one in June and July, and the other in October, and they shewed almost precisely the same rate of mortality as the two low points in 1878; though in this last year they occurred in June and December.

As may be inferred from the above, the mortality in March, 1879, was, according to the returns, unusually high. Many more died of consumption in this month than in any other month in the year, or in any month in the three previous years. From pneumonia nearly twice as many died as in March, 1878. Heart disease appears to have been particularly fatal in March of the year under consideration. More than twice as many died from this cause in that month as in March, 1878, and 50 per cent. more than in March, 1877. More died of apoplexy than in March, 1878, or March, 1877. Congestion of the lungs and bronchitis also caused many deaths in March, 1879.

The greater ascending sweep in the death wave in 1879 was between January and March; and the greater descending sweep, and a long one it was, was between March and June and July. The lesser ascending sweep—a short, steep one—was between July and August; and the lesser descending sweep was between August and October.

CAUSES OF THE TWO HIGH POINTS IN THE DEATH WAVE.

It is deemed advisable to repeat the words of the Annual Report for the previous year, 1878, in reference to the causes of the two high points in the death wave.

“In the cold weather of winter, or more especially in this country, in the damp, cold, windy weather in the latter part of winter and early spring, there is a tendency to sickness and death through the organs of respiration; inflammation and congestion of the lungs, bronchitis and pleurisy being the affections most prevalent at this season of the year. In the warm weather of summer the tendency to sickness and death is through the digestive organs; diarrhœa, cholera infantum, and, later, dysentery, being the diseases which are especially prevalent and fatal during this season.

“In winter a fall of mean temperature below the average increases the sickness and mortality from affections of the chest. In summer a rise of mean temperature above the average increases the number of cases of death from abdominal affections.

“Regarding the winter or spring high death point, it is important to observe that it is not the first cold weather in autumn or early winter that gives rise to the great increase in the mortality, but it is that at the end of the winter, after the severe cold is past. Why is this? It cannot be doubted that, though the cold at this later period is accompanied by winds and greater humidity of the atmosphere, those who then ‘to death succumb’ have been, during the winter, exposed to some pre-disposing causes of lung diseases—to causes which have made them readily susceptible and prone to these affections. The most eminent authorities have brought forward convincing evidence that the re-breathing of breathed air in unventilated rooms is a common and constant cause of diseases of the lungs and air passages. Here, then, doubtless we have the chief factor, the principal cause, of the high March death-rate from diseases of the organs of the chest: exposure during the winter to impure air in close, unventilated rooms. Other causes, to be sure, help to swell up the wave of death at this period. There will be found a few in this country badly housed and fed during the winter, and cold and hunger combine with the foul air to predispose to these fatal diseases, manifested with the chills of spring; others are inactive and spend much of their time in cramped positions with contracted lungs, and these organs then much more readily take on congestions and inflammations on exposure to cold damp air.

“In reference to the summer high death point, it may be said that the warmer the atmosphere the more rapid the generation of malaria, and the development and growth of all sorts of disease germs, moulds, mildews, etc., etc.; and the greater the insanitary conditions, *i.e.*, the more we allow ourselves to be surrounded with excremental or waste organic matter of any sort, the more abundant the development and growth of those causes of disease. Indeed, without the presence of decomposing organic matter, as on the surface of the ground or in the soil, there cannot be any development of such causes. These effluvia and the microscopic germs or seeds of these minute vegetable growths, moulds, mildews, etc., pervade the air, and attach themselves to the foods we eat, and are absorbed by the drinks we use; especially are they absorbed by milk, the universal food of the young. They take root and grow upon fruits, and indeed more or less upon all sorts of alimentary substances. And not only are they, hence, taken into the body with the food we eat, but they are drawn into the lungs and blood with the air we breathe. In the body they interfere greatly with healthy nutrition, and give rise to general debility and intestinal diseases; the more readily and more severely affecting those who had passed the previous winter housed in unventilated apartments, but who, with perhaps better developed lungs than digestive organs, escaped the effects of, or lived through, the cold damp blasts of March.

“There is abundant evidence on record in proof of the above. Indeed the facts are well recognized. But it must be observed, and should ever be borne in mind, that it is not the weather, *per se*, that is responsible for the high rate of mortality at these particular periods.

“Furthermore, a useful and practical lesson may be deduced from our knowledge in reference to these high points in the death wave.

“It is more than probable, it is certain, that, with better ventilation in dwellings, schools, etc., and more outdoor life and exercise during the winter, and with more perfect sanitary surroundings, more perfect cleanliness, by the removal and proper disposal of all waste, excremental matters in cities, towns, villages, and even around farm-houses, whereby the air, water and food are rendered purer during the summer, the two high points in the death wave might be lowered in a marked degree. And it is further probable that much might be done in this direction by individual and united public health efforts.”

The following is a Record of the ten highest Causes of Death for the years 1871, 1872, 1873, 1874, 1875, 1876, 1877, 1878, 1879, and 1879.

CERTIFIED CAUSES OF DEATH.

There is a manifest improvement in 1879 in the nature of the certified causes of death, especially as regards children. A much smaller number is classed under the head of Infantile Debility. There are not nearly so many under the head of Old Age. Both of those causes are highly unsatisfactory. There are too many by far under these heads still; and I must continue to urge upon physicians the great desirability of being as explicit as possible in regard to this point, as it is most desirable to have correct causes of death given, alike in the interest of the Science of Medicine, especially preventive medicine, and in the interest of the public generally.

TEN HIGHEST CAUSES OF DEATH.

In looking over the ten highest causes of death in 1879, I do not find much change from the previous year. Typhoid fever is the only disease in the list of 1878 which is not in that of 1879, but Dropsy, as it were, takes its place. Consumption and Old Age come first on the list, as they have done for many years. Infantile Debility is third on the list, as it has been for the last three years. Pneumonia (Inflammation of the Lungs) has crept up to be fourth on the list, and taken the place of Diphtheria, which is now sixth on the list. Heart disease is one place higher than last year.

Table shewing the total deaths registered in each County, the number who died from Phtthisis out of that number, and the percentage thereof in 1877, 1878 and 1879.

PHTHISIS (CONSUMPTION).

The returns in 1878 shewed a slight increase in the proportion of deaths from Consumption, over 1877, and 1879 shews a still further increase over 1878. But the number returned in proportion to the total number of deaths was not so great in 1879 as in 1876.

The distressingly large number of 301 more females than males fell victims to this disease in this Province in 1879; or 34 per cent. more, viz., 1183 females and 882 males.

And between the ages of 10 and 50, the proportion of female to male deaths was even greater, 950 females having died between these ages, against 600 males.

We have, doubtless, then in Ontario at least 50 per cent. more females than males dying from consumption between the ages of 13 and 45, or during the period of maternity.

We may pause to ask, what will be the effect of this on heredity—on coming generations? The disease is doubtless transmitted from parent to offspring—so, at least, say our best medical authorities.

Between the ages of 10 and 15, more than three times as many females died of this disease, viz., 10 males and 32 females.

Between 15 and 20, 125 per cent. more females than males died of it, viz., 61 males and 138 females.

Between the ages of 10 and 20, about 140 per cent. more females than males died of consumption, viz., 71 males and 170 females.

Between the ages of 20 and 30, about 60 per cent. more females than males died of the disease.

Between the ages of 30 and 40, 35 per cent. more females died of it; and between 40 and 50 years, 26 per cent. more.

After the age of 50, probably after the age of 47 or 48, and in infancy, more males died of consumption than females.

In almost every country it is found that many more females than males die of this dread disease, though the difference is not usually so great as the returns in this Province shew it to be here.

It is not possible to conceive of any natural cause for a so much greater mortality amongst females than males from consumption. If only 882 males die of the disease, why should 1183 females die of it? This is a pertinent question, to which an answer should be found.

Doubtless one principal cause is the more general confinement of women in-doors, in unventilated rooms, depriving them of pure air; another, the drudgery of household duties—overwork—during the period of child-bearing; and yet another, the irrational education and training of young girls; all of which causes were referred to in last year's Report.

The largest number by far of males, as well as of females, died of consumption between the ages of 20 and 30; *i.e.*, a much larger number than during any other decennial period of life. The next largest number of both males and females died in the next decennial period—between 30 and 40; and the next largest between 40 and 50, of both males and females; while the next largest again, amongst males, is between 60 and 70; amongst females it is between 15 and 20.

In every month more females than males died of the disease, except in March and May, when a few more males than females died of it. In 1878, more females than males died of it every month.

Many of both sexes die of consumption every month. A smaller number died of it in July than any other month in 1879. In 1878, the month giving the lowest mortality from this disease was September; in 1877 it was June. The month shewing the greatest

mortality in 1879 was March, giving 32 more than April, the next in order. In 1878, too, the most fatal month was March, and the next April; while in 1877 the most fatal was April and the next March.

Of the 5 months July to November, inclusive, of 1879, the average number of deaths per month from this disease was 144; while of the 7 months December to June, inclusive, the average number per month was 192. In 1878, the average of the 5 months July to November, was 153; and the average of the 7 months December to June was 176. In 1877, the average of the same 5 months was 163; and of the 7 months, 191. The returns shew, therefore, that in 1879 the mortality from consumption during the 7 winter and spring months, was 33.3 per cent. greater than the mortality during the 5 summer and autumn months. In 1878, the difference in the mortality between these two periods of the year was only 15 per cent.; and in 1877, 17 per cent.

The above corresponds with the low point in the general death wave in August, and the high point in March, 1879.

It would be interesting, and doubtless profitable to investigate the causes of the difference in the mortality from consumption, in the different counties of Ontario.

Of the total number of deaths recorded in the whole Province in 1879, 11.5 per cent., as above stated, were from consumption. But some counties returned a proportion very much greater than this, and others a proportion very much less.

In the county of Brant in 1879, the returns shewed that the proportion of deaths from consumption was a little less than the average of the whole Province; or 11 per cent. of the totals from the county. The proportion had been considerably higher for the 3 previous years, 1876-77-78, viz., 14.5 per cent., 16 per cent., and 14 per cent., respectively; giving a per centage for the 4 years of about 3 per cent. above the average of the Province for the four years.

Haldimand has likewise given a high death rate from consumption during the 4 years, 1876 to 1879, inclusive—16, 15, 15, and 16 per cent., respectively; or about 4.5 per cent. above the average of the whole Province for the 4 years.

Hastings in the four years, respectively, gave 17, 13, 16, and 15 per cent.; or 2 per cent. above the average of the totals from the Province.

The united counties of Leeds and Grenville have returned a very high mortality from consumption during the 4 past years above mentioned, 1874-1879, viz., 18, 16, 17, and 17 per cent.; or about 6.5 per cent. above the average.

Lennox and Addington have also returned a high rate of mortality from this disease, or 4 per cent. above the average.

In Prince Edward county the mortality from consumption in 1879 is quite startling, viz., 21 per cent, 4 per cent. higher than in any other county. During the 3 previous years, 1876, 77, 78, it had been 17, 16 and 18, respectively, thus giving an average per centage for the 4 years of about 18 per cent., or more than 7 per cent. above the average.

The lowest death rate from this disease, was, according to the returns, in Muskoka and Parry Sound. In these districts it was only, for the 4 years, 1876 to 1879, 6, 6, 5 and 6 per cent. respectively, of the total number of deaths returned.

In the County of Grey it was almost as low, and in the Counties of Kent and Huron it was considerably below the average; as it was also in Prescott and Russell, and in Peterborough.

The returns from the cities and principal towns, 20 in number, give a mortality from consumption about one per cent. below the average of the Province.

As wetness of soil is unquestionably an important factor in causing consumption, the difference in the mortality from this disease in various counties may be to a certain extent traced to it, one part of the country, for instance, being better served by natural drainage than another. Again, more and more evidence is being brought forward every year by eminent experimental pathologists to prove that consumption is a contagious disease.

Considerable evidence of this character has accumulated during the past year. It has been shewn that the disease may readily be communicated by one animal to another; that it is highly probable it is often communicated from animals—as milch cows—to man, and that it is probable it may be communicated from person to person.

If it is thus contagious, the difference in mortality in different counties may be still further accounted for in this way. It may, as it were, become in some localities almost epidemical.

OLD AGE.

For the fourth year in succession, Old Age, so recorded, again comes next or second on the list of the ten highest causes of death in the Province in 1879.

Over 9 per cent. of the total deaths registered in Ontario are recorded against “old age,” and occur at 70 odd years.

In England, the proportion is only 5 per cent.; in Rhode Island less than 6; in Ohio, less than 5; and in Michigan less than 4 per cent.

In Ontario, in 1871, when the statistical returns were but very imperfect, or about half as complete as at present, the proportion returned as dying from old age was only 4.5; and in 1872 about 5 per cent.

And furthermore, as shewing that more correct diagnosis prevails in the cities and large towns than in the country, in regard to this, or that more care is exercised in the cities and towns in certifying to the causes of death of those advanced in life, we find that while the average age at death in the cities and towns is not much below that in the whole Province, in the total returns from the cities and eleven principal towns in Ontario only 4.5 per cent., instead of 9 per cent., as from the whole Province, were certified as dying from old age; *i.e.*, only about half as many, proportionately, were so recorded in the towns and cities as in the whole Province.

The cause of so many deaths being classed under this head, in the country especially, is doubtless largely owing to want of thought, or appreciation of the value of the true cause of death being given. It is necessary to repeat what has been said in former reports, that it is most desirable that physicians, in certifying to the cause of the deaths in advanced life, as well as indeed in all instances, should give the nature of the particular lesion or diseased state which, along with advanced life, in many of these cases, is the direct cause of dissolution. It should be borne in mind that it is as necessary to know the immediate cause of the death of those of advanced age, or over 60 or 70, as of the young.

INFANTILE DEBILITY.

Under the too indefinite heading of Infantile Debility 955 deaths were recorded in 1879; but it is pleasing to observe there were not so many cases returned last year as in 1878, when there were 1,100, or 15.1 per cent. more. It would, doubtless, in most instances, not be difficult to recognize the cause of this debility, and certify to it, if medical men would but give the matter sufficient attention. It is to be hoped that there will be a still further improvement in this respect next year.

Every month gives 50 to 100 of these cases; and strange to say, 101 were over one year old.

PNEUMONIA.

Pneumonia (inflammation of the lungs) comes fourth on the list of the ten highest causes of death in 1879. Were the cause of death of many of those recorded under the heads of old age and infantile debility correctly given, pneumonia would doubtless be second on the list instead of fourth.

In 1874, pneumonia was next to consumption, or second on the list of ten. It is usually third or fourth on the list. However, not half so many die of it as of consumption.

Of the 943 who died of this disease, 538 were males and 405 were females; or nearly 33 per cent. more males than females. More males than females died of it in every month in the year; and, unlike consumption, it destroys usually more males than females at every age.

The largest number dying in any one month, 157, or one-sixth of the whole, died in March; and the smallest number, 21, in August.

This shews how far this disease helped to swell the high total death wave in March, 1879, and to keep down the usual high point in August. In 1878, the month most fatal for this disease was April, when 99 died of it; and the least fatal month was July, when 43 succumbed to it. In 1877 the returns were similar in this respect to 1879; March recording 177 deaths and August 25.

In that year it was in March that the death wave reached its highest point; while the highest point in the wave in 1878, was in August.

The returns usually shew (viewing those for several years) a gradual and steady increase from month to month in the number of deaths from pneumonia, from July or August up to March or April of the following year, and then a gradual and steady decrease to July or August, excepting that the increase is often more rapid or sudden in January.

As regards the ages at which most patients die of this disease, the largest number is recorded in 1879, as being under 1 year, viz., 221; and the next largest, 140, between 1 and 5 years. The next largest number, 99, is between 60 and 70 years of age; and the next 86, between 50 and 60. Only 50 died of the disease between the ages of 10 and 20; while between the ages of 5 and 15, only 40 died of it.

But, in considering the above figures, it is necessary to bear in mind and consider the numbers which die from all causes at these ages.

The total number of deaths under 1 year, from all causes, was, in 1879, 3869; 22, of these, or 5.7 per cent., 1 in 17.5, died from pneumonia. Between the ages of 60 and 70, 1486 died from all causes, and 99 of these, or 6.6 per cent., 1 in 15, died from pneumonia.

Again, between the ages of 10 and 20, 1057 died from all causes, and 50, or 4.7 per cent., from pneumonia.

The period of life most free from this disease appears to be that between the ages of 5 and 10, when only 2.8 per cent. of the totals died of it; and the most fatal period is that between the ages of 50 and 60, when 7.4 per cent. died of it.

HEART DISEASE.

Under this head, 784 deaths were recorded in 1879, as against 621 in 1878, or 26 per cent. more.

Of the whole number of deaths in 1879 from specified causes, 4.6 per cent. were from heart disease. In 1878 and 1877, the proportion in each year was 3.6 per cent.

Of this disease, 416 males and 368 females died in 1879. In 1878 more females than males died of heart disease. Under 10 years of age, 20 males and 14 females died of it in 1879. Between 10 and 60, on the other hand, 164 males and 201 females died of the disease. While of those over 60, again, whose ages were given (only a few were not given), 209 were males and 138 females.

Many die of heart disease of one kind or another at all seasons of the year, though more die usually during cold than during warm weather. In 1879, however, March was a particularly fatal month for this disease, when 102 died of it. The largest number dying in any one month in 1878 was 63, in May; and the largest number in any month in 1877 was 78, in January. July was the least fatal month in 1879, 40 dying in it.

As to the most fatal period of life, few comparatively die of heart disease under 20 years of age. In 1879, 77 in all died at ages under 20; 34 under 10 years, and 43 between 10 and 20. Between 20 and 30, 59 died of it; and between 30 and 40, 65 died. In the next four decennial periods, from 40 to 80, there died in each period respectively, 87, 111, 148, and 159, so that in each decennial period of life up to 80 a gradually increasing number died of this disease.

The increased frequency of deaths from heart disease, as age increases, seems still more marked when the number of deaths from this disease in each decennial period is compared with the total number of deaths from all causes in that period.

Thus, in Ontario, in 1879, 7,862 died under 20 from all causes, and 77 of these were from heart disease; or one death from heart disease in every 102 from all causes. Between 20 and 30 years of age, 1,622 died from all causes, and 59, or one in 27.5, from heart disease. In the next decade, 30 to 40 years of age, one died from heart disease in every 18.5 from all causes; and in the next four decades, 40 to 80, one died from this cause in every 13, 10.7, 10, and 10.5 respectively.

Much the largest proportion then died of heart disease between the ages of 50 and 80, in Ontario, in 1879.

The most critical decennial period, however, of life is shewn to be between the ages of 60 and 70 years. This was shewn also by the returns of 1877, and, in a marked degree, by those of 1878.

Heart disease seems, from the returns, to be less common or fatal in the cities than in the country. The percentage of deaths, in proportion to the totals, in the 20 largest cities or towns in Ontario, was somewhat (0.4 per cent.) below that of the whole Province, viz., 4.2 per cent. In Toronto, the proportion was exactly 4 per cent; in Hamilton, Ottawa, and London, it was less than 4 per cent.; the proportion for the whole Province being 4.6 per cent.

DIPHTHERIA.

There was happily a large decrease in the number of deaths from diphtheria in 1879, as compared with 1878, or, indeed, with 1877 and 1876 also. There were recorded for each of the four years, 1876 and 1879 (inclusive), respectively, 864, 964, 986, and 574 deaths from this disease. So that while there had been a large increase from year to year for the three previous years, there was last year a marked decrease. It was only in 1876 that the disease was first sufficiently prevalent and fatal in Ontario to have a place in the list of the ten highest causes of death.

The returns for 1879, as well as those for the two previous years, shew that the disease is much more common or fatal in rural than in urban districts. This appears to be the experience in other countries also. In Ontario, in 1879, in the 20 cities and large towns, collectively, the returns shewed one death from diphtheria in every 43 deaths from all causes, while in the rest of the Province there was one death from this disease in every 28 from all causes. This notwithstanding that in some of the towns the disease seems to have been epidemic, and in them the mortality was much greater.

The disease is regarded as eminently a filth disease, and if not arising solely from insanitary conditions, is at least more readily spread and more fatal in such conditions.

In Chatham, there were 5 deaths from diphtheria in a total of 97 deaths, or 1 in less than 20 from all causes; in Brantford, 1 from diphtheria in 24 from all causes; in Hamilton, 1 in 25; in Belleville, where the ravages of the disease appear to have been the most severely felt, 1 died in every 16 from all causes.

In Toronto, 1 died of diphtheria in every 42 from all causes; in Ottawa, 1 in 68; in Kingston, only 2 deaths were recorded from this disease; in St. Catharines and Guelph, 3 each; and in London, none.

No deaths from diphtheria are returned from Algoma, Lennox and Addington, or Thunder Bay. Muskoka District and Ontario County each return only 2; Renfrew and Victoria, 3 each. A few counties return 4, 5, and 6. Huron returns 32, and Prescott and Russell, 42.

The month in which the smallest number died of this disease in 1879 was July, when 20 were recorded. In December, the largest number, 76, was recorded. November and January were nearly as fatal as December.

Of the 574 who died of diphtheria, 283, or nearly one half, died at ages under 5 years; 35 of these were under 1 year; 184 died between 5 and 10 years of age; 55 between 10 and 15; 17 between 15 and 20; and only 18 in all older than 20 years. So that ages between 1 and 10 are by far the most critical as regards this disease.

CONVULSIONS.

During the year, 445 deaths were registered as caused by convulsions—9 less than in 1878. Of these, 250 were males and 195 females; 319 were under 1 year, and 94 between 1 and 5 years.

Besides these, 66 were registered during the year as caused by epilepsy; that is, doubtless, epileptic convulsions

Of the 445 deaths under the head of convulsions, 10 occurred between the ages of 5 and 10 years; 10 more between 10 and 20 years; and only 9 after the age of 20. Of the 66 registered as due to epilepsy, only 16 were under 20 years of age.

DROPSY.

Dropsy comes eighth in the list of the highest causes of death in 1879, and with a record of 400 victims. It had not been in the list since 1876, when it was tenth, with a record of 381. 184 of the 400 in 1879 were males, and 216 females. They were remarkably evenly distributed in each month; 30 odd being recorded in nearly every month.

Of the 400, 27 were under 5 years of age, and 25 were between 5 and 20 years; the remainder—348 being over 20; 252 were over 50 years of age; 66 were between 60 and 70; and 102 between 70 and 80.

Besides these 400, 7 others (of females) were returned as ovarian dropsy, between 20 and seventy years of age. Only four were so returned in 1878.

ENTERITIS.

Inflammation of the lining membrane of the intestines (enteritis), in 1879, according to the returns, destroyed the lives of 393 persons—222 males and 171 females. Of these 94 were less than 1 year old, and 40 were between 1 and 5 years. In 1878, 417 deaths were returned from this cause; and in 1877 there were 497 so returned.

DIARRHŒA.

A smaller number of deaths from diarrhœa, the tenth on the list, was recorded in 1879 than in any year since 1874, and a smaller number in proportion to the totals than in any year since registration commenced.

In 1877, 666 deaths were recorded under this head; in 1878, 401, and last year (1879) 340.

Of the 340, 180 were males and 160 females. 213 were less than 1 year old, and 52 were between 1 and 5. Only 2 were between 5 and 10 years, and only 23 between 5 and 60 years; 47 were over 60 years of age.

Few, comparatively, therefore, die of this disease during middle life. It is, indeed, a disease of infancy and old age.

It is an ailment, too, peculiar to warm weather; 252, or about three-fourths of the 340 died during July, August, and September, 120 dying in August alone. Those who died of the disease in childhood, probably all, or nearly all, died in the warm season. Only 37, in all, died of it during the six winter and spring months—December to May, inclusive.

It is worthy of note that while in the cities and large towns (20 in number), in every 32 deaths from all causes, one was from diarrhœa, while in the rest of the Province, only 1 died of it in every 69 from all causes.

In Toronto alone, there were 70 deaths returned as from diarrhœa; or about 1 in every 20 from all causes. In the town of Windsor, the proportion was somewhat greater

than in Toronto, 5 deaths from it in a total of 94 deaths from all causes, or 1 in less than 19. In Hamilton, 1 in every 27 died of the disease. In these three places, the mortality was much greater from it than in any of the other cities or towns.

TYPHOID FEVER.

There was a falling off in the number of deaths from typhoid fever in 1879, the number being considerably smaller than in either of the four previous years. The four years—1876 to '79—returned, respectively, 436, 477, 379, and 308.

Of the 308 deaths in 1879, 168 were of males and 140 of females; 90 were between the ages of 20 and 30 years, 41 were between the ages of 15 and 20, 38 between 30 and 40, and 22 between 10 and 15. 169, therefore, or much over one-half, died at ages between 15 and 40. It is, therefore, peculiarly a disease of the prime of life.

As usual, the fever was most prevalent or fatal in the autumn months; 55 died in October, and only 12 in July.

While the difference between the proportion of deaths from typhoid in the cities and towns, collectively, and the rural districts was almost inappreciable in 1879, the disease appears to have been almost epidemic in Toronto, Hamilton, St. Catharines and Lindsay. In the 20 cities and large towns the percentage of deaths from typhoid fever was 1 in 58 from all causes, but the percentage in Hamilton was 1 in 40; in Toronto 1 in 39; in St. Catharines 1 in 32; in Lindsay 1 in 13.

SCARLET FEVER.

Only 259 deaths were registered as from scarlet fever in 1879; while there were 368 deaths from it in 1878; and in 1877, 717 deaths. The disease appears, therefore, to be on the decline, on the whole, throughout the Province, though in Hamilton and Belleville it appears to have been very prevalent and fatal. 40 of the 259 deaths, or nearly one-sixth occurred in Hamilton, and 37 in Belleville. There were 9 in London and only 5 in Toronto. 24 were under 1 year of age; 146 were between 1 and 5 years; 55 were between 5 and 10 years; and 10 were between 10 and 15 years. 235, therefore, of the 259 were under 15 years of age. Scarlet fever is much more prevalent in the colder seasons.

MEASLES.

The unusually large number of 67 deaths was caused by measles in 1879. In 1878 there were only 5 deaths registered from this disease, though in 1877 there were 29 deaths from it.

Of the 67 deaths, 11 were of those under 1 year of age; 33 were between 1 and 5 years; and 11 were between 5 and 10 years; 1 was over 40 years of age.

SMALL POX.

The large number of 195 deaths was caused by small pox in this Province in 1879; 103 males and 92 females. In 1878 there were only 36 deaths, and in 1877, 45 deaths from variola. Nearly one-half of the 195, 93, were under 5 years of age. 72 of these were between 1 and 5 years, and 33 were between 5 and 10. Nearly two-thirds of the 195, viz., 127, were returned from the County of Carleton, and 68 from Ottawa City alone. The County of Hastings and the County of Kent each returned 11 deaths from small-pox. Middlesex County returned 3; Oxford, 6; Perth, 4; Prescott and Russell, 14; and York, 5. Brant returns 8; Essex, 2; and 4 other counties return 1 each. This contagion has been confined, therefore, it appears, chiefly or wholly to these counties.

OTHER DISEASES.

There were about the average number of deaths from Cancer, Croup, Bronchitis, the various Brain Diseases and Accidents; and there is nothing special in relation to these which demands notice here.

For Table G, Deaths by Ages, see Appendix Page lxxvi.

17693	31.8 "	7067	41.8 "	6746	40.7 "	13813	41.3 "

The average age of all who died in 1879 was 31.8 years; of males 32.2 years, of females 31.4. In 1878 the average was, for the whole, 29.78 years; males 30.09 years, and females 29.48 years, so that the duration of life was somewhat greater in 1879.

Deducting all who died under one year from the total number of deaths for 1879, we find the average age of the remainder to be 41.3 years; for males 41.8 years, and females 40.7 years. This gives an increase in the average length of life of 9.5 years for the whole; 9.6 years for the males, and 9.3 years for females.

It will be seen then that the extremely large number dying under one year very seriously affects the average age of the whole at death.

The number of deaths under one year, in 1879, in Toronto, was 431, or 30 per cent. of the whole number of deaths registered in that city.

In Hamilton the number was 180, or 27 per cent.; and in Ottawa 112, or 27 per cent.

There were 1651 more male than female births; but the deaths amongst males exceeded those amongst females by 958. The greatest difference between the number of deaths of males and of females appears to have been amongst those under one year of age—2204 males and 1665 females dying at this period of life; a difference of 539 or 32.3 per cent. Last year the numbers were 2210 males and 1753 females, a difference of 457, or 26 per cent. This excess in the mortality of males over that of females continues between 1 and 10 years of age, but not to so great an extent, there being 1528 males and 1408 females, or a difference of 120, or 8.5 per cent. Between the ages of 10 and 20, however, more females than males die; the figures standing 471 males and 586 females, an excess in the mortality of females of 115, or 24.4 per cent. The next decennial period of life is also more fatal to females than to males: 920 females died to 702 males—218, or 31 per cent. more.

The mortality of females is not so great in proportion between the ages of 30 and 40, the numbers being 668 females to 537 males, or an excess of 131, or 24.3 per cent. In the next decennial period, from 40 to 50, the mortality of females is still in excess of males, though very slightly, being 563 females to 549 males, 14 more, or 2.5 per cent.

In the next decade, from 50 to 60, the record shews that more males than females died—643 males to 523 females, a difference of 120, or 22.9 per cent. Between the ages of 60 and 70 years the difference between the mortality of males and that of females is greater than in the previous decade, the number being 854 males to 632 females, an excess in the deaths of males of 222, or 35.1 per cent.

Between the ages of 70 and 80 the difference in the number of deaths of males and of females is still greater—961 males died to 714 females, a difference of 247, or 34.5 per cent. Between the ages of 80 and 90 the difference in the number of deaths of males and of females is much smaller, being 602 males and 469 females, a difference of 133, or 28.3 per cent.

At ages in the last decade of the 100 years of life we find that 135 males and 111 females died, an excess amongst males of 24, or 21 per cent. 10 males and 13 females are reported as having reached the patriarchal age of 100 years and over.

To summarize this review of the deaths of males and of females during the ten decades of life—in the first decade the returns shew a preponderance of the deaths of males over those of females; in the second, third, fourth and fifth decades, on the other hand, the deaths of females are in excess of those of males. In the sixth and following decades the mortality amongst females is less than that of males. So that in the ten decennial periods of life the mortality amongst males exceeds that amongst females in six of them, while the mortality amongst females exceeds that amongst males in only four of them.

Seamstresses	21	37 "	Printers	20	39 "
Tobacconists	7	38 "	Milliners and Dressmakers	30	39 "

In noticing the effects of the various occupations on the length of life of those engaged in them, it may be as well to repeat, in effect, what has been said before—that it ought to be borne in mind that it is not entirely the occupation *per se* which causes the average of life, in some employments, to be so very short. As a rule, those who die young, would not, except under the most favourable circumstances, have lived to advanced

age. These, by choosing such sedentary or confined occupations as that of clerk, book-keeper, printer, or milliner, naturally shorten their own existence.

The average age of those engaged in the various occupations named in Table I was one-half year higher in 1879 than in 1878—57½ years instead of 57 years. In 1877 the average was 56 years. It therefore appears that the length of life of those engaged in them is on the increase.

Of the 7830 persons who died in the 71 named occupations, 4635 were engaged in 19 of them, in each of which the average age at death was as great or greater than the average age of the whole 7830—57½ years, while 3195, or the remainder of the 7830, were engaged in the remaining 52 occupations, in each of which the average age at death was under the average age of the whole.

There were 19 occupations in 1879, instead of 18 as in 1878, in which those engaged lived to be above the average, and in these there were 4635 persons, as against 4344 in 1878. Nearly one-half again of the 4635, or 2290, were farmers, and not far short of three-fourths of the other half, or 1651, were farmers' wives. Thus, taking out farmers and farmers' wives, there were only 695 who were engaged in the 17 other occupations in which the life of those engaged reached or exceeded the average of the whole.

A smaller number, by nearly 100, in 1879 than in 1878, of those engaged in the 52 occupations in which life was below the average of 57½ years, reached the age of 50 years—2349 against 2446. But of the whole number in the tables, 7831, there were 274 more who lived to be 50 in 1879 than in 1878.

The 2349 who, in 1879, lived to be 50 years or over, and yet not up to the average of 57½ years, were engaged in 14 occupations, the same number of occupations, though not altogether the same sort, as in 1878, and included 1264 housewives (more than one-half), 681 labourers, 125 carpenters, and 113 merchants: more labourers, but fewer housewives, merchants, and carpenters than in 1878. Amongst those living to the average of or about 50 years were 29 physicians, averaging just 50 years, as against 18 in 1878; 28 carriage and waggon-makers, 28 millers, 23 cabinet-makers, and 17 coopers.

The table shews that there were 15 lumbermen averaging 48 years, while 11 in 1878 averaged 50 years; 16 engineers, averaging 48 years, while 19 in 1878 averaged 42 years only; 13 stone-cutters, averaging 47 years, against 19 in 1878 averaging 42 years only; 59 tavern-keepers, averaging 47 years, against 48 in 1878 who averaged 48 years; 31 painters, averaging 46 years, against 28 in 1878, who averaged only 40 years; 59 blacksmiths, averaging 45 years, while in 1878 there were 56 who averaged 53 years; 56 teachers, averaging 44 years, against 38 in 1878 who averaged 42 years only.

The average length of life of the 29 physicians was, in 1879, the same as the average of the 18 who died in 1878, viz., 50 years. 31 physicians, however, died in 1876, whose average age was 55 years: and in 1877, 28 died, averaging 53 years. So that it appears the length of life of physicians is on the decrease—from 55 and 53 to 50 years.

During the three years previous to 1879—1876 to 1878, inclusive—77 physicians died at the average age of 53 years.

In 1879 the deaths of 23 members of the legal profession were registered, whose average age was 44 years. In 1876, 20 died, and in 1877, 15 died, averaging 50 years; while in 1878, 19 died, averaging only 40 years. The average age for the three years—1876 to 1878—of the 54 who died in these years was 46.5 years.

On the other hand, 46 clergymen died during the year 1879, averaging 62 years; higher than the average of these in any one of the three previous years. During the three previous years 111 clergymen died, whose average age was 58.

The farmers, too, had averaged 61 years during the three years previous to 1879, and, as the table shews, 64 in this last year. The average length of life shewn by the farmers' wives was also greater in 1879 than the average of the three previous years.

The average length of life of tailors and shoemakers was likewise considerably greater in 1879 than the average of the three previous years.

Deaths by Occupations (Causes of Death). For Table, *see* Appendix, pages cxvi. and cxvii.

Ten Occupations which returned the largest number of Deaths from Phthisis.

OCCUPATIONS.	1878.			OCCUPATIONS.	1879.		
	Deaths from all causes.	Deaths from phthisis.	Rate per cent.		Deaths from all causes.	Deaths from phthisis.	Rate per cent.

Dropsy	140	3.0	Debility	179	3.6
Debility	122	2.6	Dropsy	178	3.6
Lung Disease	121	2.6	Cancer	139	2.8

Although the mortality amongst farmers, from all causes, is greater this year than in 1878, the numbers being 2290 against 2146 last year, yet the number dying of consumption in 1879 is 58 less than in 1878, a difference of 3.4 per cent.

It might be supposed, from the large number of farmers dying of consumption (246), that these tillers of the soil were more subject to this disease than persons engaged in other occupations; but when we compare the mortality from phthisis among farmers with the total number of that class dying from all causes, it will be found that, with the exception of "gentlemen," farmers furnish fewer victims to this disease, in proportion to their numbers, than any other occupation. This will be seen by referring to the table.

Out of 66 book-keepers and clerks whose deaths are recorded, 34 died of consumption, a percentage of 51.5, being the highest of any occupation. The close confinement, and the sedentary nature of their occupation, no doubt lay them open to the attacks of this insidious disease. Teachers are next, with 23 deaths from phthisis out of 56 from all causes, a percentage of 41.1. Teaching is a profession often entered into at an early age, before the system is fully matured, and as those who follow this occupation are exposed to the vitiated atmosphere of ill ventilated schoolrooms, they fall easy victims to this dread disease.

Servants are third highest, 29 dying of phthisis out of 81 from all causes, or 35.8 per cent. Probably among them are included domestics, who have not the means nor opportunities to take precautionary measures to protect themselves from cold and exposure, thus rendering themselves more liable to become subjects for consumption.

It seems strange that blacksmiths and carpenters, whose occupations are neither sedentary nor altogether confined to in-door work, should give so high a percentage of deaths from consumption; perhaps it is owing to a want of care in protecting themselves against the rapid changes of weather to which they are at times exposed. Blacksmiths return 16 deaths from consumption, out of 59 from all causes, or 27.1 per cent. Carpenters 22 out of 125 from all causes, or 17.6 per cent.

Fewer persons, returned as "gentlemen," died of consumption in proportion to the number of people dying from all causes, than under any other designation, viz: 13 deaths from it out of 184 from all causes, or 7 per cent. Persons to whom this designation is applied at the time of their death, are generally those who had retired from all occupation and reach advanced years, and were therefore past the period of life most subject to tubercular diseases. This may account for the small number, comparatively, of men of leisure reported as having died of consumption.

Although there is a very perceptible average improvement in the schedules received from the Division Registrars for the year under review, there is room for proficiency from some of those officials in more legible handwriting and more accuracy in the orthography of names, both of which are most essential items in the preparation of valuable and satisfactory records.

Among the most complete returns received are those from the following municipalities and are worthy of special mention, viz: the cities of Hamilton, London and Toronto; the towns of Cornwall, Paris, Pembroke and Wingham; the villages of Forest, London East, New Edinburgh and Yorkville; the townships of Alfred, Brock, Eramosa, Gloucester, London, Plantagenet North, Tilbury West, and Wilmot.

In order to make the Registration Act more effectual it is desirable that some amendments should be made thereto during the coming session; I would therefore respectfully recommend as one, that each school teacher in the rural districts be appointed sub-registrar for his own section; and further that the time for receiving the registration of the particulars of births be extended under certain restrictions.

I would again suggest that some measures should be adopted to compel municipal councils to pay their clerks the fee allowed by Sec. 26 of the Act, for each birth, marriage and death registered, as further reports have been made to the Department during the past year of an additional number of municipal councils refusing to pay this fee, which, as pointed out in last year's report, must in a great degree lessen the encouragement on the part of Division Registrars to become thoroughly efficient in the discharge of their important duties.

I have the honour to be,

Sir,

Your obedient servant,

H. S. CREWE,

Inspector.

APPENDIX.

BIRTHS.

TABLE A.—BIRTHS BY MONTHS, 1879.

LICENSE REPORT.

PROVINCIAL SECRETARY'S OFFICE,

LICENSE BRANCH,

TORONTO, January, 1881.

To The Honourable JOHN BEVERLEY ROBINSON,

Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR :

I have the honour herewith to submit the Fifth Annual Report and the accompanying Schedules respecting the operation of the Liquor License Laws.

Several of the Schedules will be found to contain information relating to the revenues derived by the Province and the municipalities, respectively, from this source. In other tables appear the amounts received from fines, the expenses of Commissioners, salaries of Inspectors, and special reports from many of the Inspectors regarding the general working of the law.

Schedule A shews the number of licenses issued for each District of the Province during the license years 1878-9 and 1879-80, and up to the 31st of December in the current license year. It also gives the revenue derived by the Province from this source during those periods.

Similar information with regard to the Counties is supplied by Schedule B, while Schedule C does the same duty for the Cities, Towns, Townships, and Villages.

In addition, Schedule C contains a statement of all moneys collected in and paid over to these municipalities, during the years mentioned.

The issue of licences for 1879-80 was larger than in any other year including or subsequent to 1876-7, when the present law went into force. The following table shews the numbers issued for the years under review :—

YEAR.	TAVERN LICENCES.				SHOP LICENCES.			WHOLESALE.	VESSEL.	GROSS TOTAL.
	Ordinary.	Extended.	Six Months'.	Total.	Ordinary.	Extended.	Total.			
1876-7	2,978	2,978	785	785	147*	26	3,936
1877-8	2,845	63	15	2,923	739	16	755	65	27	3,770
1878-9	2,910	25	14	2,949	724	6	730	52	29	3,760
1879-80	3,199	13	29	3,241	757	6	763	42	22	4,068
1880-1, May 1 to Dec. 31	3,081	63	24	3,168	727	21	748	37	19	3,972

* Includes some eighty Brewers' Licenses.

As already mentioned, this table shews that the issue of licenses in 1879-80 was larger than in any preceding year. The current license period cannot be fairly taken into consideration in this comparison, as it will not be completed until the 30th day of April next. The increase alluded to was due to two causes, viz.: (1) the repeal of the Dunkin Act in all County Municipalities where it was in force, and the re-issue of licenses; and (2) the growth of the population in the Cities, Towns, and Townships in some of which new censuses were taken under the Act for the purpose of increasing the tavern accommodation to the limits to which they had become respectively entitled.

The income derived by the Province from licenses and fines during 1879-80, the last complete license year, was \$87,198.19, of which (\$2,200 being for Vessel Licenses) \$84,998.19 represents the Provincial Treasurer's one-third share, after payment of expenses. The other two-thirds paid over to the municipalities, as required by the Act, amounted to \$169,996.38, to which was added the sum of \$101,850.54, the aggregate excess over Statutory duties, payable without diminution to these municipalities, making together a total of \$271,846.92. The details appear in Schedule C.

Schedule D contains a Statement of the fines collected, and the amounts paid as expenses of Commissioners and salaries of Inspectors during the years 1878-9 and 1879-80, respectively. A gradual decrease, year by year, is observable in the amount of fines, due to a better observance of the License Law as the result of a more vigorous administration of it in recent years. The fines collected during the respective years were as follows :—

1876-7	\$27,910 49.
1877-8	24,132 54.
1878-9	20,036 24.
1879-80	18,613 60.

That the reason assigned for this decrease is the true one, is manifest from the fact that the supervision now exercised over the collection of these fines is more effective under the new system, adopted two years ago, than it was formerly.

In fulfilment of a promise made by the undersigned, on the floor of the House last session, the Department, at the close of the license year 1879-80, furnished the Treasurer of every municipality in the Province with a Statement shewing the receipts and expenditures of the year, in connection with the License Fund of the District whereof such municipality formed part. The Councils were thus put in possession, in a succinct form, of a statement of the revenues and disbursements in this behalf within their respective jurisdictions. A specimen copy of these accounts will be found in Schedule G hereto. At the same time, each Treasurer was supplied with a duplicate copy of the Statement wherein the Inspector and Board of Commissioners communicated to the Department the details of the year's transactions in the municipality, and upon which the Department had caused to be set out the particulars of the apportionment between such municipality and the Province. It is proposed to render these Accounts and Statements to the municipalities annually.

Following the provisions of the License Act, which fixes the 30th day of June as the date for making the first apportionment, and the ensuing 30th day of April, the close of the license year, for making the final apportionment of the license moneys between the municipalities and the Province, the Department, desirous that the former should receive their share of the revenue at the earliest possible moment, has addressed itself with increasing diligence to the prompt rendering, by the Inspectors and Boards of Commissioners, of the Statements and Accounts necessary for the proper distribution of the funds, and without which no Departmental action can be taken. These completed, the Accounts are adjusted and the moneys distributed without delay. The difficulties arising, chiefly from local considerations and the inexperience of the officials, have year by year become less, so that, on the whole, it may be said that these matters can scarcely be expedited or arranged more promptly. The average dates of the distributions during the several license years were as follows :—

First Distribution. (Statutory Period 30th June).

1876-7	No data.
1877-8	7th August.
1878-9	27th July.
1879-80	16th July.
1880-1	20th June.

Final Distribution. (Year Ends 30th April).

1876-7	1st July.
1877-8	23rd June.
1878-9	6th June.
1879-80	21st May.

The Circular and Form of Certificate given in Schedule I, were recently transmitted to the Inspectors throughout the Province in order to ascertain, in a simple and convenient manner, whether the bonds of these officials continued to be subsisting securities. The certificates have been returned in every case, and wherever the security was defective it has been remedied by the substitution of new bonds and new bondsmen. The circular requires that similar certificates shall be furnished annually by Inspectors, on or about the 1st of November.

Accusations having been made in some influential newspapers to the effect that Inspectors and Boards of Commissioners had shewn political favouritism in granting licenses for the current license year, I caused the facts to be reported to this Department, in reply to a circular (Appendix Y) issued to the Inspectors. They appear in statistical form in Schedule E hereto. Upon reference to the table it will be seen that of 1266 applications from Reformers, 1102 were granted and 164 refused; of 2978 applications from Conservatives, 2704 were granted and 274 refused; and of 319 applications from persons belonging to neither political party (chiefly women,) 252 were granted and 67 refused. The grants to Reformers were thus about 87 per cent. of their applications; to Conservatives, nearly 91 per cent. ; and to non-politicians, 79 per cent. To carry the comparison further, of the total number of these applicants for licenses, about 28 per cent. were Reformers; 65 per cent. Conservatives, and 7 per cent. non-politicians. The total number of Conservatives, Reformers and Non-Politicians respectively, to whom licenses were granted may be tabulated thus :—

PERSONS RECEIVING LICENSES.	Percentage granted.
Conservatives	67
Reformers	27
Non-Politicians	6

The following table exhibits these statistics in a complete and precise form :—

CLASS.	No. of applicants for licenses.	No. of licenses granted.	Proportion of applications from each class to total No. of applications—per centage.	Proportion of licenses in each class to total No. of licenses—per centage.	Proportion of the applicants from each class granted—per centage.
Reformers	1,266	1,102	27·74	27·16	87·04
Conservatives	2,978	2,704	65·26	66·63	90·80
Non-politicians	319	252	7·00	6·21	79·00
	4,563	4,058	100·00	100·00

The difference between the number of licenses granted, as here given, and as shewn in Schedules A, B and C, is due to the returns for the purposes of the present statement having been made at a period subsequent to the receipt in the Department of the statements from which Schedules A, B and C were compiled, and the fact that the returns in part refer to licenses issued after the completion of the statements.

In this connection it will not be out of place to reduce to like proportions, and compare with the above the figures of a similar return, published in the License Report for 1876, leaving out those relating to non-politicians, who found no place in that report. The other classes stood in the following proportions :—

	1876-7.		1880-1.	
	Reformers.	Conservatives.	Reformers.	Conservatives.
1. Percentage of total number of applicants for license	30·44	69·56	29·83	70·17
2. Percentage of total number of licenses granted	30·45	69·55	28·95	71·05
3. Proportion of their respective applications granted to each class	75·10	75·08	87·05	90·80

The practical result is that in 1876-7 there was a percentage granted in favour of Reformers of ·02, which was changed in 1880-1 to a percentage in favour of Conservatives of 3·75.

Sufficient time having, in my opinion, elapsed to enable the Inspectors throughout the Province to make a reliable comparison of the general results of the old and the new License Laws, and of the present working of the License Act as compared with its past operations, I required them to fully report thereon, under the headings set out in Schedule K hereto. From their reports the following conclusions are clearly deducible :—

- (1) The volume of illicit traffic and the number of persons engaged in it have greatly diminished.
- (2) The quality of the tavern accommodation has materially improved.
- (3) There is a better observance, in every particular, of law and order by licensed Hotel and Shop-Keepers.
- (4) The business standing and personal qualifications of tavern-keepers are much in advance of former years.
- (5) Public opinion is very pronounced in favour of the present law.
- (6) There has been a favourable change in the drinking customs of the people, and notably from three causes, viz., (a) the formation of a healthy general public opinion on the side

of temperate habits ; (b) the effect of the legislation as to the closing of taverns on Saturday evenings and on Sundays ; and (c) the salutary effect of the efficient and prudent administration of the License Laws, in the diminution of illicit traffic, and in weeding out disreputable holders of licenses, and substituting responsible, respectable men, who find it to their interest to discourage disorder and drunkenness on their premises.

(7) The administration and working of the License Laws are more efficient and satisfactory in every way at the present time than at any former period.

In Schedule F, the record of commitments for drunkenness is continued from my former Report, by the addition of the commitments for the year 1880.

The County of Lambton, referred to in this connection in my last Report, remains the only one in the Province in which The Canada Temperance Act (the Scott Act) has as yet been submitted to a vote. In consequence of its adoption, no licenses will issue during the coming license year, in either of the two License Districts into which the County is divided—excepting such as are provided for by the Canada Temperance Act.

Respectfully submitted.

ARTHUR S. HARDY,
Provincial Secretary.

1874	4793	1307	52	33	6185
1875	4439	1257	78	24	5818
1876	2977	787	147	27	3938
1877	2845	739	65	27	3676
1878	2910	724	52	29	3715
1879	3199	757	42	22	4020
May 1 to Dec. 31, 1880	3081	727	37	19	3864

The Six Months' Licenses and the Licenses *extended* do not appear in the above recapitulation, and as a consequence the total number of Licenses issued, according to this Statement, does not correspond with the total number as shown in Schedules A and C. An *extended* License is good for a period not exceeding three months. It is not in the nature of a new License, but simply a permission, granted by the Board of Commissioners to the holder of a License expiring in April, to continue his business under the old License for the specified period, that he may be enabled to dispose of his stock on hand and quit the business without loss. A Six Months' License runs from the first day of May to the thirty-first day of October, and is not valid after the latter date. They are granted in localities which are largely resorted to in summer by visitors, where the Boards of Commissioners are of opinion that increased tavern accommodation for the summer months is necessary.

SCHE

SCHEDULE I.

COPY OF CIRCULAR AND OF BLANK FORM OF CERTIFICATE relative to the Bonds and Sureties of Inspectors.

PROVINCIAL SECRETARY'S DEPARTMENT,
LICENSE BRANCH,
TORONTO, 12th October, 1880.

SIR.—It being deemed advisable to ascertain, from time to time, and in the manner the most simple and least inconvenient to all parties, whether the Bonds of the respective License Inspectors continue as good and subsisting securities for the purposes for which they were given, the accompanying form of Certificate has been devised, which is to be duly filled up and signed by the Inspector and the Chairman of the Board in each case, and transmitted to this Department on the 1st day of November in each and every year—the first of which on the 1st day of November next.

And should any person who has become surety for an Inspector in the interval die, or cease to be a resident of this Province, or become insolvent, or in any way cease to possess a property qualification sufficient to cover his liability on the Bond, the fact is to be, by the Inspector, forthwith reported to the Department, and a new surety provided, and a new Bond entered into.

You will bring this Circular to the attention of the Board, now, and from year to year.

I have the honour to be, Sir,
Your obedient Servant,
ARTHUR S. HARDY,
Provincial Secretary.

The Inspector of Licenses.

LICENSE DISTRICT OF.....

LICENSE YEAR 188....—....

Having made due enquiry, We Certify thatand the sureties in the Bond of the undersigned Inspector of Licenses named, are respectively still living and resident within this Province; that neither of them has become insolvent; and that we believe them to be severally seised and possessed, each to his own use, of freehold real estate, in this Province, of the actual value of not less than five hundred dollars, over and above all charges upon or incumbrances affecting the same; and that we believe each of them, the said sureties, to be worth a sum of not less than five hundred dollars over and above his just debts, and any sums for which he is liable, as surety or otherwise, except upon the said Bond.

Dated at.....this.....day of.....188....

.....*Inspector.*

.....*Chairman.*

To THE HON. THE PROVINCIAL SECRETARY,
License Branch,
TORONTO.

SCHEDULE K.

REPORTS OF THE INSPECTORS, shewing, by way of general comparison, the results of the old and the new License Laws, and the working of the License Act at present and during the license years 1876-7, 1877-8, 1878-9, and 1879-80.

The following circular was addressed to the several Inspectors throughout the Province. The answers received thereto are appended.

PROVINCIAL SECRETARY'S OFFICE, LICENSE BRANCH,
TORONTO, 17th November, 1880.

SIR,—As four years have now elapsed since the issue of Licenses and the enforcement of the License Act were placed under the supervision and control of Officers appointed by the Government, and as sufficient time has transpired to enable the Inspectors to make a comparison of the general results of the change between the old and new Law, I am directed by the Hon. the Provincial Secretary, to request you to furnish to this Department at your earliest convenience a Report by way of a comparison of such results, under the following heads:—

1. The number of persons engaged in illicit traffic in intoxicating liquors as compared with the number so engaged under former Acts.
2. The quality of tavern accommodation as compared with that under former Acts.
3. The observance of law and order by licensed hotel-keepers, compared with former Acts.
4. The observance of law and order by licensed shop-keepers, compared with former Acts.
5. The standing and personal qualifications of the holders of tavern licenses as compared with same under former Acts.
6. Public opinion regarding the change from the old to the new Law.
7. The drinking habits of the people and the custom of treating at the bars, compared with former years.
8. Make a general comparison of the present working of the License Act with that during the license years 1876-7, 1877-8, 1878-9 and 1879-80.

TORONTO.

Answer to Question 1.—The number of persons now engaged in the illicit traffic in intoxicating liquors is undoubtedly far less than were so engaged under the old law, but there are no means of arriving at any statistics on the subject. Under the municipal *regime* there was practically no limit to the number or the business of illicit dealers. Liquor could be obtained in almost every small grocery or other shop in the city, and at all hours. The law was, in fact, more honoured in its breach than in its observance. Whilst I am certainly within the mark in estimating the number of persons engaged in the illicit traffic in this city in 1875 at 250, I can barely count fifty persons known or reputed to be engaged in it now, although there has been an increase in the population. The illicit traffic has now become very degrading, and it is almost exclusively in the hands of people of the criminal class. The ordinary frequenters of unlicensed houses are of such a class as would be considered a disgrace to any respectable tavern. Under these circumstances it is obvious that the unlicensed traffic on Saturday nights and Sundays, discreditable as it is in character, affords no ground for the present outcry of the licensed dealers for an extension of time for Saturday night selling, because the volume of this illicit traffic would

scarcely pay increased gas bills of the licensed houses, and respectable tavern-keepers would not tolerate in their premises the disreputable traffic of the existing grogeries. As a matter of fact, if the desired Saturday night extension were granted the degrading traffic existing would not be diverted from the unlicensed houses, but the temperate working classes might be tempted into drinking habits, and dissipation and intemperance spread where they do not now exist.

Answer to Question 2.—We are particular in all cases to see that the accommodation in every tavern meets the requirements of the law. It is generally of better quality than formerly. A number of applicants for licenses in 1876-7 who had hitherto held licenses, were refused by us for want of proper accommodation, and were cut off in consequence.

Answer to Question 3.—Owing to the same want of statistical information regarding the practical disuse of the old law, there are no means of comparing the relative observance of law and order by licensed men under the new law with those under the old. From personal observation I am satisfied that it was the exception for licensed tavern-keepers to observe the old law, and that, with the exception of occasional infractions during prohibited hours, the licensed tavern-keepers do not violate the new law.

Answer to Question 4.—The remarks in the preceding paragraph apply also to the case of licensed shop-keepers. It is notorious that shop-keepers holding licenses under the old law were constantly violating it. The smaller shops were merely so many small grogeries, to which women as well as men resorted for dram-drinking, and to such an extent as rendered them formidable competitors with the business of the ordinary taverns. Under the new law there has been a great change for the better, but there is still room for improvement, especially with those shops located in retired places and on back streets. With regard to licensing shops in which other goods than liquors are sold, I beg to submit that there are now probably 250 retail groceries in Toronto, but only ninety-two of these are licensed to sell liquor. The unlicensed grocers very reasonably complain that the large profits made from the liquor traffic by the licensed dealer gives him a sort of monopoly, and enables him to undersell his less favoured neighbours in their own commodities, and thus divert their custom, to their great pecuniary disadvantage. Like the dry goods or hardware dealer, the grocer has a legitimate trade of his own, irrespective of the liquor traffic, which is a distinct business of itself, and one, too, which, in all countries, is placed under a ban; and I respectfully submit, that one grocer ought not to be granted a license which works unjustly towards another and injuriously upon a whole trade. Besides, if none but those who dealt in liquor exclusively were licensed, the traffic could be more effectually controlled than at present, when licensed shop-keepers have the right to keep open for the sale of their groceries during the hours when sales of liquor are prohibited.

Answer to Question 5.—The standing and personal qualifications of the holders of tavern licenses under the present Law as contrasted with those under the Municipal Law are greatly improved. Under the old law, keepers of houses of prostitution and of assignation, professional gamblers, habitual drunkards, and the like, were entrusted with licenses to sell liquor, and as might have been expected, all sorts of catch-penny entertainments, exhibitions, and devices of a degrading and immoral character were openly maintained in or in connection with licensed houses, to attract custom to the bar. I need not describe more than one or two of these licensed dens of iniquity. In one well known licensed tavern called the "Vineyard," on King Street West, the immoral songs and ribald jokes of both men and women performers upon a stage erected across the end of the crowded bar room, were nightly varied by the dancing of the can-can by loose women indecently attired; and in another licensed place, the well known "Academy of Music," on Colborne Street, theatrical entertainments of the lowest order upon a regular stage, attracted large crowds nightly. The keeper of this place, to whom a saloon license had been granted for these premises, was for years previously resident in, and the reputed keeper of a notorious house of ill-fame. Other similarly licensed houses existed throughout the city. In other

licensed taverns, sparring and boxing matches were publicly and regularly held. Others had pits regularly constructed for holding public cock, dog, and rat fights. Other licensed places were simply low dance-houses with large rooms or halls attached, for the resort of loose characters, whose dances usually terminated in the most demoralizing orgies. Other licensed taverns were publicly known as assignation houses of the lowest type. And all these places were, under the old Municipal Law, in a greater or less degree, and in one form or another, the licensed homes of dissipation and vice. It is not necessary to say, that all these places, so far as licenses are concerned, have been entirely swept away under the present law, and *not one* such house now holds a license.

Answer to Question 6.—Public opinion is decidedly in favour of the new law, and a return to the old system of placing the liquor traffic again under the control of the municipal councils would be generally condemned, even by licensed men themselves, and only the worst classes of society would welcome a return of the old law.

Answer to Question 7.—The drinking habits of the people generally have diminished, and especially the custom of indiscriminate treating, once as universal as an ordinary salutation, has fallen into comparative disuse. It is no longer esteemed a compliment to treat or be treated, except by those addicted to intemperance.

Answer to Question 8.—During the past two years the License Law has been more easily worked than under the two preceding years. The amendments made a few years ago facilitating the procedure of prosecutions was of immense advantage. Scarcely any convictions are now quashed on Appeal or Certiorari, while in the earlier stages of working the law the contrary was the fact. The chief difficulty now existing (as it will always be) is to repress the unlicensed traffic, and there should be further amendments to the law with this object. My quarterly returns afford further information as to the conduct of the prosecutions and the business of this office.

ADDINGTON.

Answer to Question 1.—There are no persons known to be engaged now in illicit traffic in liquors. There was only one persistent effort to sell in spite of the law during this year, while during former years there were several such cases, and under former Acts a great many persons were regularly so engaged, and were encouraged therein by municipal officers.

Answer to Question 2.—The quality of tavern accommodation has been generally very much improved under the present Act within the last two years, and is now vastly superior to anything known under former Acts. Next year is to see many houses further improved in pursuance of a policy deliberately adopted and being systematically acted upon, especially in the larger villages.

Answer to Question 3.—The observance of law and order by licensed hotel-keepers is now very general and satisfactory, but under former Acts it was not so. It has been a long, patient struggle to bring the present state of affairs about. And yet there is room for improvement for which I am steadily working, as in the matter of improved accommodation.

Answer to Question 4.—There is now, so far as I know, perfect observance of law and order by licensed shop-keepers, there being only two in the district. Under the old system of supervision, general drinking was common in such shops, with one exception.

Answer to Question 5.—The standing and personal qualification of holders of tavern licenses is much better now than formerly—a very great improvement on those licensed under former Acts. Many license holders are the same persons as under former Acts, but they have gradually improved—in fact have been compelled to so

improve or be dropped out. Great care is taken to grant licenses, when at all possible, only to a class of men better qualified for the business than many of those formerly engaged therein.

Answer to Question 6.—The public generally are well pleased with the change from the old to the new law, but there are some, who being evidently moved thereto by political reasons, strongly urge for a return to the old way. They simply want the issuing of licenses, and appointment of Inspectors to be in the hands of the municipal councils which they control, so they can enjoy the small patronage.

Answer to Question 7.—There is not nearly so much public drinking as there was under former Acts. The practice of general treating at bars has become nearly obsolete, and bar-room rowdiness is put down as much as possible, so rough characters do not hang around taverns as they used to do, and keep up general drinking. A very poor quality of liquor is generally sold in country and village taverns, and a great many moderate men have quit liquor drinking within the last few years. Young men do not congregate at taverns to drink as they used to do, in large parties, a few years ago, frequently on Sundays.

Answer to Question 8.—*Re 1876-7.*—The machinery for enforcing the law being new, was not worked as satisfactorily as it has been found possible to work it since then, and no very great improvement was noticeable. There were fewer licensed taverns, but some of them sometimes very disorderly, while selling without license was persisted in by many who had been refused licenses.

Re 1877-8.—The “Dunkin Bill” was in force and brought the hotel business to a thoroughly disorganized state.

Re 1878-9.—The “Dunkin Bill” having been repealed in one part, and quashed in the other part of the District, licenses were again issued, but it was found that many holders of licenses seemed not to realize that there was any law regulating their business. It was a hard year's work to bring to a moderate degree of order the unsettled state of the licensed liquor traffic, and stop unlawful selling, which was accomplished to a considerable extent.

Re 1879-80.—During this year the licensed traffic in liquors was got into fair working order and became generally satisfactory. The most trouble was on account of enforced improvement of premises. A considerable amount of unlawful selling was indulged in, avowedly to bring the law into disrespect, but being promptly attended to, and guilty parties fined and imprisoned, it had just the opposite effect on the general public, and by the end of the year the law was working smoothly and satisfactorily.

Re 1880-81.—The law has worked very satisfactorily so far this year. About the only trouble has been on account of enforced improvement of premises where necessary, which the public generally, and especially the travelling public, are greatly pleased with, but owners of premises rented for very high rental wince and make much talk about being forced in that direction, which I suppose is a natural feeling on their part; but where the premises have become so run down from lack of repairs, as not to fairly contain the proper comfortable accommodation, license has been withheld, until they were properly improved.

NORTH MIDDLESEX.

Answer to Question 1.—According to the old Act there were nine license inspectors in this district—*i.e.*, one for each municipality. These inspectors received appointment from the council, the members of which were elected by the people. The inspectors were thus dependent on the Council for the necessary funds to carry on prosecutions; consequently the law was administered with laxity. My term of office commenced under the new Act: therefore, not being thoroughly informed as regards the state during the old Act, it is difficult, in fact impossible, for me to make a satisfactory comparison. However, I may state that the illicit traffic has been decreasing, as the table in No 8 will show.

Answer to Question 2.—The number of licenses have been decreased from sixty to thirty-nine. The improvement as regards accommodation has been very satisfactory, several second-class houses having been transferred to those of the first-class order; while all have decidedly been made more fit for the public.

Answer to Question 3.—Our restrictions confine the hotel-keepers to a more legitimate business. They have a monopoly, as it were, of the business, compared with that under the old Act; consequently, this is an additional stimulus to conform to the law.

Answer to Question 4.—The shop-keepers conform more to the law now than during the time of the old Act.

Answer to Question 5.—Several changes have been made in this Riding for the purpose of having a better class of tavern-keepers, and we are confident that the change has been for the better, though there is still room for improvement.

Answer to Question 6.—The better classes are in favour of the present law.

Answer to Question 7.—In the rural districts the landlords complain that there is not so much drinking as formerly.

Answer to Question 8.—We are able to assert that from 1876-7 to 1879-80 there has been a marked improvement in the working of the License Act.

In	1876-7	there	were	12	convictions	and	0	non-convictions.
"	1877-8	"	"	11	"	"	2	"
"	1878-9	"	"	8	"	"	1	"
"	1879-80	"	"	3	"	"	1	"

NORTH PERTH.

Answer to Question 1.—There evidently would be less temptation to keep unlicensed houses in towns and villages before the Crook's Act came into force, because invariably every person who applied for a license could easily obtain one. In the year 1875 there were thirty-five licensed taverns and five shops in the town of Stratford, and in May, 1876, by the authority of the new Act, according to population, only eighteen of that number received licenses and seventeen had to be cut off, and of these, ten or twelve attempted to sell in violation of the law, but these are now reduced to about five or six houses, and they are so demoralized by the infliction of fines and imprisonments that they do not seem able to make a living. Nevertheless, from the candid opinion of reliable men whom I have consulted, I believe the unlicensed liquor traffic has decreased since the new Act became law, so that it is at least sixty-five or seventy per cent. less than formerly.

Answer to Question 2.—Tavern accommodation has increased since 1876 about equally with the value of property, in new and comfortable buildings erected and old ones improved, I believe, about fifty per cent.

Answer to Question 3.—The observance of law and order has been much improved, inasmuch as there is far less disorderly conduct openly manifest, and where the law is violated on Saturday night, it is done so quietly that there is seldom any uproar or noise made about it. I believe the improvement in these houses now, over the former Act, is from eighty to one hundred per cent.

Answer to Question 4.—Licensed shop-keepers show a decided improvement in refraining from treating their customers, or selling by the glass. I believe the Sunday law is more strictly observed by this class than by the hotel-keepers. I believe the law is better observed by sixty per cent.

Answer to Question 5.—In standing and personal qualifications of tavern licensees, etc., in the towns, I would conclude there is an improvement of fifty per cent. In one of the municipalities there are sixteen licensed taverns and one shop, about one half of the licensees of which are very well personally qualified so far as their standing and respectability are concerned, but there is not a legitimate demand in public or travelling accommodation for more than eight houses, and the facts are, that several of the others have reduced themselves to what may be truthfully termed drinking grog-shops. In the other five municipalities their licensees endeavour to conduct themselves creditably. On the whole I believe that, comparing the new with the old law, on this head, there will be a gain of fifty per cent.

Answer to Question 6.—Public opinion outside of the Licensed Victualler's Association, is with but few exceptions, decidedly in favour of the new law, more especially in respect to the early closing features.

Answer to Question 7.—I believe that liquor drinking has been decreasing steadily under the administration of the new law during the hard times and scarcity of money, but since the times have improved and money become more plentiful, within the last few months, evidently drinking seems to be increasing. The treating at the bar, I observe, is now limited more especially to the rougher and lower classes of society, and hotel-keepers, where they have capacity, have fitted up small apartments within their premises, to accommodate from two to six persons, where the more respectable resort and transact business, and call for drink or whatever else they require. We have a very troublesome element in those who are most unfortunately addicted to the habit of drinking liquor to excess, to the injury of themselves and the starvation of their families. I have had to give a great amount of attention to this class, as, in connection with section ninety of the Liquor License Act, I am authorized, by clause six of the Commissioners' by-laws, to notify all licensees not to deliver liquor to such parties, and have delivered over three hundred of such notices; but as the law stands we can only punish the license holders alone, and I think it ought to be made criminal for any person whatever to give such a person liquor, and criminal for such a party to drink, except by medical prescription.

Answer to Question 8.—I believe that the restrictions in the closing early on Saturday night as well as on Sunday, is distasteful to nearly all liquor licensees, and is becoming to be more and more systematically resisted by them, not openly, but secretly, as they have learned to know the class of customers they can trust with a drink during prohibited hours. If the law is to be made a success, more vigorous enforcement must be executed, and to secure this, the Inspector requires the assistance of secret detectives, under proper regulations. The respectable and progressive element in our communities are well satisfied with all the restrictions embraced in the Crook's Act. Total abstainers and a large portion of our religious associations are in favour of the law being strictly enforced, with rigorous amendments towards increased restrictions. I believe the law is giving general satisfaction, and what is needed is to make its conditions thoroughly obligatory, with gradually increased legislation towards prohibition of the traffic.

EAST LAMBTON.

Answer to Question 1.—From my own experience and the experience of others whose opinions I have heard expressed on this subject, I believe I am correct in saying there is not more than one-tenth of the number so engaged that there was before the year 1876.

Answer to Question 2.—The difference in the quality of tavern accommodation is more marked and noticeable than perhaps any other change that could be mentioned. There appears to be rivalry going on between tavern-keepers as to who will have the most and best accommodation, and in consequence the houses are larger, better and more convenient, with better appliances throughout. Improvement is very noticeable also in the barns and stables.

Answer to Question 3.—In this License District I find the hotel-keepers, as a rule, inclined to observe the law, the Commissioners having made it a rule to refuse to grant license a second time to any one who shewed a disposition to violate or evade it. The effect of that rule has been most beneficial. Under former Acts there appeared to be no law to observe, in this District at least, the most flagrant violations being allowed to pass with perfect impunity. The superiority of the new Law over the old is very noticeable in this respect.

Answer to Question 4.—What has been said with regard to hotel-keepers (No. 3) may be said of the shop-keepers also. Their being fully aware that the continuance of their business depends upon their observance of the law in all its parts, has the effect of making them very cautious with regard to violations. Under former Acts there was no restraint whatever, and although the Law was violated daily, convictions were unheard of.

Answer to Question 5.—In this respect there is a great improvement under the new Act. The limitation of the number of hotels (thereby cutting off all the disreputable houses which are usually kept by the most inferior men), the preference for the best houses, and those that are best conducted, and the refusal to grant licenses to those who disregard the law, have had the effect of raising the standing of hotel-keepers far above what it was under any former Act, and the change becomes more apparent every year under the new law.

Answer to Question 6.—Public opinion is most decidedly in favour of the new law. The absence of riotous and disorderly conduct, compared with what used to be, the improved appearance of the hotels, the respectability of the hotel-keepers, and the quiet and orderly manner in which everything is done, is such a vast improvement on what formerly existed, that many people express surprise that such a change could be brought about in such a short time.

Answer to Question 7.—The drinking habits of the people have improved considerably, although it is still very prevalent. Hotel-keepers, however, tell me they do not sell nearly so much liquor at the bar as they formerly did, and as this complaint is general, I take it for granted that it is true. With regard to the drinking habits of the people otherwise than at bars, it is not so easy to make a comparison. My own impression is, however, that there is quite as much as ever used in this way. Some, on the contrary, assert that such is not the case, and an intelligent liquor dealer of long experience, lately told me that less is sold at present in this way than formerly.

Answer to Question 8.—During the license year 1876-7 there was a great deal of dissatisfaction with the new Act, coming of course from those whose interests were affected by it, and they had a great many sympathizers too; but a firm and judicious enforcement of the Act soon produced results which convinced the majority of the people that it was a success, and opposition to it gradually died out. During the following year its enforcement was comparatively easy, and each succeeding year finds it working more smoothly and in more favour with the people, until at the present time it is perhaps as free from adverse criticism as any law of the kind ever will be.

HAMILTON.

Answer to Question 1.—Five years ago the illicit sale of intoxicating liquors was openly practiced by not less than forty persons in various parts of the city. A number of these were prosecuted and fined and their business broken up; others have occasionally commenced selling until detected and fined. There are still a few places where liquor is sold without license, but such sales are confined to hours when the taverns are closed, and the number of such places will not exceed ten.

Answer to Question 2.—The tavern accommodation is considerably improved, and there is room for further improvement.

Answer to Question 3.—A noted improvement in the observance of law and order has taken place within the past four years in licensed hotels, the holders of such licenses being aware that a want of observance in this matter will be sufficient grounds for the Commissioners to refuse them a renewal of their license.

Answer to Question 4.—Under former Acts a license was taken out by shop-keepers having in view the benefits to be derived from the sale of liquor by the glass, and this practice was openly followed by most of the respectable dealers. Such sales now are of very rare occurrence, and are confined to a few shops on the outskirts of the city, and known as corner groceries. There are some, however, who occasionally sell in less quantity than is permitted by law, and I fear that this practice will not be wholly abolished while shop licenses are issued for the sale of liquors with other goods. An amendment to the law in this direction would meet the approval, not only of the public, but of the great majority of the shop-keepers themselves, many of whom are unable to make sufficient profit to cover the cost of their licenses without resorting to a breach of the law,

Answer to Question 5.—The standing and qualifications of tavern-keepers are very much improved, and it is only some of those who have lately entered the business with whom any difficulty is experienced in compelling the observance of the law, and otherwise to keep proper houses. A few months are generally sufficient for this purpose, and if they fail to be taught, a renewal of the license is withheld.

Answer to Question 6.—Nothing but expressions of satisfaction are heard when a comparison is made as to the results produced by the present law, compared with that which existed five or six years ago.

Answer to Question 7.—Under former Acts it was quite customary for tavern-keepers to encourage tipplers to remain in the bar-room for the purpose of being treated by customers of the house. Such cases now are of very rare occurrence, the practice being prohibited by the Commissioners' regulations. The drinking habits of the people are also diminishing, houses are more orderly, and are better kept in every way, which, doubtless, is due to the enforcement of the present law.

Answer to Question 8.—In comparing the present working of the Act with the three previous years, there is a gradual and perceptible improvement, both in the character of the persons licensed and the houses kept by them. There is also yearly a decrease of the places where liquor is reputed to be sold without license, and a slight decrease in the number of arrests for drunkenness, notwithstanding an increase of about twelve per cent. in population. These results evidently show that the effects produced by the enforcement of the law are satisfactory.

KINGSTON.

Answer to Question 1.—While it is extremely difficult to determine the number of persons engaged in illicit traffic at any time, the opinion of close observers is that but little of that kind of business is done in the city at the present time, and bears no comparison whatever to the extent of it under former Acts. Licensed people complain about it at times, in a general way; but as they decline to produce any evidence for fear of being considered informers (as they assert), of course very little notice can reasonably be taken of such complaints, particularly when the names of the offenders and their frequenters are withheld, and there be no known means of ascertaining them.

Answer to Question 2.—The quality of tavern accommodation is good as a whole, and up to the requirements of the Act, and compares as far as I can learn, very favourably indeed with that under former Acts, the table and bedroom accommodation being much better.

Answer to Question 3.—The law, so far as my experience goes, is fairly observed by licensed hotel-keepers, and the order, I believe, is unquestioned, no disturbance worthy of the name having occurred during my term of office. That could not be said of the state of affairs during the old *regime*, particularly on Saturday nights, which were given up to debauchery, from the fact that the working classes were then as now, generally speaking, paid for their services on that night. As the bulk of the week's wages was then in their pockets and they had unrestricted access to the drinking houses to a late hour, the result can readily be imagined.

Answer to Question 4.—I am unable to make a comparison of the observance of law and order by the licensed shop-keepers as compared with those doing business in former years. The present holders of licenses are certainly a very orderly and creditable class of citizens, but I am afraid they infringe upon the liquor law to a great extent. They are enabled to do this under cover of the grocery part of their business, and it is very difficult to detect them, for the reason that they are seldom complained of in a direct way, and of course they are not foolish enough to be found guilty when an Inspector is on the spot. If I may be allowed to venture an opinion, I would suggest that it would be well to make this entirely separate from the grocery business and confine it to itself, and compel the proprietors thereof to close their places at an early hour—say five o'clock—on Saturday evenings, and thereby prevent parties from getting their bottles filled when on their way homewards from work, thus preventing drunkenness on Saturday nights and Sundays. This cannot effectually be done now, as the shops are open till a late hour, and it is only occasionally that grocers can be caught offending.

Answer to Question 5.—On the whole, the standing and personal qualifications of licensees of taverns are better than were those under the old laws.

Answer to Question 6.—Public opinion regarding the change from the old to the new law is decidedly in favour of the latter, and has been brought about mainly through the beneficial effects of early closing on Saturday night.

Answer to Question 7.—The drinking habits of the people have become considerably curtailed, chiefly through the closing of the public houses at seven o'clock just referred to, though I fear the presence of billiard-tables in connection with some of these places will prove to be the means of making drunkards of many young men in cities and towns. The custom of treating at bars, I learn, is much the same as that adopted in former years.

Answer to Question 8.—[See two next pages.]

Answer to Question 8.—The following is a general comparison of the working of the License Act for the years named.

REVENUE.

1876-7.

EXPENDITURE.

LICENSES.	No. Issued.	Fee.	Total.				
Tavern	52	\$175	\$9,100 00	<i>City's Proportion</i> :— July 19, 1876	\$8,924 07	\$10,007 72	
Shop	24	150	3,600 00		1,083 65		
Wholesale	3	150	450 00		\$2,387 03		
Brewers	3	150	450 00		554 43		
Vessel	5	100	500 00		2,941 35		
Fines			440 00				
One tavern license for short period			25 00				
			\$14,565 00				
							\$12,949 07
							1,165 93
							450 00
							\$14,565 00

1877-8.

Tavern	61	150	\$9,150 00	<i>City's Proportion</i> :— August 5, 1877	\$8,407 52	\$9,137 02	
Shop	21	125	2,625 00		729 50		
Wholesale	3	150	450 00		\$2,453 76		
Brewers	3	150	450 00		327 26		
Vessel	8	100	800 00		2,781 02		
Fines			815 00				
Balance from 1876-7			450 00				
			\$14,744 00				
							\$11,918 04
							2,825 96
							\$14,744 00

1878-9.

Tavern	61	150	\$9,150 00	<i>City's Proportion</i> :— August 19, 1878	\$8,300 00	\$8,846 98	
Shop	21	125	2,625 00		546 98		
Wholesale	3	150	450 00		\$3,200 00		
Brewers	3	150	450 00		235 79		
Vessel	8	100	800 00		3,435 99		
Fines			120 00				
Balance from 1876-7			120 00				
			\$13,145 00				
							\$12,282 97
							862 03
							\$13,145 00

Answer to Question 8.—Continued.
1879-80.

LICENSES.	No. Issued.	Fee.	Total.	City's Proportion:—	
				August 4, 1879	May 29, 1880
Tavern	62	150	\$9,300 00	\$8,300 00	\$8,856 23
Shop	20	125	2,500 00		
Vessel	8	100	800 00	\$3,200 00	
Wholesale	3	150	450 00	228 12	3,428 12
Fines			250 00		
			\$13,300 00		\$12,284 35
					1,015 65
					\$13,300 00

1880-81.

	No. Issued.	Fee.	Total.	City's Proportion:—	
				June 29, 1880	Inspector's salary, etc.
Tavern	62	150	\$9,300 00		\$8,104 17
Shop	19	125	2,375 00		
Wholesale	3	150	450 00		3,158 33
Vessel	8	100	800 00		
Fines, thus far			180 00		
			\$13,105 00		\$11,262 50
					558 60
					1,283 90
					\$13,105 00

The City's revenue from shops and taverns (with a larger number of the latter than now), for 1871 and four following years, was as follows:—

Year.	Taverns.		Shops.		Total.
	Taverns.	Shops.	Taverns.	Shops.	
1871	\$4,354 00	\$1,350 00	\$5,704 00	\$1,575 00	\$7,122 00
1872	6,160 00	1,000 00	7,160 00	5,490 00	1,350 00
1873	5,355 00	1,536 25	6,911 25		6,840 00

OTTAWA.

Answer to Question 1.—I have reason to believe that the number of illicit dealers in liquor under the old law was many more than since the new law came into force, from the fact that after coming first into office I had to deal with this kind of infraction far more frequently than since, and it is now of rare occurrence.

Answer to Question 2.—I am not aware of the quality of the tavern accommodation required under former Acts, but on my first visits I found many places not up to the requirements of the new law in the matter of bed-room accommodation, and in not having all the requisites necessary to constitute good and sufficient eating-houses, conditions now scrupulously exacted before a license is given.

Answer to Question 3.—There is evidently a very great dread on the part of hotel-keepers of breaking the law in any respect now, much more so than I ever saw before the present law came into force.

Answer to Question 4.—The same reply as above may be given in regard to licensed shop-keepers, most of whom, under the old system, had no hesitation in selling liquor by the glass.

Answer to Question 5.—The personal qualifications of the holders of tavern licenses under the old law, as far as I can learn, were generally good, and I believe, with few exceptions, the license holders then were of equal standing with those of the present time. Tavern-keepers here, as a rule, only desire that all should be equally dealt with in the enforcement of the law, and it is claimed by them that such was not the case under the old system, a circumstance which led to many violations that do not occur now. This is doubtless owing to the facilities for enforcing the law being greater now than they were then.

Answer to Question 6.—Public opinion seems to be largely in favour of the change from the old to the new law, although there are some who think the City Corporation representatives should have the patronage.

Answer to Question 7.—The custom of treating at the bars, I think, has much diminished of late years. As to the drinking habits of the people I can scarcely venture an opinion further than to remark that drunkenness seems to be on the decrease, and that few, other than the perpetual offender, trouble the police court now for drunkenness; a circumstance which would, in my opinion, favour the impression that the working classes at least, are much improved in that regard, compared with former years.

Answer to Question 8.—As far as I am concerned, I have not found any wide difference between the present working of the License Act and the four previous years, it having worked almost equally well from its inception; the only difference being, that before the late amendments, namely, in the years 1876-7 and 1877-8, I found *some* more difficulty in obtaining convictions. This I attribute partly to inexperience, as well as to the little defects in the law then existing. Since the year 1878-9, and more particularly during the present license year, the working of the Act has, to a great extent, been very successful in producing the most beneficial results.

NORTH LEEDS AND GRENVILLE.

Answer to Question 1.—The following statement shows the number of persons convicted for illicit traffic in intoxicating liquors, as per my quarterly returns, for the license years 1876-7, 1877-8, 1878-9, 1879-80, respectively :—

	<i>Licensed.</i>	<i>Shop.</i>	<i>Unlicensed.</i>
1876-7...	1	4
1877-8...	1	2	2
1878-9...	4	5	
1879-80..	2	3	4

but what comparison each bears to previous years, under former Acts, I have no data or returns to show.

Answer to Question 2.—The tavern accommodation has materially improved, and the interior arrangements are better in every respect; the stables and outbuildings kept cleaner than formerly, and the landlords willing at all times to carry out any reasonable suggestion I make that tends to improvement.

Answer to Question 3.—The licensed tavern-keepers observe more order, cleanliness and civility, in their respective premises, than they formerly did. Though the observance of the law by this class of license-holders is very creditable, and the time restricted each week for the non-sale or issue of liquors of short duration, I fear the large amount of license fees exacted by some municipalities in excess of the statutory duty is felt to be so onerous, together with the high price of liquors, owing to the excise laws, as to tempt the license-holder to occasionally infringe the law, as well as adulterate the quality of the liquors. With respect to the increased cost of license fees, that adds nothing to the government revenue, and is exacted only for municipal purposes. I think it would be a great improvement if the power conferred by the Act upon municipal bodies to increase the license rate were entirely removed, and let the municipal revenue be acquired *pro rata* from all the rate-payers, instead of imposing a large proportion upon a limited number of individuals. I am of opinion it would thereby give the law more respect and lessen, if not entirely remove, the temptation to the landlord to act illegally or practice adulteration.

Answer to Question 4.—The improvement with this class of license-holders, is not so marked as with the licensed tavern-keeper. As the liquor Act permits an unlimited issue of shop licenses, without reference to population as is the case with tavern licenses, a greater competition exists, and disposes the license holder to infringe the law. 'Tis true the municipal council may limit the issue, but as they look upon this as a means of increasing their revenue, they never act upon it. I consider the unlimited issue of shop licenses a great evil, and one that is much complained of. A limitation of the number of these licenses by the Legislature would be most desirable. My remarks under "Answer to Question 3," about increased rates by municipalities, are also applicable to licensed shop-keepers.

Answer to Question 5.—I cannot say the improvement is very great, still there has been no retrogression, and not until there is a greater stimulus given to trade in this District and the travelling community demand it, will there be any considerable change.

Answer to Question 6.—Public opinion is decidedly in favour of the present law, and the improvement so manifest, that all with whom I have conversed are much pleased with the change.

Answer to Question 7.—The diminution of these habits is most conspicuous, from whatever cause it arises. I am pleased to say there is a marked change, and whilst the strict supervision under the Act restrains rioting and drunkenness, the temperance party here have been most sedulous in their endeavours to point out the advantages of the Act, the pernicious habit of treating, and materially improving the morality of the community.

Answer to Question 8.—This is generally set forth in my answer to the previous questions. The present working of the Act is more in harmony with the views of the people than it was on its first inception in 1876-7—it is better understood. The license holders have more confidence in the benefits to be derived from and the protection afforded them by the Act. They no longer look upon the inspection and supervision with the distrust exhibited at first, and are willing to afford me all the aid they can in ferreting out and suppressing illicit traffic. They perceive their own interests are better guarded, and the continuance of their licenses, from year to year, less likely to be jeopardized than under the old system. Previous to the operation of the present Act, the issue of licenses was almost unlimited, and therefore when the Act came into force, limiting the number, much dissatisfaction arose. Those applicants for licenses who were unsuccessful were loud and clamorous in their denunciation of such

a limitation, but have gradually become merged in other employments, and vanished from our midst. And most beneficent it was, for many of the then license-holders were occupants only of saloons and grogeries, which were most injurious (particularly to the rising generation), and the general public were only too well pleased that those dens of vice should be swept altogether from our town. I am of opinion the present Act will grow yearly more in favour, amended, as no doubt it will be by the Legislature, according to suggestions made from time to time by the officers entrusted with its supervision.

EAST MIDDLESEX.

Answer to Question 1.—Under former Acts very many were engaged in illicit traffic in intoxicating liquors, and seldom if ever to my knowledge, were any fined for so doing. Under the present Act there is but one that I have any suspicion of, and he was lately fined.

Answer to Question 2.—As to the tavern accommodation, I can safely say, it is far in advance of what it was under previous Acts.

Answer to Question 3.—In reference to law and order there is very great improvement, particularly on Saturday nights and Sundays.

Answer to Question 4.—In reference to licensed shop-keepers, there is considerable improvement, but public opinion is against any license being granted to shops, but that wholesale licenses be granted instead.

Answer to Question 5.—The standing of persons holding licenses is about the same, but of course they endeavour to a greater extent to comply with the law, through fear of being deprived of their licenses.

Answer to Question 6.—Public opinion is much in favour of the new law. As proof of this no petition has been presented or circulated to change it back to the old. There are a good many of the opinion that the hour for closing on Saturday night (particularly in rural districts) should be extended to say nine o'clock.

Answer to Question 7.—As to the drinking habits, and custom of treating, there is but little change. The amount of liquor consumed, comparing it with the increase of population would be the best guide. I think I may safely say that since the introduction of lager beer, which is now fast becoming the principal drink, (particularly during the summer season) less drunkenness is noticeable.

Answer to Question 8.—In answer to this question, I can say there is a gradual improvement. The license-holders are working more in accordance with the law.

WEST LAMBTON.

Answer to Question 1.—I do not think there is a single person in our Riding engaged in selling liquor without license at the present time, and I am of opinion that there has been considerable improvement in this direction under the present Act.

Answer to Question 2.—There is a decided improvement on the whole in the accommodation furnished by hotels at present, compared with that of four or five years ago. Whether the change in the Act is the cause of the improvement or not, I cannot say.

Answer to Question 3.—There is certainly an improvement here as regards the open sale of intoxicants, still the law is undoubtedly violated very considerably by hotel-keepers during prohibited hours, in such a way as almost to defy detection, as they have their bar-rooms so arranged between other rooms, with so many ways of ingress and egress, and being under lock and key, they are in a measure unapproachable, still a large class are much better conducted than under former Acts, as most hotel-keepers

avoid selling to the *common* people, as they fear results. I realize very frequently the disadvantage under which Inspectors labour, by hotel-keepers being allowed to supply liquor to guests or lodgers. This clause is often taken advantage of, and they have a great number too many guests and lodgers. To my mind, this clause requires amending, so that no liquors can be furnished in any part of the hotel except under a doctor's certificate; and further, bar-rooms should be so situated and windows uncovered that it might be readily seen at any time what is going on within during prohibited hours.

Answer to Question 4.—I believe there is much improvement here, especially in the towns, still there is a great deal too much treating of customers in such a way as to avoid detection. To my mind groceries and liquors should not be sold upon the same premises.

Answer to Question 5.—There is also an improvement here. Several of the most flagrant violators of law who were in the business at the time of the passing of this Act, have removed from the county, and their places have been filled by more orderly and law-abiding men.

Answer to Question 6.—There are various opinions. Some think it would be better in the hands of the municipalities; the great majority, however, I feel certain, consider the change a decided improvement.

Answer to Question 7.—I think, from year to year, these habits and customs are losing caste. Men of respectability seem ashamed to openly enter bar-rooms and treat, or be treated, or have it known that they are habitual drinkers; but whether the improvement arises out of the change in the law or not, is questionable.

Answer to Question 8.—To my mind there is nothing of an important nature to be answered in this, except what is covered under former heads, especially "Answer to Question 5."

NORTH ESSEX.

Answer to Question 1.—There can be no doubt that the illicit traffic in liquors assumes but trifling dimensions under the new law, in comparison with the number so engaged under the old law, under which a conviction rarely occurred, although the illicit traffic was most flagrant. In the license year 1876-7 there were eleven convictions for selling without license; in 1877-8 there were nine; in 1878-9, none; in 1879-80 there were seven; this present year 1880-1, none; shewing that the illicit traffic is, under the new law, being wiped out.

Answer to Question 2.—The quality of tavern accommodation, as compared with that under former Acts, is greatly improved. On my first tour of inspection I found many houses in which I would hesitate to eat or sleep. Now, without any exception, fair accommodation may be had

Answer to Question 3.—The observance of law and order by licensed hotel-keepers, compared with former Acts, is certainly much better, also the conduct of those frequenting hotels.

Answer to Question 4.—Our shop-keepers are, generally speaking, respectable, law-abiding men—none but such are licensed. Under the former Acts many disreputable persons were licensed.

Answer to Question 5.—As regards the standing and personal qualifications of the holders of tavern licences, as compared with the same under former Acts, there is an improvement, though not so great as in some other respects, as most of those now in the business have been so for a number of years, most of them previous to the passing of the last Act. Where changes have taken place, it has been almost invariably for the better.

Answer to Question 6.—In regard to public opinion regarding the changes from the old to the new law, I believe the change is very generally esteemed as for the better; I have heard but little fault found.

Answer to Question 7.—In regard to the drinking habits of the people and the custom of treating at the bars, compared with former years, I cannot say that any improvement has taken place. The fashion or custom of treating prevails to a fearful extent at present, and it appears to me to be the very stronghold of intemperance, and in my opinion, no remedy for this evil is to be found in legislation. Legislation can and does prevent those who use intoxicating liquors from becoming an annoyance to those who do not, but society alone can stamp treating as an evil, by refusing to approve of it.

Answer to Question 8.—In making a general comparison of the working of the Act, this year with former years, during which it has been in force, nothing in my experience has occurred to make any particular contrast, except in regard to section forty-three. The permission therein granted to *lodgers* to drink liquor upon licensed premises during prohibited hours, has been productive of evil, and rendered it much more difficult to enforce the law. I can see no reason why lodgers should be made an exception in this respect, and believe that the expunging of that word from the section would do away with a great deal of drunkenness. In conclusion, I would say that each year the Act appears to be growing in public favour, and is made more and more effectual in doing away with the illicit traffic in liquor.

ELGIN.

Answer to Question 1.—I do not think the number of persons engaged in illicit traffic in intoxicating liquors is one-half as great at present as it was under former Acts.

Answer to Question 2.—The quality of tavern accommodation is far superior to that existing under former Acts.

Answer to Question 3.—There is a much better observance of law and order by licensed hotel-keepers than under former Acts.

Answer to Question 4.—A very marked improvement has been manifested in the observance of law and order by licensed shop-keepers under the new Act, and the shops are kept much better and cleaner in every respect.

Answer to Question 5.—The class of persons engaged in the traffic as holders of tavern-licenses has become greatly superior, both in point of standing and qualifications, to those licensed under former Acts, as many low grogeries have been swept away, and the more disreputable class of tavern-keepers superseded through the restrictions placed upon the traffic under the new Act. St. Thomas alone had twenty-six licensed taverns under the former Act, but in the first year under the operation of the new Act, this number was reduced to thirteen.

Answer to Question 6.—Public opinion at first was very strongly opposed to the new Act, but a complete reaction has taken place, and the general opinion is now decidedly in its favour.

Answer to Question 7.—I do not think there is any perceptible difference to be observed in the drinking habits of the people, and the custom of treating at bars appears to prevail fully as much at present as under former Acts.

Answer to Question 8.—With regard to the working of the License Act during the several years, I may state that the number of convictions for infraction of the liquor law was in these years respectively as follows: In 1876-7, thirty-eight; in 1877-8, seventeen; in 1878-9, thirteen; and in 1879-80, six.

NORTH OXFORD.

Answer to Question 1.—As prior to the establishment of the present system I had no opportunity of estimating the number of persons engaged in the illicit traffic referred to, I am unable to make any comparison from my own knowledge of such sufficient exactness as you might think desirable, but so far as I may judge from public opinion, as expressed in this neighbourhood, I have no hesitation in saying that this illicit traffic is much less than formerly; that since the introduction of the present system, illicit traffic has very much decreased, and the hope may be entertained that it will almost wholly die out.

Answer to Question 2.—Tavern accommodation is better than it was four years ago, and there has been a constant improvement during those four years.

Answer to Question 3.—During the last four years the observance of law and order by licensed hotel-keepers is decidedly improved.

Answer to Question 4.—As to licensed shop-keepers I may give an answer similar to last.

Answer to Question 5.—There has been a considerable improvement during the last four years.

Answer to Question 6.—Public opinion is in favour of the new law.

Answer to Question 7.—Inebriety is becoming more and more rare, and there is less treating at bars.

Answer to Question 8.—Under the present law there has been a constant improvement, which was most noticeable during the second year of its working, as it required about a year and a half to weed out places of illicit traffic. During last and the present year the improvement has been constant, and I believe, has been occasioned as well by the authorities, whose duty it is to see the law carried into effect and observed, as also by the people, who are becoming better acquainted with its working and who generally desire to see it operative.

NORTH RENFREW.

Answer to Question 1.—The number is not anything like so large as under the old Acts, except in that part of the county where the western extension of the Canada Central Railway is being built. A great deal of illicit traffic, I have reason to believe, prevails there, owing principally to the kind of population which necessarily is engaged as employees in the building of such works.

Answer to Question 2.—There has been a very marked improvement in hotel accommodations, furnishings, etc., since the enactment of the present law.

Answer to Question 3.—Both law and order are well observed by the hotel-keepers in this License District, which was not so under the old Acts.

Answer to Question 4.—Both law and order are much better observed by shop-keepers in this District than under the old Acts, except in that section of the county where the Canada Central Railway is being built. There, I have reason to believe, a good many breaches of the law are almost daily taking place. I have had some of the parties fined, but it is next to impossible, under the peculiar circumstances of the case, to procure the necessary evidence to have all the offenders punished as the law provides.

Answer to Question 5.—There is not much difference in this respect. The tavern-keepers in this section of the county have always been as respectable men, of their class, as could be found anywhere. The difference though, if any, is certainly in favour of the men engaged in the traffic under the present law.

Answer to Question 6.—It is somewhat divided, but the great majority of the respectable portion of the community give a very decided preference to the new law.

Answer to Question 7.—The treating at the bar is still, to too large an extent, continued, but this very reprehensible practice, as well as the general drinking habits of the people, is very much on the decrease, compared with former years.

Answer to Question 8.—There was a good deal of prejudice existing in this section of country against some of the provisions of the License Act of 1876 and those thereby amended, which had not a little to do in preventing the efficient working of the law, but that prejudice is nearly all dispelled, and the public generally are now convinced that the law, as it now stands, is about the only practical provision which the Legislature can make for the controlling and regulating of the liquor traffic; and this change in public opinion is, I think, the principal reason why less difficulty is experienced in this District in working the law now, than there was for any of the past three years.

HALTON.

Answer to Question 1.—In regard to the number of persons engaged in illicit traffic in intoxicating liquors, there has been a great reduction, as there are only two places in this county where the illicit traffic is carried on. Formerly there used to be a great number of places in this county.

Answer to Question 2.—A great improvement has been made as regards the quality of tavern accommodation, as compared with former Acts.

Answer to Question 3.—The observance of law and order has greatly improved among tavern-keepers.

Answer to Question 4.—As regards shop-keepers, there has been but one application for a shop license in the whole county. Under former Acts there used to be from twenty to twenty-two engaged in the traffic as shop-keepers—now only one.

Answer to Question 5.—The standing and personal qualifications of the hotel-keepers has greatly improved under the present License Act, as compared with former Acts.

Answer to Question 6.—Public opinion is generally in favour of the present Act.

Answer to Question 7.—The drinking habits of the people have greatly decreased under the present Act, as compared with former Acts. Now it is a very rare thing to see persons intoxicated. There is not so much spirituous liquor used now as in former years. Lager-beer and light wines are taking its place. Prior to the present License Act coming into force, there used to be from eighty to eighty-four persons engaged in the traffic—now from forty to forty-three—making a reduction of about forty under the present Act.

Answer to Question 8.—In 1876-7 there were forty persons engaged in the traffic to whom licenses were granted. Two of those were fined for selling after prohibited hours, and eight persons were fined for selling without having a license.

In 1877-8 there were thirty-eight licenses granted, and three persons fined for selling without having a license.

In 1878-9 there were forty licenses granted, and four persons fined for selling without having a license.

In 1879-80 there were forty-one licenses granted, and two of those were fined for selling after prohibited hours; two persons were fined for selling without having a license.

NORTH GREY.

Answer to Question 1.—The number of persons engaged in illicit traffic in intoxicating liquors, as compared with the number so engaged under former Acts, is not more than one-half.

Answer to Question 2.—The quality of tavern accommodation, as compared with that under former Acts, is better.

Answer to Question 3.—The observance of law and order by licensed hotel-keepers, compared with former Acts, is better.

Answer to Question 4.—The observance of law and order by licensed shop-keepers, compared with former Acts, is the same as No 3.

Answer to Question 5.—The standing and personal qualifications of holders of tavern licenses, as compared with the same under former Acts, are gradually improving.

Answer to Question 6.—Public opinion regarding the change from the old to the new law, is in favour of the new law.

Answer to Question 7.—The drinking habits of the people, and the custom of treating at the bar, compared with former years, is changing for the better, as there is not so much liquor drank in the county as formerly.

Answer to Question 8.—It is difficult to make a general comparison of the present working of the License Act with that during the license years 1876-7, 1877-8, 1878-9 and 1879-80, as we lost so much ground during the time the Dunkin Act was in force, that we are only now regaining what we lost. The Act is working well at present.

SOUTH LANARK.

Answer to Question 1.—I know of no person engaged in illicit traffic in intoxicating liquors in the South Riding of Lanark at present. The number so engaged under former Acts as far as I know was thirteen. They have been promptly looked after, and have now disappeared.

Answer to Question 2.—The quality of accommodation has been decidedly improved, as the poorer class of taverns have been weeded out, and in granting licenses, the character of the houses has always been taken into consideration.

Answer to Question 3.—The law has been better observed. The licenses, from the decreased numbers, have been more valuable, and holders have been more careful not to violate the law, as that would interfere with the renewal of their licenses.

Answer to Question 4.—At first there were some violations of law on the part of shop-keepers, who were tempted to sell by the glass in towns and villages, in consequence of the cutting off of some of the old tavern-licenses. These violations were generally promptly discovered and punished, and lately have been few.

Answer to Question 5.—There has been decided improvement. The best men have generally got the licenses, and it is to their advantage to maintain a good character.

Answer to Question 6.—Public opinion is, as far as I know, in favour of the present law.

Answer to Question 7.—The drinking habits of the people, and the custom of treating at the bars, remain unchanged.

Answer to Question 8.—The present License Act gives general satisfaction through the whole District. It is considered by a large majority of the people as the best license

Act that has ever been in force in the county. A gradual reduction of the number of licenses issued has been made under the new law during the past four years, as will be seen from the subjoining figures :—

1876-7.

Number of applications for licenses.....	43
“ “ “ granted.....	28
“ “ “ refused.....	15

1877-8.

Number of applications for licenses.....	32
“ “ “ granted.....	27
“ “ “ refused.....	5

1878-9.

Number of applications for licenses.....	22
“ “ “ granted.....	20
“ “ “ refused.....	2

1879-80.

Number of applications for licenses.....	22
“ “ “ granted.....	20
“ “ “ refused.....	2

EAST HASTINGS.

Answer to Question 1.—The number of persons engaged in illicit traffic in intoxicating liquors the last year of the old law, in the License District of East Hastings, as near as I have been able to ascertain, was about twelve. For the last and present year the number does not exceed four. In fact, I might say there are none, for as soon as they start they are stamped out. The number is gradually becoming less, and is, no doubt, due to the working of the new License Acts passed since 1876.

Answer to Question 2.—The present tavern accommodation, as compared with that under the former Act, has been materially improved. Every tavern licensed in this District for the current year has the full accommodation required by statute or municipal by-laws, and in very many of the taverns the accommodations are largely in excess of such requirements.

Answer to Question 3.—The observance of law and order by tavern-keepers, under the present law, is decidedly better and much more general than under the former Acts, particularly as to the hour of closing on Saturday night, the observance of the Sabbath, and the allowing of gambling.

Answer to Question 4.—There has not been a single case of the breach of law and order by a licensed shop-keeper in this District during the last two years. The working of the new Acts, as compared with the old in this respect, has been a decided success.

Answer to Question 5.—The number of taverns has considerably decreased, while the personal standing and qualifications of the keepers licensed, has very much improved.

Answer to Question 6.—The public have become fully acquainted with the working of the new law, and have very generally accepted it as a decided improvement, as compared with the working of the old Acts, and would regard a return to the old system as very undesirable.

Answer to Question 7.—The drinking habits of the people in the rural districts have greatly decreased. The custom of treating at the bar has almost become a thing of the past. The bars have generally been removed to more private rooms, where what treating is done, is, as it were by stealth, which indicates that public opinion is against it. Guests may come and go without seeing or knowing that liquor is kept on the premises.

Answer to Question 8.—In answer to this question, I can only say, that there has been a gradual and permanent improvement in the working of the Liquor License Acts since 1876. The use of liquor in this country, by the rural population, is becoming less every year. Crime and other evils arising from excessive use of liquor is continually on the decrease. The almost total absence of convictions by county justices of the peace, plainly show this to be true. Excessive use of liquor appears to be almost entirely confined to cities and larger towns.

EAST NORTHUMBERLAND.

Answer to Question 1.—In my experience I consider that the number of persons engaged in illicit traffic is greatly reduced, and from my enforcing the law, and prosecuting for its infraction all parties that have come under my notice, I find that the number is still decreasing.

Answer to Question 2.—The quality of the tavern accommodations, as compared with the former Acts, in the License District, has greatly improved, and the hotel-keepers appear to take a pride in aiming to keep first-class houses.

Answer to Question 3.—The observance of law and order by the licensed hotel-keepers has been much increased in the district, from the reason that the License Commissioners, being an independent body, have invariably refused to grant licenses to parties who would not observe the law, and keep good and respectable hotels. Holders of licenses have been informed when the licenses were granted that if they infringed the law in any respect they would be prosecuted.

Answer to Question 4.—The observance of law and order by licensed shop-keepers has increased for the same reason as mentioned in answer No. 3.

Answer to Question 5.—With respect to the standing and personal qualifications of the holders of tavern-licenses, as compared with former Acts, they have, in my opinion, improved, for the reasons given in answer No. 3. The respectable hotel-keepers themselves are, in general, in favour of the present Act, because they are more independent, and if they keep good and respectable houses they know that they are more secure in having their licenses renewed, and have not to compete against low grogeries, which took away a great part of their custom.

Answer to Question 6.—Public opinion in this district is, I believe, generally in favour of the present law, although there are some aspirants for municipal honours who would like to have the patronage to assist them at their elections.

Answer to Question 7.—With respect to the drinking habits of the people, and the custom of treating at bars, as compared with former years, my experience is that there is not so much drinking amongst the people as formerly, as most of the hotel-keepers now will not allow any man to drink to excess in their houses, and I find it the exception rather than the rule to see a drunken man in our hotels and in the streets of our villages, as it was often the case formerly; and I also find a great improvement in the enforcement of the Saturday night and Sunday law, which has educated the hotel-keepers

themselves, who, finding the advantages of having a day's rest and a respectable name, many of them would not care to go back to the old state, and open their bars Saturday night and Sunday.

Answer to Question 8.—The Board of License Commissioners, on coming into office in 1876, reduced the number of places for selling spirituous liquors from thirty-nine to thirty-two, and it was with some difficulty that the law was carried out. In 1877-8 I found less trouble, and the law was better observed. In 1878-9 we had the Dunkin Act for ten months, and it proved to be a failure in many respects, and public opinion was opposed to it. In 1879-80 we issued licenses, and it was with some difficulty we got back to where we were previous to the Dunkin Act. I have had less trouble during the portion of the present year—1880—than I ever had, and the law has been better kept.

WEST WELLINGTON.

Answer to Question 1.—The number of persons engaged in illicit traffic in intoxicating liquors, as compared with the number so engaged under former Acts, is as follows: Under the present Act, four persons; under former liquor law, twelve or fourteen persons.

Answer to Question 2.—There is no comparison between the present tavern accommodation and that under the old law, as so many old taverns have been pulled down and good, substantial houses erected in their places, that now seven out of ten are first-class houses.

Answer to Question 3.—As none but men of good standing, character, and respectability have licenses granted them, the observance of law and order is an improvement of 100 per cent. in favour of the new law, as compared with the former Acts.

Answer to Question 4.—Under the present Act there is a decided improvement, but were the municipal councils to pass a by-law restricting the sale of liquor to houses in which no other business is carried on, the improvement would be far greater.

Answer to Question 5.—There is no comparison, as no men but those of good standing, respectability, and sobriety, have licenses granted to them; when under the old law any man who was able to pay his license fee was granted one, irrespective of character or respectability.

Answer to Question 6.—The public consider it a decided improvement on former Acts, and when the Dunkin Act was being agitated in this locality, "Crook's Act" was a text-book in the hands of the anti-Dunkins, shewing it to be such a perfect Act, if properly carried out, that no better Act was required.

Answer to Question 7.—There is a decided change for the better on this question; for instance, where you now find one man intoxicated, under the present Act, you might have seen ten, under the old liquor law (I speak as far as regards our own License District), and not so much treating at the bars as formerly.

Answer to Question 8.—There has been a decided improvement each year in the working of the present license Act, and a marked improvement on the Saturday evening seven o'clock closing; and a far stricter observance of the Sabbath day regulations than in the previous three years.

EAST YORK.

Answer to Question 1.—The number of persons engaged in illicit traffic in intoxicating liquors, as compared with the number engaged under former Acts, is much reduced, and those still engaged in it are confined to a small circle of their immediate friends, the respectable portion of the community generally avoiding such houses, as they consider it a disgrace to be brought up as witnesses against the offenders of the law.

Answer to Question 2.—Is considered much improved, more attention generally being given to the comfort of their customers.

Answer to Question 3.—I find that under the present Act licensed hotel-keepers generally obey the law by closing their bars punctually at the hour required by law, and keeping them closed until the lawful time for opening.

Answer to Question 4.—Is much improved, many of them strictly obeying the law, while some may try to evade it by selling in smaller quantities than the law allows, but do it in such a way that it is hard to detect them.

Answer to Question 5.—I am of opinion that the standing and personal qualifications of the holders of tavern-licenses, as compared with same under former Acts, is much improved by the selection of better men to whom licenses are granted, and who refuse to permit idlers to lounge about their bar-rooms, and who pay more attention to the comfort of travellers.

Answer to Question 6.—Public opinion in this Riding is strongly in favour of the present law.

Answer to Question 7.—The drinking habits of the people seem to be diminishing, and much less treating at the bars, the more respectable portion of the public ordering their drinks in the sitting-rooms instead of going to the bar.

Answer to Question 8.—In the year 1876-7 the Commissioners made a great reduction in the number of licenses granted during the previous years. This caused great dissatisfaction to those who were cut off, the result being that most of them went on to sell without license until detected and fined—some of them several times during the year. In the year 1877-8 there was about the same number of licenses granted. During this year the law seemed to be better understood, and was more fully complied with, and illicit traffic was considerably reduced. In the year 1878-9 we had the Dunkin Act in force, when illicit traffic in intoxicating liquors became general, the law itself giving general dissatisfaction, and was defeated by a large majority the same year. In the year 1879-80 about the same number of licenses were granted, but there was considerable trouble in putting a stop to the illicit traffic started under the Dunkin Act. During the present year things are getting into the old groove, and the Act is working more smoothly, and the people seem better pleased with the present law after trying the Dunkin Act.

SOUTH OXFORD.

Answer to Question 1.—Fully 50 per cent. less under present than former Acts. The only ones now supposed to be engaged in illicit traffic are about 40 per cent. of the places that were under license during former Acts, and were deprived of their licenses under present Acts, and a few of the drug stores that did a large business under former Acts.

Answer to Question 2.—In this there is a very marked improvement under the present Act, as compared with former Acts.

Answer to Question 3.—The law is very much better observed, and order maintained under the present Act than under former license Acts, particularly in towns and incorporated villages.

Answer to Question 4.—The improvement is still greater with this class than with the hotel-keeper, where the selling of liquor is separated from the sale of other goods, wares or merchandise.

Answer to Question 5.—An improvement of fully 40 per cent. under present Act over that of former Acts, as this is now considered the principal requisite.

Answer to Question 6.—Public opinion is very much in favour of the new license law.

Answer to Question 7.—The drinking habits much the same in hours not prohibited. The custom of treating the same as formerly, which is the greatest evil in practice.

Answer to Question 8.—The most noticeable improvement in the years heretofore named, is that of the second year, viz., 1877-8. The weeding out of many places in which illicit traffic was carried on under former Acts occupied the first year and a half under the present law. For the other and following years there is an improvement that is quite apparent, and about proportionate. And it is occasioned by the authorities who enforce the law and the public generally becoming better acquainted with its working.

PRESCOTT.

Answer to Question 1.—The number of persons engaged in illicit traffic in intoxicating liquors as compared with the number so engaged under former Acts have been reduced, as far as it is possible to ascertain, to at least one-half.

Answer to Question 2.—There is a marked improvement in the quality of tavern accommodation, and more attention is paid by the majority of hotel-keepers to the comforts of the travelling community.

Answer to Question 3.—There is a more strict compliance with the law by a better observance of the Sabbath, and in restraining drunkenness, resulting in a most favourable degree to the maintenance of peace and order.

Answer to Question 4.—There is no perceptible change in the observance of law and order by licensed shop-keepers.

Answer to Question 5.—The standing and qualifications of the holders of tavern licenses have decidedly improved.

Answer to Question 6.—The beneficial results of the present Act in diminishing intemperance, and in improving the habits of the people, give general satisfaction.

Answer to Question 7.—There is much less drinking, and the custom of treating at the bars is not as generally practised as in former years.

Answer to Question 8.—In making a general comparison, I find that there has been a continuous improvement in the present working of the License Act, and that the present year bears a very favourable comparison with the license years of 1876-7, 1877-8, 1878-9 and 1879-80.

SOUTH ESSEX.

Answer to Question 1.—That within the South Riding of Essex there are very few persons engaged in illicit traffic in those municipalities in which the License Act is in force, and less than formerly, except in the municipalities of Colchester, North and South, in which the Temperance Act of 1864 is in force.

Answer to Question 2.—That the quality of tavern accommodation has much improved, and in my opinion will continue to improve.

Answer to Question 3.—The observance of law and order is much better maintained.

Answer to Question 4.—The answer to the third will apply to this.

Answer to Question 5.—The standing and personal qualification of holders of tavern-licenses have greatly improved.

Answer to Question 6.—Public opinion is decidedly in favour of the new law.

Answer to Question 7.—The custom of treating at the bar has been declining for some time, and is gradually becoming less. Popular feeling is adverse to the practice.

Answer to Question 8.—The working of the License Act, as far as my own observation goes, has been steadily improving. I can only date from 1878-9, the time of my appointment to office.

EAST HURON.

Answer to Question 1.—At present there are none engaged in illicit traffic in this District. In the hotel business there has not been much illicit traffic, in this part of Ontario, it being confined principally to store-keepers or low groceries, and they could not be easily suppressed, from the fact that complainants were known to the public, as they received one-half of fine. Under the present law, the public look on the Inspector as only performing his duty when prosecuting offenders, and information is now more readily given, as the Act provides that the name of the complainant shall not be divulged.

Answer to Question 2.—Improved to a large extent.

Answer to Question 3.—Law and order is much better preserved, as hotel-keepers are afraid of being fined and having their license cut off. Gambling in bar-rooms is unknown, and public drinking after hours is not practised as in former years. Landlords, in general, try to get parties off before the hour of closing.

Answer to Question 4.—Law and order is far better observed by shop-keepers, as no liquor is allowed to be consumed on licensed premises, and, in general, there is nothing else sold in those shops but liquor. Under the old law, liquors were sold in connection with general store-keeping, and free drinks were allowed to customers and frequenters of such places; and this was the cause of three-fourths of the drunkenness, as a great many will drink to excess when the drink is free. Such a state of things is now unknown.

Answer to Question 5.—Much improved in respect of the temperate habits of landlords. In fact, some that were hard drinkers when this Act came into force, are now much improved, in order to keep their licenses. There is not one hard drinker holding a license at present in this District.

Answer to Question 6.—Public opinion is divided on this point; the orderly, and the largest part, say that the Act is an improvement on the former Acts. The other part of the public is divided, one in sympathy with hotels, and looks on the law as too stringent. The remainder of the public look upon the law with political jealousy, and very often make random charges against the officers in regard to the working of the said Act.

Answer to Question 7.—As to this answer, I will give the answer that every hotel-keeper gave me on this head. They say that people do not spend their money over the bar as in former years. But whether that is caused by the people becoming more temperate, or more unable to spend, is more than I can say.

Answer to Question 8.—Four years ago there were several causes that worked against the Act. First,—There were the vested rights, where parties were cut off and had to turn their property to some other business. Second,—The stringency of the measure. Third,—The fear that the provisions of the Act would be used to compel holders of licenses to become supporters of the present government. The Act has outlived most of these objections, and during the past two years its working has been most satisfactory to all parties.

WEST MIDDLESEX.

Answer to Question 1.—I am not aware, nor do I believe that there are any unlicensed vendors of liquors in this License District at present, while, under the old system, there were a number, it being a common thing on such occasions as July 1st; and 24th of May, for persons to engage in the traffic, without any hindrance, at most places of public demonstrations, all of which has been effectually put a stop to.

Answer to Question 2.—Greatly superior.

Answer to Question 3.—The law is more closely observed than ever before, so much so, that what would now be termed a flagrant outrage against propriety would, under the previous system, be unnoticed, so lax were the opinions then prevailing of what constituted observance of law, or hotel respectability.

Answer to Question 4.—Same answer as to No. 3.

Answer to Question 5.—The “bummer” element has been driven from the business by the present Act, and hotel-keepers, as a class, are most respectable.

Answer to Question 6.—The general public is satisfied that a great improvement has been made in hotel accommodation, and that the requirements are more efficiently met, and would be very averse to return to anything like the old system, as would most particularly our municipal representatives and officials.

Answer to Question 7.—There is a noticeable falling off in the habit of drinking and treating in bar-rooms. The number of hotels having been reduced in most villages, those now in the business are placed above the necessity of holding out inducements for the carousals which were such a prominent source of revenue at a time when the business was subdivided.

Answer to Question 8.—During the first and second years there were more unlicensed dealers to put down. Since then, and now, matters are running more smoothly, the hotel-keepers and general public having a more thorough knowledge of the requirements of the present Act, recognizing the merits of the Act and the protection which it affords to them.

SOUTH ONTARIO.

Answer to Question 1.—The number of parties in this License District, engaged in the illicit sale of intoxicating liquors, has been greatly reduced under the present system. While formerly a large quantity of liquor was improperly sold at fairs and pic-nics, now very little is so sold, and the illicit trade is reduced to almost a minimum.

Answer to Question 2.—The hotel accommodation in this District was very good before, but better now, and kept cleaner.

Answer to Question 3.—In this respect, there is a decided improvement; most of the hotel-keepers are trying to observe the law. There were several cases of breaking the law at first, but now very few. The Saturday night and Sunday observance of the law is good, and now it is a rare thing to see an intoxicated person on the streets on the Sabbath, whereas, such occurrences were frequent formerly.

Answer to Question 4.—The observance of the law by the licensed shop-keepers, under the new law, with one exception, has been good, and hence the low drinking greatly diminished.

Answer to Question 5.—The class of men who now obtain tavern licenses is far superior to those formerly engaged in the same traffic.

Answer to Question 6.—Public opinion is most decidedly in favour of the new law, and desires its continuance. The people here are contented to try the law.

Answer to Question 7.—In answer to this, I would say, that, so far as I can observe, there is not so much drinking as formerly, and treating at the bar seems to be on the decrease. This is owing, I think, to the better license regulations, the influence of public opinion, and partly, probably, to the hard times which have prevailed for the last few years. As a whole, the present License Law works well, and is giving good satisfaction.

Answer to Question 8.—The following figures will convey some idea of the general working of the Act during the years mentioned:—

	Informations.	Convictions
For 1876-77.....	56	41
“ 1877-78.....	23	18
“ 1878-79.....	2	2
“ 1879-80.....	18	15

This statement exhibits a decrease during each year, and speaks well for the working of the law.

As to the year 1878-79, I may say that the Dunkin Act was supposed to be in force in the county, but as its provisions could not be carried out, informations were not proceeded with.

I may further say, that complaints of a character insufficient to be considered informations, are becoming fewer each year. The whole arrangements for hotels in this county are becoming more complete and regular.

SOUTH HURON.

Answer to Question 1.—There were only two unlicensed taverns in this Riding under former Acts, and both sold liquors illicitly. The first year, under the present Act, the commissioners cut off nineteen taverns, some on account of the limit of population, others not being considered necessary, or having insufficient accommodation. There are at the present time six unlicensed houses, supposed to be selling illicitly; the other thirteen have either been closed altogether or turned to some other account.

Answer to Question 2.—The accommodation of taverns under the present Act is altogether superior to what it was under the old Act. Under the old Act, any person could get a license whether they had accommodation or not, especially in the townships, and sometimes in the towns. A good deal depended upon who they supported for councillors.

Answer to Question 3.—The law is much better observed now than formerly, tavern-keepers being more anxious to keep order, knowing that they have to do so in order to retain their licenses.

Answer to Question 4.—Under former Acts, there was a great deal of drinking done in shops, by the glass. Under the present Act, drinking in shops is pretty much done away with. People that used to drink in shops are now afraid to do so, for fear of being brought up as witnesses; but the greatest improvement in shops, is where the liquors are separated from other business, as in Seaforth.

Answer to Question 5.—Tavern-keepers conduct themselves better now than under former Acts. They abstain more from drinking, which enables them to attend to their business better, knowing that unless they properly control their houses, they may lose their licenses, as the commissioners will not grant a license to any person who is addicted to drinking to excess. Under former Acts, there was no such supervision exercised over the conduct of the landlords.

Answer to Question 6.—A great many persons have expressed themselves to me in this way—men not at all in favour of the principles of the Act. I quote their own words,

thus:—"Well, we may say what we like about the Crooks Act, but we cannot deny that taverns are quieter—less fighting about them, a great improvement over the former Acts." Councillors have also told me that it was in their interest that the licensing system had been taken out of their hands, as they were badgered to death before licensing time.

Answer to Question 7.—The only difference I can see in the drinking habits of the people, as compared with former Acts, is, that there is not so much drinking on Saturday nights and Sundays. Treating at the bar is, I think, pretty much the same as under former Acts.

Answer to Question 8.—In making a comparison of the working of the License Act for the years mentioned in circular, I may say, that I had much difficulty in enforcing the Act for the years 1876-7, 1877-8 and 1878-9, because hotel-keepers, and those having unlicensed houses, tried to make the Act not workable, believing that the Government would be defeated in 1879, and then the present law would be done away with, so that they would have the same freedom as under the old Acts; but, finding their wishes not realized, they now accept the situation, and are trying to make the best of it. Not so many complaints, and very few prosecutions, for the license year 1879-80, showing a great improvement over the three former years mentioned above.

SOUTH WATERLOO.

Answer to Question 1.—I was appointed Inspector in January, 1878. At that time there were fifteen persons engaged in the illicit traffic of liquors, as compared with none at the present time.

Answer to Question 2.—I consider the quality of tavern accommodation one hundred per cent. better now than under former Acts. This great change I attribute to the cutting off of licenses formerly given to low groggeries, and persons not fit to keep hotels, and to the proper supervision of those now licensed, according to the requirements of the law, and instructions of the license commissioners.

Answer to Question 3.—There is a decided change for the better in the observance of law and order, now, as compared with former Acts, but there is yet room for improvement.

Answer to Question 4.—Licensed shop-keepers observe the law strictly.

Answer to Question 5.—The personal standing and qualifications of licensed hotel-keepers under the present Act are greatly superior (taken as a whole) as compared with the same under former Acts.

Answer to Question 6.—Public opinion regarding the change from the old to the new law is unanimous in favour of the new.

Answer to Question 7.—The drinking habits are very similar to what they used to be among the people generally, with this exception, that minors and habitual drinkers are refused drink by the majority of our hotel-keepers, under the present system. The custom of treating is the same as formerly. If this baneful habit could, in any way, be done away with, it would lessen drinking greatly, for many are led into drinking on account of this custom.

Answer to Question 8.—The working of the License Act has been improving from the first, and is still improving. There are various reasons for this: public opinion in favour of the Act as a whole; the doing away with low groggeries, and the utmost care being taken by the board of commissioners, whenever hotel changes are made, to secure men of good character.

NIPISSING.

Answer to Question 1.—There being no license commissioners in this District, the licenses are issued by the Inspector, and in that respect no change is observable by the license-holders. There are few persons now, if any, engaged in illicit traffic in intoxicating liquors. There were three or four parties so engaged, but, having been fined, they are now selling under license.

Answer to Question 2.—The tavern accommodation, within the past four years, has been increased and improved.

Answer to Question 3.—Law and order are observed by licensed tavern-keepers.

Answer to Question 4.—The same observations apply to the licensed shop-keepers.

Answer to Question 5.—Their standing and personal qualifications, as compared with other years, are very little changed.

Answer to Question 6.—In so far as the present law affects the District, I have heard no complaints, except from tavern-keepers who think the charge for a license is too high.

Answer to Question 7.—The drinking habits of the people, and the custom of treating at the bar, as compared with former years, have greatly decreased.

Answer to Question 8.—[No answer received.]

NORFOLK.

Answer to Question 1.—As near as I can judge, there were ten selling under the former Acts where there is one now.

Answer to Question 2.—The taverns are better furnished, and the accommodation very much improved.

Answer to Question 3.—The hotel-keepers are observing the law much better than they did under former Acts.

Answer to Question 4.—There is a great improvement in the shop-keepers.

Answer to Question 5.—The tavern-keepers have greatly improved under the present Act.

Answer to Question 6.—The public are much better satisfied with the present law than with the former.

Answer to Question 7.—There is not the amount of drinking and treating at the bar as there was in former years.

Answer to Question 8.—In the years 1876 and 1877, there were a great many complaints against parties for selling without license, and others that were licensed, for selling during prohibited hours.

In the year 1877-78, there were not so many complaints, but about the same number of fines, as in the preceding year. The hotel-keepers were better pleased with the law, and the public better satisfied, than they were with the former Acts.

In the year 1878-79, there were less complaints and fines than in the two preceding years.

In the year 1879-80, there were very few complaints against parties for selling contrary to the License Act, and the hotel-keepers and public are satisfied. There is not much difference in the working between this and the last year, although it is better than in the two preceding years.

EAST PETERBOROUGH.

Answer to Question 1.—In my License District it is reported that there is but one illicit dealer in spiritous liquors, and it is kept so private and quiet that doubts arise as to its truthfulness. I have several times examined the premises, and found nothing to indicate selling liquor. Under former Acts, and previous to the present Act coming into force, there were in my License District fifteen places where intoxicating liquors were sold without license.

Answer to Question 2.—The quality of accommodation is better, as a general rule, under the present License Act than under the former Acts.

Answer to Question 3.—The observance of law and order by licensed tavern-keepers is much better under the present Act, than former Acts, but the reason is supposed to be that under the new Act the law is enforced.

Answer to Question 4.—The observance of law and order by licensed shop-keepers in my District, under the present Act, is one hundred per cent. in their favour, as it is well known that liquor was formerly sold by the glass and drunk in the shops without molestation or hindrance. It has been the exception in my District to find the law broken since some of the old offenders have been closed up.

Answer to Question 5.—As to comparisons between holders of licenses under the new and former Acts, many of the present licensees held license under former Acts, but where new applications are made, or new taverns erected, they have been equal to any under former Acts, and our Board has declined to accept applications from parties who, having held license under former Acts, were refused them for want of accommodation, or other causes.

Answer to Question 6.—Public opinion regarding the change from the old law to the new is decidedly in favour of the new.

Answer to Question 7.—The drinking habits of the people, and the custom of treating at the bar are still practised, but not to one-half the extent of former years. Some attribute the falling off to hard times which no doubt has its effect, but there are other reasons which have had a great influence over the young men, and these are temperance societies and moral suasion, and they have had the effect of keeping the young men from the tavern, and it is now only the old and middle aged who resort to taverns for drinking purposes. The custom of drinking at “bees,” is now done away with and it is seldom practised at sales. It is also the exception, rather than the rule, to find young men using strong drink in this locality. Last summer a railway was built through this locality, and the drinking habits of the navvies had some influence on the customs of our people.

Answer to Question 8.—In the present license year there have been three prosecutions in this District, and all three were licensed hotels.

In license year 1876-7 there were twenty-three prosecutions in this District, and fifteen of them were for selling without license; and in license year 1877-8 there were eleven prosecutions, and eight of the eleven, were illicit traders.

In license year 1878-9 there were four prosecutions, three of which were illicit traders.

In license year 1879-80 there were three prosecutions, and all were unlicensed.

The above comparisons will show that the illicit traders have had to yield to the law in this District, and it is acknowledged by all that it is due to the present machinery for carrying it into effect. Those that were engaged in illicit traffic of spiritous liquors have found that they could not continue in it, and they are now pursuing other callings for a living. Some of them have told me that they were pleased they had been compelled to abandon the trade.

NORTH BRUCE.

Answer to Question 1.—The number of persons engaged in illicit traffic is probably not any less than under former Acts, for the reason that the licenses are much higher than under former Acts, which tempts some to violate the law in very remote country districts; and they are oftener brought to justice than under former Acts.

Answer to Question 2.—The quality of tavern accommodation is greatly improved, as compared with former Acts. The inferior taverns have all been weeded out, owing to the number being limited by population; more especially is this the case in towns and villages.

Answer to Question 3.—The observance of law and order is much better under the present law than under former Acts, more especially the early closing on Saturday nights, which most of the hotel-keepers wish carried out, and which is willingly complied with.

Answer to Question 4.—Although perhaps violated sometimes, I think licensed store-keepers are more careful of violating the law than formerly, as they are aware of the heavy penalties imposed for infractions.

Answer to Question 5.—The same observations apply to this as were made on No. 2, viz:—that the standing and qualifications of those holding tavern licenses is much improved under the new Act.

Answer to Question 6.—The great majority of people consider the present license laws much superior to former Acts, as those holding licenses are more under surveillance, and are not allowed to violate the law with impunity.

Answer to Question 7.—I cannot say that there is much difference in the custom of treating at the bars, as compared with former years, although I believe drinking habits have declined during the past few years.

Answer to Question 8.—In making a general comparison of the present working of the License Act, as compared with the years 1877, 1878, 1879 and 1880, I would say, that the various amendments made to the License Act during these years have been beneficial in enabling the Inspector to more fully enforce the Act. Of course, the year 1878-9, in this District, was marked by the adoption of the Dunkin Act, which produced bad results, and made it more difficult to enforce the law in that and the succeeding year, but the license laws are now better observed than they were in 1877.

SOUTH GREY.

Answer to Question 1.—Under the old law there was practically no limit to the number of licenses issued. In this District, the Provincial portion was exacted in cash, and instances have happened where the party applying was allowed to pay the municipal portion by work on the road. We now compare favourably, as the number of places where liquor was sold has been reduced fully one-third.

Answer to Question 2.—The quality of tavern accommodation is greatly improved. Dirty, or ill-kept houses, are struck off, or their proprietors are promptly told what will be the result if there is not a marked improvement in the premises. The License Acts are not to be credited with all the good done, as public opinion is advancing, and the time is past when a tavern-keeper can double up his guests, two or three in a bed, and three or four beds in a room.

Answer to Question 3.—The observance of law and order by licensed tavern-keepers is much better than formerly.

Answer to Question 4.—The same remark applies, but with greater force, with regard to licensed shop-keepers.

Answer to Question 5.—We had, since the passage of the License Acts, nineteen months of the Dunkin Act, during the latter part of which there was absolute free trade in liquor. Public opinion never supported the enforcement of the latter Act, and the morals of the people were greatly debased.

Answer to Question 6.—We are now getting back to a much healthier state, and public opinion is strongly in favour of the change.

Answer to Question 7.—There is a quiet revolution taking place in the drinking habits of the people, light wines and beer taking the place, to a great extent, of stronger liquors. I cannot say that there is a marked improvement in the treating habits.

Answer to Question 8.—In 1876-7, the Act was new, and at first there was some difficulty in enforcing it; but, toward the latter end of the year, a much better tone prevailed. In 1877-8, we had the Dunkin Act, which remained in force during the first seven months of 1878-9, during which there was complete demoralization. During the last five months of 1878-9, we were under license, and there was but little change. During 1879-80, there was a gradual improvement, but we were a little further back than where we were at the end of 1876-7.

WEST SIMCOE.

Answer to Question 1.—From the best information I can get and my own knowledge, there is not one half the number of persons engaged in illicit traffic in spirituous liquors as compared with the number so engaged under former Acts.

Answer to Question 2.—There is great improvement in the quality of the tavern accommodation as compared with that under former Acts. In Barrie there have been four new hotels built with all the modern improvements, also there have been several others much improved, and in other parts of the Riding there is a very marked improvement in the hotels. As there has been a great reduction in the numbers, the small hotels having license under former Acts have not received license under the present, although the majority of the hotel keepers in this Riding are the same persons as formerly. They are on the whole a very respectable class of persons.

Answer to Question 3.—It is much better.

Answer to Question 4.—There is a greater difference with regard to shop-keepers than with tavern-keepers, as there is not nearly the number having shop licenses as formerly. In Barrie there were nine shop licenses, now there are but four, and in the whole Riding only ten, all conducted by very sober and respectable parties, who I believe would not sell adulterated liquors knowingly.

Answer to Question 5.—The standing of tavern-keepers in this Riding is good. Some of them do not drink nor taste spirituous liquors. I have had very little trouble with regard to the personal drinking habits of the hotel-keepers.

Answer to Question 6.—Public opinion is very strongly in favour of the present law, during the sitting of the County Council here last year, one of the Deputy Reeves moved for a special committee to memorialize the Government to change the law, so as to give the different municipalities the control of the licenses as formerly, to which he could not get a seconder, so strong is the feeling in favour of the present Act in the County.

Answer to Question 7.—There is not nearly so much drinking and treating at the bars as formerly, and there are now very few cases of drunkenness. The criminal cases in

the County brought before the Courts are very few. This is an evidence of a decrease in the use of intoxicating liquors, as drunkenness is the cause of many of the criminal cases.

Answer to Question 8.—Comparing the years—1876-7, 1877-8, 1878-9, 1879-80—there is a great improvement every year as the present Act is better understood.

EAST DURHAM.

Answer to Question 1.—Having issued licenses for only one year (1875), before the introduction of the Crooks Act, and not being aware of any record being kept of illicit traffic before that time, I cannot answer under this head.

Answer to Question 2.—The inspection under the Crooks Act being more regular and rigid, and the officer being more independent of local affairs, the class of taverns have improved very materially under it.

Answer to Question 3.—The Inspector being independent of local concerns, and temperance lodges of various denominations having been established throughout the country, the members of which are more or less disposed to watch the taverns, and report any contraventions of the law, order and quietness are much more a characteristic of our taverns than they used to be.

Answer to Question 4.—Shop-keepers, although licensed to sell liquors, generally associate groceries with their other business, and for the success of their venture are obliged to respect law and order. The nature of their business also renders them less liable to transgress, so that any difference under this head is scarcely observable.

Answer to Question 5.—The amount of the license tax now imposed, and the fact that it is obligatory that it be paid in advance, as compared with the old method, when the tavern-keepers paid the fee when it suited themselves—has had a tendency to place the business into the hands of men who are, generally, financially able, and good law-abiding, shrewd business citizens; and I think the standing and personal qualifications of the tavern-keepers has materially improved.

Answer to Question 6.—There are always exceptions—and some people will find fault with every law, but I think public opinion is decidedly in favour of the Crooks Act.

Answer to Question 7.—The drinking habits of the people, it seems to me, have lost all prominence—the younger generation seem to take kindly to the temperance lodges, and to avoid at least any excesses. The population of the country is year by year becoming so much more dense that drinking excesses are not so much noticed. Excessive drinking and treating at bars is certainly declining as a habit, and does not at least keep pace with the increase of population. And, as an evidence of my contention in this direction, I might say that the number of licensed places of traffic have declined from 49 in 1875 to 36 in 1880 in this Riding.

SOUTH SIMCOE.

Answer to Question 1.—I would say that previous to the Crooks Act, the Township Councils of this County generally granted licenses to all applicants, quite irrespective of character or location. To get money seemed to be the leading object. Under these circumstances there was no temptation for illicit traffic, a very different state of things exist at present. The first year of the present law there were, in this Riding, 46 applicants for license: 14 of these were rejected, principally those located where not needed, say at cross-roads throughout the country. The object of the Board was to give to villages all necessary accommodation and to allow only one at small hamlets. Of the 14 rejected, all were finally closed up except three; these continue as temperance houses, and although closely watched, still try to do some illicit trade.

Answer to Question 2.—I have no hesitation in stating that the present licensed taverns are quite superior to what they were formerly. I would classify these in this District as follows:—17 first-class houses, fitted up in good style, with good stables and sheds; 11 second-class, and 6 third-class; they are good, comfortable houses and suitable for their trade.

Answer to Question 3.—I believe the present tavern-keepers obey the law much better than formerly. I have no doubt but that much of their obedience is due to the present law. The shutting up on Saturday nights and Sundays has been attended with the best results. This is admitted by all parties.

Answer to Question 4.—The present shop-keepers obey the law now very well. I have only one that I have reason to suspect. Formerly there were many more and were under no restraint; indeed they made it a general practice to treat all their customers freely.

Answer to Question 5.—The standard is much improved, as the inferior ones have been rejected.

Answer to Question 6.—Public opinion is largely in favour of the present law. There are still some in our Township Councils, who would like to again control the license system as of old.

Answer to Question 7.—General drinking is becoming unpopular, especially with our farming community. Our village population is more disposed to indulge in drinking habits. Treating at bars is not so customary as formerly. It is admitted by all right thinking men, that the Crooks Act and its amendments have reduced the drinking habits of the country, particularly as I have said before, with the country population. I do not know of a farm house in all my acquaintance of a large circle in the County, in which whiskey is kept. Liquor is not now used at “raisings,” or “bees” of any kind. This is surely evidence of a great improvement.

NORTH ONTARIO.

Answer to Question 1.—Under the old law, from the best information I can obtain, there were in this License District over twenty persons selling liquor without license, while at present I do not know of more than one or two who are reported to be engaged in illicit traffic.

Answer to Question 2.—The quality of accommodation is greatly superior as compared with that furnished under former Acts, better attention, more homelike in appearance, and, in reality, a decided improvement in every respect.

Answer to Question 3.—Generally speaking a decided improvement, especially during prohibited hours, nevertheless a good deal of traffic in drinking is yet carried on during the Sabbath day. Something more than a money penalty is required in order to prevent this practice.

Answer to Question 4.—Not much improvement. I have reason to fear that a good deal of this business is done in small quantities, *i.e.*, selling by the glass.

Answer to Question 5.—The standard of personal qualification has been materially raised since the inception of the new law. As a rule, hotel-keepers are a responsible and respectable body of men.

Answer to Question 6.—Public opinion is generally favourable to the present law.

Answer to Question 7.—Very little modification in this respect.

Answer to Question 8.—[No answer received.]

SOUTH WELLINGTON.

Answer to Question 1.—In this District there are now none engaged in illicit traffic of liquor. Under former Acts, there were twenty-one so engaged.

Answer to Question 2.—Accommodation and quality of taverns greatly improved.

Answer to Question 3.—A decided improvement in the observance of law and order.

Answer to Question 4.—The same applies to licensed shop-keepers.

Answer to Question 5.—Substantially better now than under former Acts.

Answer to Question 6.—Favourable to the new law.

Answer to Question 7.—Drinking habits diminished. The same may be said of treating.

Answer to Question 8.—Less intemperance and fewer convictions for drunkenness now, as compared with the years 1876-7-8-9-80.

NORTH LANARK.

Answer to Question 1.—Whatever may have been the number so engaged under former Acts, there are none so engaged under the working of the present Act.

Answer to Question 2.—The accommodation is better now in every particular than under any former Act.

Answer to Question 3.—The law is well observed by all the license-holders.

Answer to Question 4.—We have but two holding shop licenses, and, so far, they have kept the law.

Answer to Question 5.—Both the *personnel* and the standing of the hotel-keepers is better now than under any former Act.

Answer to Question 6.—I believe public opinion is in favour of the new law.

Answer to Question 7.—Much the same as formerly.

Answer to Question 8.—From what I can gather from the Commissioners, the working of the present Act is better, in their estimation, than that of any former one.

NORTH BRANT.

Answer to Question 1.—There are not more than two unlicensed liquor sellers at present, compared with at least nine previously.

Answer to Question 2.—Much superior.

Answer to Question 3.—Very much in favour of the present Act.

Answer to Question 4.—Greatly improved.

Answer to Question 5.—A great deal better class at present.

Answer to Question 6.—Public opinion is in favour of the present Act. There are objections, of course, which consist principally in the fact that the number of licenses is restricted, some being in favour of increasing the number, but the great majority are not.

Answer to Question 7.—The drinking habits are, to some extent, curtailed, and treating at the bar considerably so.

Answer to Question 8.—1876-77—People not being accustomed to the Act, and it making numerous changes, some were dissatisfied with it. 1877-78—The Dunkin Act was in force in this County, and its operation was very unsatisfactory. 1878-79—The people generally were well pleased to have the liquor traffic once more governed by the Crooks Act, and it required diligent watching to stamp out the evils occasioned by the Dunkin Act. 1879-80—The Act gave very general satisfaction to the community at large, there being scarcely a murmur heard, and very few complaints of any violation of the law. The illicit traffic almost stamped out.

SOUTH BRUCE—DIVISION No. 1.

Answer to Question 1.—I believe there are not nearly so many engaged in the illicit traffic as there were under former Acts.

Answer to Question 2.—The quality of tavern accommodation has improved very much.

Answer to Question 3.—Law and order, on the whole, is much better observed than formerly.

Answer to Question 4.—An improvement in the case of shop-keepers, but not so much as in the case of hotel-keepers.

Answer to Question 5.—Standing and personal qualifications generally very much better.

Answer to Question 6.—Public opinion in this District seems greatly in favour of the present Act, as it has done away with a great many unnecessary drinking shops.

Answer to Question 7.—I believe the amount of drinking is small compared to what it was ten years ago, and I am positive that treating is not so prevalent as it has been heretofore.

Answer to Question 8.—In regard to the other questions, there is a marked improvement, but it would have been much greater had it not been for the introduction of the Dunkin Act in 1878.

SOUTH BRUCE.—DIVISION No. 2.

Answer to Question 1.—There is, in my opinion, more illicit selling under the present Act than under that which preceded it (I do not refer to the Dunkin Act).

Answer to Question 2.—Decidedly better.

Answer to Question 3.—Decidedly better than formerly.

Answer to Question 4.—Not much difference, if we except opening and closing.

Answer to Question 5.—Very much improved in standing. Personal qualifications much the same.

Answer to Question 6.—From what I can learn, public opinion is in favour of the present law, particularly in towns and villages, but not so marked in the rural districts.

Answer to Question 7.—Drinking at the bar is not so prevalent as formerly, and as to the drinking habits of the people, they are much improved.

Answer to Question 8.—In this District, during 1877-8 and 1878-9, the Dunkin Act was held to be in force, that is, during the whole or part of these years, it was the law. And without saying anything as to the cause of its failure to put down or restrain the drinking usages, its introduction into this county was a complete farce, and productive of great injury to the county. It was also most demoralizing, and caused a fearful increase of drinking—it appeared to those who sympathized with the liquor interest that “now was the time to go in and win.” Every one who had any-

thing like facilities for engaging in selling liquor, such as druggists, grocers, and others, went in with a will. The present law coming again into force, March 1st, 1879, rapidly changed the aspect of affairs. Illicit dealers, in many instances, quit the business at once, and others conducted their operations with the utmost secrecy. Hotel-keepers assumed a position of respectability. They at least were encouraged to keep improved accommodation, and to keep themselves and their surroundings in a respectable and satisfactory manner. Comparing the present law with the old, I asked the Reeve of Lucknow what his opinion was of their relative merits. He replied that the Crooks Act was far ahead, taverns were much better conducted, improved accommodation and comfort secured. That is also my opinion. I may add that he remarks that there was no use of talking of prohibition. Restriction in some way seemed at present the only way to manage the traffic.

FRONTENAC.

Answer to Question 1.—More than under the former license law, as the license fee was low, and about every applicant was granted a license, but not so many as when the Dunkin Act was in force. The persons now engaged in the illicit sale of liquor are some who held licenses under the old law.

Answer to Question 2.—Much better.

Answer to Question 3.—Better. Not so much drunkenness prevailing, and not much liquor sold Saturday nights and Sundays by licensed hotel-keepers.

Answer to Question 4.—No licensed shop-keepers in this District.

Answer to Question 5.—Better. A more respectable class are now engaged, and the poorer class weeded out.

Answer to Question 6.—I think the better class of the community are in favour of the new law.

Answer to Question 7.—In my opinion, the reduction in the number of taverns has decidedly decreased the drinking habits of the people.

Answer to Question 8.—1876-77. Nineteen prosecutions.

1877-78. Thirty-two prosecutions. Dunkin Act in force.

1878-79. Fourteen prosecutions.

1879-80. Seventeen prosecutions.

1880-1. Seven prosecutions, to November 30th, 1880.

WELLAND.

Answer to Question 1.—More persons engaged in illicit traffic under the new law, there being a less number of licenses granted.

Answer to Question 2.—Greatly changed for the better under the new law.

Answer to Question 3.—Very much better under the new law.

Answer to Question 4.—Highly improved.

Answer to Question 5.—Decidedly better under the present law.

Answer to Question 6.—Most in favour of new law.

Answer to Question 7.—Lessening somewhat.

Answer to Question 8.—Is gradually improving, as the people become acquainted with the requirements of the Act.

EAST GREY.

- Answer to Question 1.*—I think the number of persons engaged in illicit traffic is now much less than under former Acts. Men that would go into the illicit liquor-selling dread the Inspector appointed by the Government much more than when the appointments were made by the Township Councils.
- Answer to Question 2.*—The quality of tavern accommodation has much improved during the last four years, in this District.
- Answer to Question 3.*—Law and order is now better kept by hotel-keepers than under former Acts, when the Municipalities had the granting of licenses.
- Answer to Question 4.*—Shop-keepers observe the law much better, and there is not nearly so much drinking about country stores and shops as formerly.
- Answer to Question 5.*—The standing and personal qualifications of the holders of tavern licenses are now better, for the reason that they do not like to be reported to the Inspector or to the Board of Commissioners, and, should they continue bad, their licenses would not be granted the following year.
- Answer to Question 6.*—The opinion of the most intelligent part of the community is in favour of the new law. The hard cases think the law too stringent as it now stands, and they think that it would be better if they could get drink up to eleven or twelve on Saturday nights.
- Answer to Question 7.*—The drinking habits of the people must have improved, as we do not find the fighting and quarrelling at hotels that there used to be in former years.
- Answer to Question 8.*—The License Act was in good working order during the latter part of 1876-7. When we had the Dunkin Act, we got into disorder and confusion. Our License Act is now working reasonably well.

WEST YORK.

- Answer to Question 1.*—There are not nearly so many; the facilities for suppressing the illicit traffic under the License Law are superior to those of former Acts.
- Answer to Question 2.*—Very much superior to that of former Acts.
- Answer to Question 3.*—As a general thing, the licensed hotel-keepers are respectable, law-abiding citizens.
- Answer to Question 4.*—The shop-keepers are also respectable, law-abiding citizens.
- Answer to Question 5.*—The high tariff for license, the standard for necessary accommodation, the character and personal qualifications necessary for the applicant, excludes all but comparatively responsible parties, and consequently raises the standard above those of former Acts.
- Answer to Question 6.*—Public opinion favours the working of the License Act in preference to any previous Acts.
- Answer to Question 7.*—Decidedly an improvement on former Acts.
- Answer to Question 8.*—Two years of the License Act having passed previous to my appointment as Inspector, and the Temperance Act being in force in the District for one year after, I am not in a position personally to report fully on the matter, but know the License Act of 1879-80 to be far superior to the Temperance Act, and is still improving.

HALDIMAND.

Answer to Question 1.—There is a great difference in the number engaged in illicit traffic in intoxicating liquors, within the last two years. I think I am safe in saying that they have decreased one-half.

Answer to Question 2.—The quality of tavern accommodation is better than that under former Acts.

Answer to Question 3.—The observance of law and order by licensed hotel-keepers is better, as compared with former Acts.

Answer to Question 4.—The observance of law and order by licensed shop-keepers is also better, as compared with former Acts.

Answer to Question 5.—The standing and personal qualifications of the holders of tavern licenses are better, as compared with former Acts.

Answer to Question 6.—Public opinion is in favour of the change from the old to the new law.

Answer to Question 7.—Not much change in the habits of the people, and the custom of treating at the bar, compared with former years. I will say, however, that the temptation to do so is lessened by the fewer houses licensed.

Answer to Question 8.—I cannot well do better than say that the present law is acting to the advantage of the community at large, and will most likely improve in that respect.

NORTH WENTWORTH.

Answer to Question 1.—In the District of North Wentworth to-day it would puzzle an expert to find half-a-dozen places selling without license, whereas under the old law they could be counted by the dozen.

Answer to Question 2.—Under the present law, tavern accommodations are very much better than under any former Acts.

Answer to Question 3.—Under the present law, the licensed hotel-keeper knows that in order to get a renewal of his license he must observe the law and keep good order about his place. Under former Acts, particularly in the rural districts, law or order was about the last thing thought of.

Answer to Question 4.—Under the present law, the shop-keeper is very careful not to sell in less quantities than the Statute allows, and rarely permits liquor to be drank on his premises. Under former Acts it was quite common to see men go into the shop-keeper's liquor room, and help themselves at the tap.

Answer to Question 5.—Under the present law, the personal qualifications of tavern-keepers will compare favourably with the general merchant. Under former Acts the personal qualifications of tavern keepers were very low.

Answer to Question 6.—Public opinion is unanimous in pronouncing the new law superior to the old.

Answer to Question 7.—The drinking habits of the people are very much improved. The treating at the bar has greatly decreased of late years. The old toper is rarely to be seen in the bar-room now. In former years you could scarcely go into a bar-room without finding one or more waiting to be treated.

Answer to Question 8.—In comparing the present working of the License Act with that of previous years, I found that there was at first a good deal of dissatisfaction shown by

those unfortunate ones who were cut off in consequence of the number being limited. A great many of them thought only of their own interests, and naturally felt that their vested rights had been unjustly taken from them, and resolved to continue in the business at all hazards, and as is generally the case, the apparent harshness caused a great many to sympathise with those who had to close their places, and no doubt the law was not enforced in many instances on that account. But year by year the public have gradually become accustomed to its working, by seeing the unlicensed places swept away, and any disreputable character refused a renewal of his license. The liquor trade has undergone a complete revolution in Ontario, within the last four years, so much so, that to-day the leading exponents of the Licensed Victuallers publicly pronounce the Crooks Act to be the best license law in the world.

NORTH HASTINGS.

Answer to Question 1.—The number of persons engaged in illicit traffic under the former Acts was ten, to one under the present law.

Answer to Question 2.—There has been considerable improvement. Four years ago there were three brick hotels and one stone; at present there are five brick and three stone. As regards the rest there have been improvements made, and all have better accommodation than they had four years ago.

Answer to Question 3.—Law and order is much better observed than it was under the former Acts.

Answer to Question 4.—There is much better order under the present Act. Under former Acts there were more drinking places.

Answer to Question 5.—As regards this question, all I can say is that on the whole there is an improvement. There are very few of the landlords now that drink to excess as they did in former times.

Answer to Question 6.—The public is generally in favour of the present Act.

Answer to Question 7.—There is a great change in the habits of the people for the better. There is also good order and less treating at the bars than there were under former Acts.

Answer to Question 8.—Twenty-four licenses were granted in 1876-7, four were fined for selling after hours, and four for selling without license.

Twenty-four licenses were granted in 1877-8, three were fined for selling without license and one for allowing gambling.

Twenty-eight licenses were granted 1878-9, one was fined for selling without license, and one for allowing gambling.

Twenty-nine licenses were granted in 1879-80, two fined for selling less than three half pints, and one for selling on Sunday. The increase in the number of licenses issued was in consequence of the opening of the railway, and the many improvements in the District.

DUNDAS.

Answer to Question 1.—There are no persons engaged in illicit traffic in intoxicating liquor in this county.

Answer to Question 2.—The quality of tavern accommodation, as compared with that under former Acts, is at least forty per cent. better.

Answer to Question 3.—The observance of law and order by licensed hotel-keepers is greatly improved under the present Act; more so than under any previous Acts, say 100 per cent.

Answer to Question 4.—Licensed shop-keepers in proportion to hotel-keepers.

Answer to Question 5.—The standing and personal qualifications of the holders of tavern licenses are greatly improved under this Act, more so than under any previous Acts.

Answer to Question 6.—Public opinion, in regard to the change from the old law to the new, is greatly in favour of the new law.

Answer to Question 7.—The drinking habits of the people, and the custom of treating at the bars has greatly decreased under the present Act.

Answer to Question 8.—I would also beg leave to report that the working of the License Act during the years 1876-7, 1878-9 and 1879-80 has been a decided and satisfactory improvement upon any in force theretofore. When the present Act first came into force there were over twenty places selling liquor without license in this county, and now there is not one single instance to my knowledge.

SOUTH BRANT.

Answer to Question 1.—There are not nearly so many persons engaged in illicit traffic as formerly. The Inspectors being salaried officers, are able to devote all or nearly all of their time to looking after and suppressing unlicensed places, and not being responsible to any municipality, do their duty without fear or favour.

Answer to Question 2.—The quality of tavern accommodation is now much better than formerly, and this, in my opinion, is to be attributed to better inspection, and more care in the issuing of licenses on the part of Commissioners who are independent of any outside influence.

Answer to Question 3.—A decided improvement, as they are looked after closer by the Inspectors, and their chances of getting a license in the future would be lessened if they did not observe the law, as all contraventions of the law are brought to the notice of the Commissioners.

Answer to Question 4.—As far as can be judged there is an improvement, as only persons who are considered respectable are granted licenses. In my opinion, it would be better if no licenses were granted to shops where provisions are sold, as they cannot be compelled to close their places of business at early hours.

Answer to Question 5.—There is now a better class of men engaged in the business. The number of licenses being limited, and the applications very numerous, the Commissioners are able to make a choice and select the best men. The consequence is that among the license-holders in the City of Brantford there is not a single dissipated man who is engaged in the traffic. Neither is there a man engaged as bar-tender that is not a sober, steady man.

Answer to Question 6.—In favour of the present law, for the reasons given above.

Answer to Question 7.—To be drinking at a bar is not considered respectable, and there is, consequently, not so much of it done.

Answer to Question 8.—As compared with former years, the law seems to give better satisfaction. When the law first came into force there was a great deal of opposition to it by those engaged in the business, but the longer it is worked the better satisfaction it seems to give to all parties, as, by preventing unlicensed selling, it protects those who have licenses.

EAST KENT.

Answer to Question 1.—I found upon examination of the books of the Issuer of Licenses for the County under the old law that parties holding tavern and shop licenses were in

the habit of paying the Government portion, but that several of them did not pay the municipal portion at all, and also that several of them only paid the municipal portion through the year when it suited themselves. And as to illicit traffic there is a marked improvement.

Answer to Question 2.—The quality of tavern accommodation is very greatly improved under the present license law.

Answer to Questions 3 & 4.—The observance of law and order has greatly improved under the present management, owing to the fact that the Commissioners have been advised and have withheld licenses from a class of hotel-keepers that were not particular whether law and order were observed or not.

Answer to Question 5.—Improved. See Nos. 3 and 4.

Answer to Question 6.—The public opinion is that the change is a good one.

Answer to Question 7.—The drinking and treating habits have lessened owing to the fact of moral improvement of the hotel-keepers. The many devices formerly practised by those selling liquors to induce parties to treat have been in a great measure discontinued.

Answer to Question 8.—There has been a gradual improvement each year.

WEST HURON.

Answer to Question 1.—In this Riding not more than one-tenth of the number formerly engaged.

Answer to Question 2.—The accommodation is very much better in all respects under the present law.

Answer to Question 3.—There is much better order observed, but there is considerable violation of law on Saturday nights and Sundays.

Answer to Question 4.—There is a vast improvement in this respect, the traffic being entirely separated from any other business in this Riding. And if the separation of such traffic was made statutory it would be better.

Answer to Question 5.—There is in most cases a decided improvement.

Answer to Question 6.—It is here acknowledged to be altogether superior to the old law.

Answer to Question 7.—There is not nearly as much drinking as formerly ; but the habit of treating at bars is still very prevalent.

Answer to Question 8.—The law is better observed now than in the years named. With the exception of Saturday night and Sunday, during which time I think there is a little more violation than there was a year or two since, and as the Statute allows lodgers, etc., to get drink it is hard to put a stop to it.

DUFFERIN.

Answer to Question 1.—The number of persons engaged in illicit traffic in intoxicating liquors in this District is greatly reduced. As soon as any case has been brought to our knowledge, the law has been put in force and the traffic stopped. Under the old Acts liquor was freely sold at all public gatherings ; that traffic has now almost ceased. It would be an improvement if the Inspector, or other officer, could when found, destroy both liquor and vessels containing it.

Answer to Question 2.—The quality of tavern accommodation has greatly improved especially in towns and villages in this District, and the comparison is favourable to the present law.

Answer to Question 3.—The observance of law and order compared with the old Acts is decidedly favourable to the present Act; on a Saturday evening and on a Sunday the hotels in this town are as quiet as any private house, although we have no constable; the Town Council six months ago, having no use for one, dismissed him. Under old Acts congregating around the tavern doors and general loafing thereabouts on Sunday being the custom.

Answer to Question 4.—The observance of law and order by licensed shop-keepers compared with former Acts is on the whole favourable. It is almost impossible to obtain evidence of their having disposed of quantities less than the law allows. The sale of groceries, provisions and liquors in the same shop is very unsatisfactory, and some municipal councils will not separate them and nothing short of a Provincial Act will have a remedial effect.

Answer to Question 5.—The standing and personal qualifications of holders of tavern licenses as compared with former Acts has decidedly been for the better. In this county the tavern-keepers, as a rule, are an accommodating, civil, and steady class of men, a great deal more so than they were a few years ago.

Answer to Question 6.—Public opinion, in this county, when the Dunkin Act was tried, lauded the present Act to the skies; since then there has been no public expression of opinion on the subject, the existing law being accepted as the best, next to a Provincial Prohibitory Act.

Answer to Question 7.—We can report little change in respect to treating or the general habits of the people.

Answer to Question 8.—In the course of the last four years the places from which licenses were withheld have mostly disappeared, and the present year will compare favourably with preceding years.

SOUTH WENTWORTH.

Answer to Question 1.—I can only say that the illicit traffic has continued to decrease yearly since the present law came into force.

Answer to Question 2.—Better—insufficiently furnished houses having been refused licenses.

Answer to Question 3.—There is a marked improvement.

Answer to Question 4.—There has been only one violation of the law, the last four years.

Answer to Question 5.—Standing and qualifications are far superior.

Answer to Question 6.—As nearly as can be ascertained, the present law as administered by the Commissioners is better than any former law.

Answer to Question 7.—Less liquor drunk and less treating at the bar than formerly.

Answer to Question 8.—In 1876-77 there was much more difficulty in enforcing the law, and much more violation of it, than there has been in any of the succeeding years up to this time.

EAST SIMCOE.

Answer to Question 1.—Less by at least two-thirds.

Answer to Question 2.—Great improvement.

Answer to Question 3.—Law much better observed.

Answer to Question 4.— Ditto. (Very few shops in this District.)

Answer to Question 5.—Much improved.

Answer to Question 6.—In general very favourable.

Answer to Question 7.—Much less, partly owing to the working of the Act, and partly owing to public opinion and change in the customs of the people.

Answer to Question 8.—In making such comparison, I beg to say that the number of persons engaged in illicit traffic in intoxicating liquors in 1876-7, was very large compared with successive years. The change in the new Act requiring a better quality of tavern accommodation than formerly, and a great many who then occupied inferior houses, or were considered unfit persons to be entrusted with a license, being refused, persisted in carrying on an illicit traffic till restrained by due course of law; but by strictly enforcing the law, the year 1877-8 showed a decrease in the number of prosecutions for illicit traffic of at least four-fifths, and by careful application of the law, and the adoption of proper rules and regulations by the Board, for the guidance of those holding licenses, the condition has since continued much the same, there being in no year since that time more than one-fifth of the number of prosecutions for infraction of the law as compared with 1876-7. On the whole a steady improvement is being made under the present law—the number of persons engaged in illicit traffic in intoxicating liquors being greatly reduced, the quality of tavern accommodation much improved, law and order better observed, the standing and qualifications of holders of licenses superior, public opinion also in its favour. I consider it safe to say that with continued vigilance, and judicious application of the law, further improvement may still be expected.

CARDWELL.

Answer to Question 1.—The number of persons engaged in the illicit traffic in intoxicating liquors as compared with former Acts is very much on the decrease, and I think will soon be stopped altogether.

Answer to Question 2.—The quality of tavern accommodation is much better under the present Act, both as regards meals and stabling and the order of bar-rooms.

Answer to Question 3.—The observance of law and order is much better, as there is very little drinking on Saturday nights after hours, and none on Sundays, that I am aware of.

Answer to Question 4.—The observance of law and order by licensed shop-keepers is much better under the present Act as there is no liquor sold by any shop-keeper in the county, under the quantity allowed by law, or any treating of customers.

Answer to Question 5.—The standing and personal qualification of tavern-keepers is very much improved within the last four years, and with few exceptions, the hotel-keepers in this county are a very respectable class of citizens.

Answer to Question 6.—Public opinion, from all that I can learn by diligent enquiry, is favourable to the present Act, and it is considered to be a great improvement over all other Acts.

Answer to Question 7.—With regard to the drinking habits of the people, and the custom of treating at the bar, there is much less than in former years, as the people, instead of spending their money at the bar, take more meals, which is a very great improvement.

Answer to Question 8.—With regard to the present working of the Act as compared with the last four years, it is only five months since my appointment, but I am aware

that there is a great change for the better, as there were seventeen parties selling without a license, all of which have, with two or three exceptions, either discontinued sales or taken out licenses.

SOUTH VICTORIA.

Answer to Question 1.—As to the question of the present illicit traffic as compared with that under the old law, I find that there has been a very great reduction in the number now selling without license.

Answer to Question 2.—The quality of tavern accommodation now, as compared with that under the old law, is much improved.

Answer to Question 3.—The observance of law and order by hotel-keepers is much better than formerly.

Answer to Question 4.—Licensed shop-keepers have also greatly improved in this respect.

Answer to Question 5.—The standing and personal qualifications of holders of tavern licenses now are far above what they were under the old law. All except two are sober and well-behaved men, and men of property. The course pursued in this matter by the Board is as follows:—Whenever I find that a tavern-keeper becomes dissipated, he is refused a license; therefore, it has brought the standard up, compared to what it was under the old law.

Answer to Question 6.—Public opinion, including many tavern-keepers, strongly favours the new law in preference to the old.

Answer to Question 7.—The drinking habits of the people are changed. There is a less disposition to drunkenness. Our Police Magistrate's opinion is, that there were ten cases under the old law to one under the new. There is also less treating at the bars. The custom of treating all hands in the bar-room is not now prevalent. As far as my experience and observation go, the present license law is much to be preferred to the old law.

LENNOX.

Answer to Question 1.—I have only held the office of Inspector of Licenses since the first of March last, and as my former business did not bring me in contact directly with the workings of the License Acts, I am not in a position, nor in possession of such knowledge as would enable me to give a full and satisfactory answer to the questions submitted; but my impressions are, that the number of persons engaged in illicit traffic is very much diminished as compared with former Acts.

Answer to Question 2.—The quality of tavern accommodation is much improved, as compared under former Acts.

Answer to Question 3.—The observance of law and order by licensed hotel-keepers is much better, owing, I presume, to the present license law being more stringent and severe in punishing offenders.

Answer to Question 4.—The observance of law and order by licensed shop-keepers is much better also, for the above-mentioned reasons.

Answer to Question 5.—The standing and personal qualifications of holders of tavern licenses, as compared with former Acts, are somewhat improved.

Answer to Question 6.—Public opinion is in favour of the present law.

Answer to Question 7.—The drinking habits of the people, and the custom of treating at the bar, is much the same as in former years.

Answer to Question 8.—As stated at the commencement of my answers to your inquiries, I am not sufficiently well informed regarding the working of former Acts, to make a general comparison during the years 1876-7, 1877-8, 1878-9 and 1879-80, but, from the limited knowledge I possess, and from my observations during those years, I think I am safe in saying there is a decided improvement and benefit resulting from the workings of the present law.

SOUTH PERTH.

Answer to Question 1.—The number of persons engaged in illicit traffic in intoxicating liquors, in South Perth, is much less in comparison with the number so engaged under former Acts.

Answer to Question 2.—The quality of tavern accommodation is decidedly better as compared with that under former Acts.

Answer to Question 3.—The observance of law and order by licensed hotel-keepers is likewise decidedly better, as compared with that under former Acts.

Answer to Question 4.—If anything, there is a still more marked improvement in this respect, in connection with shop-keepers, than with tavern-keepers.

Answer to Question 5.—On the whole, altogether better.

Answer to Question 6.—The prevailing opinion is, that in a moral and social sense, and, in many instances, in a pecuniary sense, the change from the old to the new law has been of invaluable benefit to the country. There is, however, an opinion very common that the present law might be amended so as to give the tavern-keepers a little more time on Saturday evening—say, till eight o'clock,—without injurious effect. Such an extension of time would also add to the convenience of travellers by road, especially in the winter time.

Answer to Question 7.—These have both been curtailed, to a great extent, by the present law. Under former laws the greatest amount of treating and drinking, comparatively speaking, was indulged in on Saturday nights, which the present law forbids.

Answer to Question 8.—In the year 1876-77, little regard was paid to the requirements of the new law, and, in consequence, many convictions were secured. Many hotels were kept open during the Sabbath day. The convictions, since that year, have lessened year by year, until it is of rare occurrence that a violation of the license law with regard to that day is heard of. To make the law still more effective in prohibiting Sabbath drinking, it is the opinion of myself and the Board of Commissioners, that if the penalties for Sunday violations were made more severe, a still greater improvement would follow. Say, for the first offence, not less than \$50; for the second offence, \$100; and for the third offence, three months' imprisonment and a forfeiture of license for, say five years.

WEST KENT.

Answer to Question 1.—The number of persons engaged in illicit traffic has been greatly reduced.

Answer to Question 2.—The tavern accommodations under present Act, are far superior to those under the former Acts.

Answer to Question 3.—There is a strict observance of the law at present by the licensed tavern-keepers.

Answer to Question 4.—The observance of the law by licensed shop-keepers is not so strict.

Answer to Question 5.—The hotel-keepers are a good deal better class under the present law.

Answer to Question 6.—Public opinion is very much in favour of the present law.

Answer to Question 7.—There is not one-third as much liquor drunk at the bars as formerly.

STORMONT.

Answer to Question 1.—Under the present Act there is no illicit traffic known to us, whereas under the old Act the number of persons so engaged was very numerous, and were generally known but not prosecuted. The reasons for not prosecuting illicit dealers under the old Act, were the influences which liquor dealers had on the municipal electors.

Answer to Question 2.—In regard to tavern accommodation, we unhesitatingly say that the accommodations under the present Act are far superior to that under the old Act.

Answer to Question 3.—The law is better observed than formerly, by early closing on Saturday nights, and by the observance of the Sabbath day. Better order is kept by hotel-keepers. In our opinion there is less quarrelling at taverns than under the old law.

Answer to Question 4.—In regard to the observance of law and order by present licensed shop-keepers as compared with former Acts, we are not prepared to say that there is any material difference. Under the present Act we have only two licensed shops in the Electoral District, whereas we had no less than eight under the old law.

Answer to Question 5.—The standing and personal qualifications of holders of licenses are superior as compared with the same under former Acts, they being generally a better class of men and in better financial standing.

Answer to Question 6.—In regard to the public opinion about the change from the old to the new law, our opinion is that the majority of the public favour the new law.

Answer to Question 7.—We believe that the drinking habits of the people, and the custom of treating at the bars has greatly decreased during the period the present Acts have been in force.

Answer to Question 8.—In regard to the present working of the Acts, as compared with the former license years since 1876-7, we are of the opinion that the Act works better now than formerly; for the following reasons, viz.—The number of complaints and fines are fewer now than they were during the former years since 1876, as shown by the statement here given, viz. :—

License year—1876-7.....	12	Complaints....	10	Convicted.
1877-8.....	2	“	2	“
1878-9.....	4	“	3	“
1879-80.....	2	“	2	“
1880-1 (up to this date)..	2	“	2	“

The personal standing of hotel-keepers has been improved each year since the Act was introduced. Men of better financial standing being now engaged in the business, who are able to furnish better accommodations than in former years, and who command more respect from the public.

PEEL.

Answer to Question 1.—I am not aware, nor do I believe there is more than one (if one) in this District at the present time, selling liquor without a license.

Answer to Question 2.—The taverns and out-buildings, and all the surroundings have a very much improved appearance now from what they had in 1876. Any improvements which are really required for the benefit of the public, are insisted upon.

Answer to Question 3.—The tavern-keepers themselves, as well as their customers, are now convinced that the law must be respected, and I very seldom hear any complaints of violations of the Saturday night or Sunday regulations.

Answer to Question 4.—The shop-keepers have learned that it is to their interest as well as their duty to keep this law, and not a tenth part of the liquor is now consumed upon the premises.

Answer to Question 5.—The hotel-keepers in this District are, on the whole, very respectable men, and, with one or two exceptions, seem very desirous to carry out the law. In 1876, some who had been keeping taverns were refused licenses, and others since, who would have applied have been deterred, believing that their applications would not be favourably received by the Board.

Answer to Question 6.—The public generally admits that the present Act is a very great improvement on the old law, and I have never met one person who would advocate a return to the old system.

Answer to Question 7.—In this there is a decided change for the better. In this town people generally retire to private rooms, and respectable men can hardly be induced to stand at the bar and drink liquor, consequently, there is not so much treating.

Answer to Question 8.—In this District the law is generally obeyed, and few express a desire to return to the license system prior to 1876. Unlicensed houses are almost unknown, and now that the public find that the Inspector does not divulge the information given, there is a more general desire to assist in carrying out the law. A few hotel-keepers think that the law should be relaxed on Saturday night, but the public are unanimously in favour of adhering to the closing of hotels on Saturday night at seven o'clock, and the best and most respectable hotel-keepers are themselves in favour of the early closing, and very few are able to show wherein the License Act can be improved, and the public generally, seem to think no more stringent enactments on the liquor traffic is required until the present law has a longer trial.

NORTH YORK.

Answer to Question 1.—In my opinion there are not nearly so many persons engaged in illicit traffic in intoxicating liquors as there were under former license Acts.

Answer to Question 2.—The tavern accommodation is much better than formerly. Inspection under the old system having been a sham, hotel-keepers were allowed to provide the legal accommodation or not, as they saw fit. This is all changed now.

Answer to Question 3.—Licensed hotel-keepers observe the law, and keep more orderly houses now than formerly, because they know that the retention of their licenses depends upon it. They also assist the authorities in enforcing the law against illicit liquor dealers.

Answer to Question 4.—There is much less drinking by the glass in shops than under the old law. This is largely owing to the present system of inspection.

Answer to Question 5.—The standing and personal qualifications of the holders of tavern licenses have improved during the past four years. The worst characters have been weeded out by the Commissioners, and the improvement in this particular has been unmistakeable.

Answer to Question 6.—Public opinion in this License District fully endorses the change in the law made in 1876, for the reasons already stated. The feeling is that Municipal Councils could not act as independently in granting licenses as a Board of License Commissioners could. This appears to be the opinion of Municipal Councillors themselves.

Answer to Question 7.—The custom of treating at the bars is not as prevalent as it was a few years ago, and I believe that the mass of the people is gradually becoming temperate. Temperance organizations have doubtless done something towards educating public sentiment in this direction, but I am convinced that we are indebted to the present license law for a large part of the improvement visible.

Answer to Question 8.—In my opinion the Act works more smoothly than formerly. It would be impossible to make a comparison with the years 1878-9, because the Dunkin Act was in force at that time. The amendments made in the License Act from time to time by the Legislature, together with the privilege of putting the defendant in the witness box in certain cases, secured by the Scott Act, make the law more workable at present than it was, either in 1876-7 or in 1877-8.

LONDON.

Answer to Question 1.—It is not possible to say with accuracy the number engaged in the illicit sale of liquors, although it was thought to be very large previous to 1876. Since the Crooks Act came into force, a reduction of 30 tavern and saloon and 15 shop licences has been made, and, while the population has increased about 3,000 during that period, there are less than 10 houses suspected at present of illicit selling, and that certainly to a very limited extent.

Answer to Question 2.—There is a great improvement in comparison with the old system both as to the class of buildings and as to the accommodation. Formerly there was a number of places used only for drinking purposes without any other accommodation for the public. Most of those places have been abolished.

Answer to Question 3.—The observance of the law is a vast improvement on years before the present Act.

Answer to Question 4.—There is no doubt that the law is better observed by the larger or first-class grocery-keepers than it was formerly, that is, in selling by the glass; still a great many have the bad system of allowing or inviting their customers to drink in their shops, which custom will continue as long as liquor is kept in connection with groceries.

Answer to Question 5.—A great improvement.

Answer to Question 6.—Public opinion is decidedly in favour of the present law.

Answer to Question 7.—In the drinking habits of the people there is a decided improvement. The custom of drinking and treating at bars is still too prevalent.

Answer to Question 8.—The general working of the License Act is a decided success in this municipality. The number of drinking places has steadily decreased, and those licensed have, both in accommodation and observance of the law, improved. The number of suspected unlicensed drinking places has materially decreased, and there are fewer intoxicated persons on our streets in comparison to former years. Numbers of the licensees have expressed themselves as well satisfied with the Act. It encourages them to keep better establishments than heretofore.

CENTRE WELLINGTON.

Answer to Question 1.—The number of persons engaged in illicit traffic at present, in this District, I believe to be somewhat in excess of those under former Acts, but the circumstances are different. Then, almost every person who applied for received a license. Under the present law it is quite different in this District, as during the past five years a reduction of fully thirty per cent. has been made in the number of licenses granted for taverns. The majority of the houses for which a license was refused, are occupied

and conducted as so-called temperance houses of public entertainment; but, in reality, they are nothing else than the lowest class of grogeries, and a fraud on the public. The present law is considered not sufficiently stringent against such places. The license Inspector, in his prosecutions against this class of delinquents should be allowed more latitude, and not be confined to a specific day and date, as the law at present requires.

Answer to Question 2.—We consider the present tavern accommodation to be very much superior to that under the old law, more especially as regards the second and third class taverns; but even among them, there is plenty of room for more improvements still.

Answer to Question 3.—There is a very marked improvement observable in this respect under the present law: Of course very few hotel-keepers observe the strict letter of the law, while prosecuting their calling. There cannot be any doubt but that on Saturday nights and even on Sundays they sell liquor to their friends, and also to others, whom they think can be safely trusted. But as a rule they do not permit any drunkenness to be observable on, or about their premises during such times, and it is extremely difficult to detect these infractions of the law. On the whole, the business is conducted about as well as can reasonably be expected under present circumstances.

Answer to Question 4.—There is considerable improvement in this respect, but, there is room for much more. Too much treating of a certain class of customers, is done by licensed shop-keepers. It is the cause of great injustice to other shop-keepers, who don't sell liquor, and it is a very difficult matter to detect and prevent the treating business. The better class of people are strongly of the opinion that no liquor should be kept and sold in connection with any other class of goods, and that the Government should act in the matter, since Municipal Councils will not do so.

Answer to Question 5.—The present standing and personal qualifications of licensed tavern-keepers, are much in advance of those under former Acts, but we must confess that there are some men, even, at present in the business who would be much better out of it, as well for themselves as for the public at large. Hence, we experience great difficulty in knowing where, and when, to discriminate.

Answer to Question 6.—With regard to public opinion, we can safely say, that a very large majority of the better class of people express themselves as being strongly in favour of the present license law, in preference to the old one, but consider that the Act might yet be somewhat improved, especially so with respect to unlicensed houses, making the occupants of such places more liable to convictions for infractions of the law than they are at present, some of the most respectable of our hotel-keepers declare that the present Act is, by far, the best license law hitherto in force.

Answer to Question 7.—There can be no question but that the habits of the people are greatly improved, in this respect, and every unprejudiced person will readily admit that such is the fact. The custom of treating at the bars has very much decreased from what it was formerly. I may also state, that beer as a beverage is fast superseding the stronger kinds of liquors in use among the people, and, evidently is having a very beneficial effect upon those who are in the habit of drinking strong liquors of any kind.

Answer to Question 8.—In making a comparison between the years 1876-7, 1877-8, 1878-9 and 1879-80, I may state that during the first of these years, the law was very loosely observed by every person trading in liquor, and therefore, a great many prosecutions followed as a consequence, but these prosecutions had a very beneficial effect in obtaining a better observance of law and order. Quite a number of unlicensed liquor sellers were also prosecuted in the course of this year, of whom two-thirds were convicted. Durings the years of 1877-8, the law was much better observed, and fewer prosecutions took place, the same proportion of convictions being obtained as during

the previous year. As regards the years 1878-9 and 1879-80, a number of licensed liquor dealers, and several unlicensed ones were prosecuted for infractions of the license law, the results being very favourable in maintaining both law and order. In submitting the foregoing report, I beg to state, that I have not depended on my own opinion in regard to the working of the present license law, or the result thereof, beneficial, and otherwise, but have taken sufficient time to make diligent inquiry respecting the same, of those who are well qualified to judge, and give a fair and unprejudiced opinion thereon. Perfection can scarcely be expected in the enforcement of any law regulating the sale of liquor. So long as liquor is sold and consumed by the people, certain evils must inevitably result therefrom.

WEST DURHAM.

Answer to Question 1.—The persons formerly engaged in illicit traffic in intoxicating liquors have been driven therefrom by the operations of the present law. Complaints regarding unlicensed traffic in liquors are very rare indeed recently, as offenders have been so decisively brought to justice under the existing License Act.

Answer to Question 2.—A decided improvement in tavern accommodation has been noticeable during the past four years. Hotels lacking proper accommodation for travellers and their animals are now unknown.

Answer to Question 3.—Licensed hotel-keepers have, under the present Act, been led to realise that law and order must be observed in their establishments, and, as a consequence, there has been very little complaint from the public in this respect during the past two years.

Answer to Question 4.—Licensed shop-keepers have expressed a desire and determination to observe the law, but it is feared there is yet considerable illegal drinking of intoxicating liquors in licensed shops. Following the old custom, persons who would rarely drink at an hotel-bar manage, it is said, to obtain drink in the shop-cellar, and the parties to this illegal proceeding keep the knowledge thereof to themselves. Under the surveillance of the present law, however, it is believed the old custom of cellar-tipping is considerably restricted. Perhaps the most effectual method of compelling an observance of the law in this respect would be an amendment providing for the cancellation of the license of any shop-keeper twice convicted of permitting intoxicating liquor to be drunk in his licensed premises, and rendering such convicted person ineligible to obtain a license for two years thereafter.

Answer to Question 5.—There have been very few changes in the holders of tavern-licenses in this District for a number of years—the best have been retained in the best houses, and those least qualified to serve the public have disappeared.

Answer to Question 6.—Public opinion has pronounced the existing law an improvement on former enactments; and the removal from the municipal arena of the annual election strife in the interest of persons looking to the Municipal Council for license, has been most favourably accepted by the mass of order-loving citizens.

Answer to Question 7.—Drunkenness has decreased, and treating at the bars of hotels has been less than in former years, bar-room drinking being now looked upon as disreputable. The fact that landlords complain of the decrease in bar receipts is circumstantial evidence of the decline in that branch of the traffic in intoxicating liquors.

Answer to Question 8.—Violations of the License Act have been gradually decreasing, until, at the present time there is comparatively little trouble in working the Act, and complaints against licensed houses are rare. If the liquor traffic is to be countenanced in our land at all, there should be no relaxation of existing restrictions in the public interest.

PRINCE EDWARD.

Answer to Question 1.—That there is a marked diminution under the present License Act; but, having been hampered with the “Temperance Act of 1864,” in this County, particularly the past two years, more illicit selling is complained of; yet I am decidedly of opinion that nearly the entire electorate are favourable to the present License Act. A very large majority of the people would endorse more severe penalties on the illicit vendors, and suggest the confiscation of the liquor and receptacles.

Answer to Question 2.—The quality of tavern accommodation during the past four years in this county, it is safe to say, has improved from 50 to 75 per cent.

Answer to Question 3.—As to the observance of law and order by licensed hotel-keepers, better, and men of more principle have been selected, who seem inclined, with a few exceptions, to adhere to the provisions of the present Act, but seem anxious to be protected from illicit selling, and urge that as a reason for sometimes “*stepping aside.*”

Answer to Question 4.—The next preceding paragraph will apply equally to licensed shop-keepers.

Answer to Question 5.—The standing and personal qualifications of holders of licenses are *very* much improved under License Act.

Answer to Question 6.—Public opinion, in the main, is in favour of the present law as against the old, but a few extreme cases would dismiss the License Inspectors and Commissioners, and place the licensing power in the hands of the municipalities.

Answer to Question 7.—I am not able to speak satisfactorily of the drinking habits, or treating, as of former years, but firmly believe, when the License Law is enforced, public opinion will discountenance the evil practice; and I may add, that societies have been formed in the interest of abolishing the practice.

Answer to Question 8.—In 1875 the Temperance Act of 1864 was passed in this county, and remained in force until March, 1879. In May, 1879, some 21 licenses were granted, and until October of that year said Act was satisfactory, at which time our County Judge delivered judgment in Regina vs. Allen, setting forth that the Temperance Act was improperly repealed. Then came confusion. The License Act was disregarded, some cases were disposed of by police magistrate—all but two appealed to Sessions. Therefore, it will be seen that I am not in a position to reply satisfactorily to said paragraph; but I am happy to state that the several amendments made in the License Act during the past four years are quite acceptable, still very many are asking for more restrictions, etc.,—the closing of the bar-rooms at 11 p.m. during the week to Saturday, more severe penalties for illicit selling, confiscation of the liquor—and I would suggest the idea of defining more clearly the privileges of License Commissioners under sub-section four of section four; also, a form of by-law to deprive those having shop-licenses of selling anything but liquors. Our Town Council passed a by-law which is inoperative for want of knowledge or a legal form.

MUSKOKA AND PARRY SOUND.

Answer to Question 1.—Lest I might, unintentionally, give a biassed report, as soon as I received your circular I showed the questions to a few leading citizens of both political sides. All were very favourably impressed with the new law, and thought that there was a greater improvement in the enforcement of the law since the Government took away from Municipal Councils the power of issuing licenses and the appointment of Inspectors. The chief argument advanced to support the conclusion that the new law is an improvement over the old law is because of the influence

hotel and shop-keepers have in electing their friends to the Council Boards. It is not to be supposed that councils elected by this vote, knowing, as they do, that a combination of hotel-keepers can sway the elections to suit themselves (and this argument applies with great force in towns and villages) will exert a strong influence in enforcing the law, or in appointing efficient officers to do the work. As soon as possible after the passing of the Crook's Act, and my appointment as License Inspector, I made a tour of the whole License District, which embraces a territory of 60x125 miles. I found fourteen places where liquor was reported to be sold illegally. Some of those who were engaged in illicit traffic pleaded ignorance of the law, and of the fact that they ought first to have secured a license. They had been selling liquor for years, and their right to do so had never been questioned. After the new law had been explained to them some took out licenses, while the others, with one exception, gave up the business. The one who continued to sell, after being several times warned, was fined, and, failing to pay the fine, served a term in jail, which seemed to have had a good effect. I have made a tour of the District many times since, and I do not think there is a single individual engaged in illicit traffic to-day.

Answer to Question 2.—There has been a great improvement in the quality of tavern accommodation under the new Act, which may be attributed to the fact that an applicant for a license knows that unless his accommodation is up to the standard his application will not be entertained.

Answer to Question 3.—In reply to this question, W. C. Mahaffy, Esq., barrister, of Bracebridge, says:—"I am fully of opinion that the hotel-keepers at the present day exercise a vigilance in the observance of law and order which is immeasurably superior to that exercised by them prior to the present Act. In fact, one might say that 'old things have passed away,' inasmuch as now peace and quietness prevail almost without exception at those places which formerly were the scenes of periodical disturbances of the peace. I think there can be no comparison between the two eras." Others have expressed opinions which coincide with the views expressed in Mr. Mahaffy's letter to me.

Answer to Question 4.—The reply to question three will also apply to question four.

Answer to Question 5.—From actual experience, I can say that there has been an improvement in the standing and general qualifications of holders of tavern licenses under the new Act.

Answer to Question 6.—I have taken pains in ascertaining the feeling of the people on the subject, and I find that the new law is gaining in popularity. Hotel-keepers agree with the general public in expressing approval of the new law, though in outlying sections some think the fee of sixty dollars is too high.

Answer to Question 7.—Under the new Act I don't think hotel-keepers harbour confirmed drunkards to the extent they did under the old Act; as such a course, they well know, would give an Inspector a bad opinion of the house. Besides, as there are fewer hotels in proportion to the population under the new law, it is but reasonable to suppose that there is less drinking. I am quite certain that there is less drunkenness now than formerly.

Answer to Question 8.—There have been fewer infractions of the law during the present license year than during any of the previous license years since the passing of the Crooks' Act. Hotel-keepers and the public generally now have a better knowledge of the requirements of the law than during previous years. The new law was favourably received at first, and has yearly grown in favour.

CARLETON.

Answer to Question 1.—The number of persons engaged in illicit traffic is less than one-fourth of those formerly so engaged.

Answer to Question 2.—There is a very marked improvement in the quality of tavern accommodation.

Answer to Question 3.—The law is much better observed than formerly, especially in reference to early closing and to Sabbath traffic.

Answer to Question 4.—The offence to which licensed shop-keepers are most liable is selling by the glass. This practice is very much reduced.

Answer to Question 5.—There is quite an improvement in the general qualifications and standing of persons holding tavern licenses.

Answer to Question 6.—The general public are evidently very much in favour of the present law. Principal objection comes from municipal men on account of loss of patronage.

Answer to Question 7.—Much less liquor is drank at the bar than formerly, and the practice of treating is greatly reduced.

Answer to Question 8.—The requirements and provisions of the License Act appear to be much better understood and more properly observed now than in the license year 1876-7, and the improvement seems to have been gradual from year to year up to the present time.

CORNWALL.

Answer to Question 1.—Since the commencement of the present license year I have laid four informations, and in each case secured a conviction for selling without license. In two of these cases the offences were committed in temporary booths erected on a day of a great influx of people into the town, and the traffic therefore had only been carried on in these places but a very few hours. In the other two cases the parties had been under my surveillance for some little time before I succeeded in obtaining information upon which to convict them. At the present time I am not in possession of any information that would lead me to believe that there are any houses in which liquor is being sold without license. It would be difficult to obtain anything like correct information in reference to the illicit traffic under former Acts. That liquor was sold illicitly under former Acts I am quite positive; but as to the number of persons engaged in it, or the extent to which it was carried on at various periods, I cannot with any degree of certainty say. The changes brought about by the present License Act—the lessening of the number of taverns, the increase in the license fee (which in one municipality in this District was fixed at \$200 the first year under the present Act, and has been continued at that figure ever since), and other praiseworthy and highly beneficial restrictions, which render it more difficult to obtain licenses than formerly, it would only be reasonable to suppose would cause some persons unable to obtain licenses to make an effort to sell without such license. Still, notwithstanding these changes, the illicit traffic did not obtain to any great extent in this District. Very few persons undertook to engage in the illicit traffic, and those who did were promptly punished, and forced out of the business.

Answer to Question 2.—There has certainly been a very decided improvement in this respect, and a greater interest appears to be taken by our hotel-keepers in providing good accommodation.

Answer to Question 3.—The observance of law and order by hotel-keepers under the present Act has been very satisfactory. Although there have been breaches of the law at times (and possibly some which did not come under my notice), still I am able to say, from my own personal knowledge, as well as from the opinions of others, that there has been a most marked improvement in this respect.

Answer to Question 4.—My observance in reference to hotel-keepers will apply with equal force to shop-keepers.

Answer to Question 5.—In reference to the personal qualifications of holders of tavern licenses, I believe there has also been a very substantial improvement. The Commissioners have always attached considerable importance to the personal qualifications of applicants. The holders of licenses in this District at the present time are all people of respectability and good standing in the place.

Answer to Question 6.—I hear no complaints in reference to the change from the old to the new law, and believe the public generally are satisfied with the change.

Answer to Question 7.—There has been a very apparent improvement in the drinking habits of the people during the past few years. Various causes have doubtless assisted in this, but I am fully convinced that the present license law has contributed very materially to the improvement indicated in this most desirable direction. The custom of treating at bars is still indulged in to some, I may say, considerable extent, more particularly in town, where people generally are brought together in larger numbers, and where hotels are more easily accessible than in the country. I believe, if this custom was entirely abandoned by the people, the bar business of hotels would be materially reduced.

Answer to Question 8.—As was to have been expected, there was a larger number of convictions during the first year under the present Act than in any subsequent year. Since that year the number of convictions have not varied much. Exceptional causes will doubtless cause a larger number of breaches of the law in some years than in others. On the whole, I believe there has been a gradual improvement in the general working of the act during the several years it has been in operation.

RUSSELL.

Answer to Question 1.—In some townships of this District illicit dealing has almost entirely disappeared, especially where there is a pretty strong temperance element, who help the Inspector to get the necessary evidence. In other parts, where this is wanting, we cannot make so favourable a report. But even where it is carried on it has to be done so stealthily that comparatively little is sold, and that only to known persons.

Answer to Question 2.—The quality of tavern accommodation has considerably improved, many having made necessary improvements.

Answer to Question 3.—As to the observance of law and order by hotel-keepers, perhaps in this, more than anything else, is there a marked improvement. Under the previous Acts there was neither, and it was so difficult to get redress that few made the attempt, while under the present Act redress is had whenever complaint is made, therefore they are often made under almost every phase of the Act.

Answer to Question 4.—No shop licenses have been issued in this District.

Answer to Question 5.—The standing and personal qualifications: Under this heading the improvement is not so marked, although there is considerable. In most cases they are the same parties who kept years ago as now.

Answer to Question 6.—Public opinion, as far as can be ascertained, is favourably impressed by the present Act, so much so that many leading temperance men and prohibitionists have expressed themselves to me, that should a move be made to submit the Canada Temperance Act in this License District that they would oppose it, believing that the present Act is all that can be successfully enforced, and all that the people are prepared for yet.

Answer to Question 7.—As to the drinking habits of the people in this District, temperance principles are steadily advancing, consequently less drinking. And there being

fewer taverns under the present Act, there are less facilities for drinking. But I cannot say that the custom of treating at bars, though less frequent, is to be attributed to any other than the above causes.

SOUTH RENFREW.

Answer to Question 1.—The number of persons engaged in the illicit traffic of liquor is not by any means equal to the number engaged in it previous to the time the present liquor law came into force. In this License District there are few, if any, persons engaged in the sale of liquors, in taverns or shops, without a license—in fact liquor is not sold in any store or shop in this Riding without the license therefor.

Answer to Question 2.—The tavern accommodation is far superior since the present Act came into force, and tavern-keepers in rural districts now look to the necessity of securing good accommodation, a fact which they seemed to ignore before the existence of the present law.

Answer to Question 3.—Licensed hotel-keepers pay more attention to the enforcement of order and quietness for the last two or three years than they did previous to that time.

Answer to Question 4.—Shop-keepers in general observe the provisions of the present law very fully. Before the present law came into force drinking by the glass was almost as common in shops as in bar-rooms. This is not now the case.

Answer to Question 5.—The standing, personal qualifications and respectability of the holders of tavern licenses are superior to that compared with same during former laws.

Answer to Question 6.—Public opinion regarding the change from the old to the new law is, I think, universally in favour of the new law.

Answer to Question 7.—Drinking generally and treating at bars has undoubtedly decreased under the present law.

Answer to Question 8.—The longer the present Act is in force the more satisfaction it appears to give. During the first and second years of its existence people in small villages and country places complained bitterly of the license fees being too high, and they tried to evade taking out licenses by all possible means. Now this feeling has subsided, and, as there are fewer places in which liquor is sold, the owners of them take out their license cheerfully. This is especially the case for the past two years.

WEST NORTHUMBERLAND.

Answer to Question 1.—I have been unable to gather the number so engaged under the old law, but I am informed there were some, but never any prosecuted. At present there are none that I am aware of in this District.

Answer to Question 2.—Under the old law, any person, qualified, or unqualified, as to the duties of a hotel-keeper, with the slightest pretensions to accommodation, was licensed, the result being a class of drinking places which were a disgrace to the country. Under the new law the idea has been inculcated throughout this District that whoever furnishes the most superior accommodation for the public among the applicants for licenses, irrespective of political or religious creeds, would be licensed. The idea has been more than realized. From parties who are continually travelling through the country I am informed, and believe, that the hotels of West Northumberland in size, cleanliness, and order, will compare favourably with those of any District in the Province.

Answer to Question 3.—Under the old law, that was no observance of the Saturday night or Sunday law whatever, some hotels selling as much liquor on Sundays as on Saturdays. Now, the statutory regulations regarding Saturday nights and Sundays are closely observed.

Answer to Question 4.—The five licensed shop-keepers of this District keep their shops well, and observe the law strictly.

Answer to Question 5.—The standing and character are very much higher. Of the twenty-seven hotels licensed, seventeen are owned by the parties conducting the hotel business therein, and the ten under long leases; and it has become an understood fact, that there is as much personal qualification required to manage a hotel successfully, as any other business.

Answer to Question 6.—There is no desire for a return to the old order of things. Political opponents concede that the change is for the better, while the extreme temperance men seem to be satisfied that the present system cannot be improved, except by prohibition; and moderate men deprecate the idea of handing back the control of the licensing system to the municipal councils.

Answer to Question 7.—I am convinced firmly that there is not the amount of money to be made in the hotel business of this District now that there was formerly. Their expenses may have increased slightly, but with two exceptions, in the Town of Cobourg, complaints are continually made that they are not making the money they used to. I know at present several cases where parties owning the property wish to sell out, but cannot find purchasers; a few years ago they would not have gone begging for buyers so long. The moral tone of the people is growing higher in this respect, and less drinking is the result. The custom of treating at the bars is decreasing rapidly in town and country. This is specially noticeable in all the hotels in this District, as the keepers have now small private rooms where their customers retire to get their drink by themselves, instead of standing at the bar and asking all they are acquainted with in the bar-room to join them in drinking. That there is less drinking, that it is carried on more privately, less exposed to the public gaze at the open bar, with less expense to those indulging in it, and with decreased receipts to the hotel-keepers, cannot be denied. I cannot think that the "private room" was originated by the hotel-keeper, but was the demand of their patrons. I think the time will come when the bar-room will be the smallest and least attractive room in the hotel.

NORTH VICTORIA AND HALIBURTON.

Answer to Question 1.—During the three years that I have been the Inspector for North Victoria and Haliburton, only six persons have been known to traffic in liquor without a license, each of whom has been fined and prevented from further engaging in the traffic, with one exception, and he is about to be dealt with. It was notorious that, under former regulations, liquors were sold openly without a license. In many cases the unlicensed dealers controlled the municipal elections, and the Inspector closed his eyes against the traffic.

Answer to Question 2.—The quality of the tavern accommodation is much improved. Under the present system, no tavern is licensed without having the requirements of the law. When the present law came into force there were about thirty-eight places, licensed and unlicensed, in which liquors were openly sold; several of these did not apply to the Commissioners, others applied, who were refused—some because of want of accommodation, some because of character, others because of a sufficient number having been granted to meet the requirements of the public. The Commissioners for my District, instead of licensing thirty-eight, usually grants from 23 to 25. We find this number ample to meet the requirements of the public.

Answer to Question 3.—I am sorry to say that very few tavern-keepers keep the whole law; yet, as a general thing, there is not so much open violation of law as formerly.

It is an unusual thing to see a man under the influence of liquor in my District on Sunday, and even on Saturday night. It is very rarely that a man is seen *drunk*; nor are persons allowed to be drunk on the premises, as formerly, for a week at a time. I am frequently asked to forbid liquor to be sold to certain parties, and although I have exercised my authority in a number of cases, I have almost invariably found the tavern-keepers obey the injunction, and through this much misery is saved. I must therefore report a very great improvement in the observance of law and order in my District.

Answer to Question 4.—I have only had two licensed shops in my District, and there is but one now. The law is well observed; no drinking on the premises, neither in the back shops or the cellars, as formerly.

Answer to Question 5.—The standing of tavern-keepers is very much better than formerly, for the bond now taken is signed by parties known to be good, so far as reputation goes; and in every case I make my applicants show that they are the *owners* of the business.

Answer to Question 6.—I am satisfied that public opinion favours the present law, and does not desire a return to the old state of things. Constituting the Inspector the public prosecutor, and directing that all complaints shall be confidential, gives standing and respect to the law.

Answer to Question 7.—Although it is undeniable that there is much drinking, yet drunkenness is not so frequently seen as formerly. There is very much less treating than formerly, especially by the landlords. Whether because of the great adulterations of liquors or otherwise, people seem satisfied with fewer drinks than formerly; and I think that the closing of all bars at 11 o'clock on all nights except on Saturday, and on that night at 7 o'clock, has a salutary influence, compared with former years.

Answer to Question 8.—As a matter of course, when the law came into force in 1876, many persons who had been selling a cracker for four cents, and giving away a glass of whiskey into the bargain, and who sold whiskey under the name of pop and other devices, who knew that before a conviction could be secured proof of the actual sale of the real stuff must be given, did not believe that the law was in earnest, and have found that the present law means something, and compared with that of former years is much more efficient. In my opinion, a few more amendments are necessary for the complete working of the present law, which I would with pleasure submit to the Honourable the Provincial Secretary. I am satisfied that each year gives more strength to the law, especially in those Districts where the Inspectors do their duty. I must bear testimony to the very firm and disinterested manner in which the Board of Commissioners for the County of Victoria have at all times performed the duties that have devolved on them, and very much is due to them for the manner in which the law has been carried out in my District.

GLENGARRY.

Answer to Question 1.—It is difficult to make this comparison, as no information or statistics can be obtained from which it is possible to estimate the extent of the illicit traffic before 1876. The small number of convictions which were had for this offence under former Acts, as shewn by the returns in the office of the Clerk of the Peace, and by the credits for fines in the books of the township treasurers, may be evidence either that the law was not infringed or that it was not rigidly enforced. Previous to 1876, several licensed houses in this District were very deficient in accommodation, and it was not an uncommon practice for tavern and shop-keepers to do business for the greater part of the year, in some instances for a whole year, under licenses upon which only the Provincial duty had been paid. The change from this system to one under which it is necessary for all holders of licenses to be

in possession of proper accommodation, and to pay the full amount of the duty before the issue of a license, forced several owners or occupants of old taverns out of the legal business and gave a temporary stimulus to the illicit traffic. The number of persons engaged in such traffic, however, has never been large, and is probably smaller at present than for some years.

Answer to Question 2.—The quality of tavern accommodation has improved under the new law.

Answer to Question 3.—There is undoubtedly a better observance of law and order by hotel-keepers than at any previous time.

Answer to Question 4.—There is a better observance of law and order by shop-keepers than at any previous time.

Answer to Question 5.—With the exception to those before referred to as having been forced out of the business, a very large proportion of the tavern-keepers who held licenses in this District previous to 1876 continue to hold licenses up to this date.

Answer to Question 6.—As far as I am able to judge, the weight of public opinion is decidedly in favour of the new law.

Answer to Question 7.—Except as regards drinking during prohibited hours, I am not aware of any change in the drinking habits of the people or in the custom of treating at bars.

Answer to Question 8.—The present working of the Act is satisfactory as compared with any preceding year. The general public, and particularly holders of licenses, have become familiar with the working of the law, and understand that every infraction of it which comes to the knowledge of the Inspector will be prosecuted. To this is chiefly due the decrease in the number of the prosecutions in the years 1879-80 (7) and 1880-1 (3) from the number in the years 1877-8 (13) and 1878-9 (12), though it may in part be ascribed to the greater secrecy practised in making illegal sales and to increased difficulty in obtaining information. The License Commissioners, too, have latterly been much aided in their work by the experience which has been acquired in working the law and a better knowledge of the wants of the different sections and of the standing and personal qualifications of the holders of licenses. The early period at which the distribution of the License Fund is made, and the information furnished to the municipalities interested, may also be referred to as contributing to the satisfactory working of the Act.

THUNDER BAY.

Answer to Question 1.—In this new and growing country, five years ago, it was believed that any person could obtain a license to retail liquor, the only requirement being that the proper fee—a small one—should be paid to the Issuer. Since that time, notwithstanding the population has been greatly augmented, instead of (as I am informed) 30 houses licensed to retail liquors in this District, there are at present only 12, viz., 9 taverns and 3 shops; and notwithstanding the great reduction of licenses granted, illicit sale has been so promptly punished that only one person has been even suspected of selling without license during the current year.

Answer to Question 2.—The accommodations of the present taverns are, for the most part, excellent, and in all are greatly superior to those afforded by taverns in 1875.

Answer to Question 3.—There is a fair observance of law and order by hotel-keepers—much in advance of the year 1875.

Answer to Question 4.—Shop-keepers, too, have desisted from dram-selling.

Answer to Question 5.—In reducing the number of licensed houses, the Commissioners have kept in view the survival of the fittest; the effect has been good.

Answer to Question 6.—None but disappointed applicants complain of the change.

Answer to Question 7.—I do not think that the resident population is as much given to tipping as formerly, but I believe treating at bars is still a great evil.

BROCKVILLE AND SOUTH LEEDS.

Answer to Question 1.—Cannot say how many, but think there is a decided improvement, but believe that there is some illicit traffic in those municipalities where the Dunkin Act is in force.

Answer to Question 2.—There is a great improvement in the rural districts, but not so great in towns.

Answer to Question 3.—The observance of the present law is fully as good as the old one, and believe in most of the municipalities it is better observed.

Answer to Question 4.—The law is better observed in town and country than heretofore.

Answer to Question 5.—I believe that they are a better class of persons, particularly in the townships or country.

Answer to Question 6.—Public opinion is in favour of the present law, and I consider that with some little changes it would satisfy the public. There is a strong desire by many that the law should be changed so as to require every hotel-keeper in towns to furnish good yard and stabling for horses. There is little change in the habits of the people in towns.

Answer to Question 7.—In townships there is not so much drinking as formerly, but cannot say that the change is attributable to the law. The customs and habits of the people improve with their better education.

Answer to Question 8.—The present License Act works well, and would work much better if the law was more stringent, with regard to issuing licenses to houses that might be termed saloons. Grave doubts exist in my mind whether or not such houses should be permitted at all. They do no good, and in towns are simply places for drinking and gambling. While taverns in my opinion in towns and villages, should have proper stable accommodations, saloons should be converted as much as possible into eating-houses, and have sleeping accommodations also. This would be a great advance on the present system, and give general satisfaction.

ALGOMA.

Answer to Question 1.—The number of persons engaged in illicit liquor traffic under the present Act is not only much less but may be said not to exist at all as far as this District is concerned. Formerly such traffic was a means of livelihood to a large number of persons, who carried it on without interruption from year to year.

Answer to Question 2.—The quality of tavern accommodation is improved in every respect.

Answer to Question 3.—A hotel-keeper now considers himself a very respectable member of society, who often takes a very leading part in politics, as well as in the various assemblies, no matter how great their claims for respect, such as regattas, Orange and Masonic affairs. He, therefore, generally keeps a most orderly house—which was not the case under former Acts. This refers to this District and may not be true of cities.

Answer to Question 4.—The reply to Question 3 applies to this. Shop-keepers are greatly addicted to selling liquor by the glass or to treat their customers; this is their great, perhaps their only, breach of the law, but they are well watched by the tavern-keepers for their own protection. Under former Acts this was not the case, as where there were two or three hotels no one tavern-keeper had any motive in stopping the sale by the shop-keeper.

Answer to Question 5.—The reply to Question 3 partially answers this. But further: as Government Commissioners choose from among applicants those having influence in the community, the personal qualifications and standing of hotel-keepers are necessarily elevated far beyond those under former Acts.

Answer to Question 6.—Public opinion is decidedly in favour of the change from the old to the new law.

Answer to Question 7.—The people still treat at the bars, but I have seen no case of excessive drinking there. If attempted, the hotel-keeper, considering the good name of his house at stake, immediately stops it.

Answer to Question 8.—The late License Inspector having left no record, I have no means of answering this question, except from hearsay, which would be worthless information.

APPENDIX Y.

CIRCULAR AND FORM OF RETURN whereby the Inspectors were required to report as to the political leanings of licensees and applicants for licenses, 1880-1.

PROVINCIAL SECRETARY'S OFFICE,
LICENSE BRANCH,

TORONTO, 25th August, 1880.

SIR,—As articles have recently appeared in some newspapers, charging or insinuating that the Boards of Commissioners and Inspectors have shewn political favoritism in granting licenses during the current license year, you are requested to fill in the enclosed blank, and return it to this Department at your earliest convenience.

I have the honour to be, Sir,
Your obedient Servant,

ARTHUR S. HARDY,

REPORT

OF THE

LIBRARIAN OF THE LEGISLATIVE ASSEMBLY

OF THE

PROVINCE OF ONTARIO.

To the Honourable the Legislative Assembly of the Province of Ontario :—

The Report of the Librarian on the state of the Library, respectfully represents :—

That, by the completion of the Consolidated Catalogue, the Library will be rendered still more useful for the purposes for which it was called into existence. The new Catalogue will be found to contain all the books which have been purchased, or have been presented as donations, from the organization of the Library to December, 1880. It may be considered necessary, in this place, to point out some of the characteristics of the Catalogue.

The books, as heretofore, will be found classified according to subjects. But a new arrangement has been introduced. Under every subject the names of the authors have been placed in alphabetical order. It is hoped that this will be found to facilitate readiness of reference in the use of the Catalogue. The alphabetical method begins on page 14, and thence is continued throughout the volume. In the old Catalogue, the alphabetical arrangement of the names of authors was confined to the departments of "Biography" and "Belles Lettres."

To augment, still further, the usefulness of the Catalogue, there have been prepared an Alphabetical Index of Authors, and an Alphabetical Index of Subjects. Both these indexes will be found at the end of the volume. The difficult task of compiling, in their proper order, the various classes of books that make up the Catalogue, and of arranging the Alphabetical Indexes of Authors and Subjects, was performed by Mr. J. M. Watson.

In order to furnish an analytical exposition of the contents of the Library, those classes of books which stand in relationship to each other, though they differ in special information have, in the Catalogue, been classified apart. "Physical Science," for instance, has been sub-divided into the classes of Astronomy, Meteorology, Geology, Physiology, Anthropology, etc. The Department of "Geography, Voyages and Travels" has been sub-divided into the classes, Europe, Asia, Africa, North America, etc. But, in order to provide for ready reference to such books on the shelves, each work has been arranged according to the surname of its author. Those whose names begin with "A" will be found on the top shelf; the other letters descend in alphabetical sequence.

The purchases of books made during the past year are incorporated in the new Catalogue about to be presented to the House. They are of a character suitable for a Library of Parliament. They comprise works bearing on Election Law, Constitutional History and Parliamentary History and Practice. The latest works on contemporary History have been

added to the collection. Special attention has been given to publications bearing on the history of Great Britain, and relating to Canada and the other Colonial possessions of the Empire.

The section devoted to the United States, will be found to comprise the latest works dealing with the political and economical problems which are engaging the interest of the public men of that country, and attracting, everywhere, the attention of students of the science of Government.

The department of "Jurisprudence" has not been overlooked. The same remark holds good with respect to the important sections of "Political and Social Science," "Useful Arts and Manufactures," "Engineering," "Agriculture and Horticulture."

There have been added to the department of "Physical Science," all the more recent works bearing on the new discoveries and developments in Astronomy, Meteorology and Geology.

The section comprising "Medicine and Chemistry" has been considerably augmented. The same may be said in respect to the department of "Geography, Voyage and Travels."

In "Belles Lettres," numerous additions have been made. While preserving the original and distinctive character of the Library, as a collection of works to be made useful for the practical purposes of legislation, the House, during its last Session, acting on the recommendation of the Library Committee, deemed it advisable to sanction the purchase of the writings of some of the great masters of English fiction. Amongst the works of this description, which have been obtained during the year, are those of Dickens, Lord Lytton, Disraeli and Fenimore Cooper; also, a series of tales from Blackwood. The works above mentioned, together with those of Sir Walter Scott, Thackeray and George Elliot, previously purchased, comprise what may, perhaps, be styled, the classics of modern English fiction.

It may be stated, in this place, that there was purchased, during the past year, on the recommendation of the Library Committee, and with the approval of the House, a re-print of the London *Punch*. The re-print begins with the first year of *Punch*, 1841, and ends with 1874. The numbers from 1874 to the present time are in the Library, which thus possesses a complete edition of the publication which has been a satirist of English political and social life for the better part of half a century.

The undersigned would respectfully call the attention of the House to the urgent necessity that exists for making provision for the better accommodation of the collection. The Library is growing daily, and, with the increased demands of legislation, must continue to increase. At the present moment, the space allotted to the books is fully occupied; in some of the sections there is over crowding. This remark applies with special force to the Provincial and other newspapers.

The Library possesses an invaluable collection of the Newspapers of Ontario. Some of the earliest issues of the press of the old Province of Upper Canada, are here represented and preserved. Complete files of the great leading Dailies, on both sides of politics, are also amongst the acquisitions of the Library. It is needless to say that, in these Newspapers the future historian, in building up his narrative of the social and political progress of the Province and Dominion, will find his most valuable material. Further, the contemporary Journals are in continual use for the purposes of reference. For all these reasons, the undersigned would beg leave to urge that immediate measures be taken to provide for the better security of the Newspaper collection. At the present time accommodation cannot be found for all of them in the Library. They are dispersed hither and thither, as space happens to be obtained for them. The result is that the portion of the collection which is outside of the Library, and removed from direct supervision, is liable to mutilation and to other accidents which may result in their destruction.

The donations to the Library during the year 1880 were as follow :—

From HON. CHARLES CLARKE, Speaker :—

Canadian Pamphlets.

Chronicles of Canada : A Record of Robert Fleming Gourlay. No. 1. Concerning the Convention and Gagging Law, 1818. St. Catharines, 1842.

The Canadian Review and Magazine. Montreal, 1826.
 Minutes of the proceedings of the Second Convention of Delegates of the British American League, held at Toronto, 1849. Toronto, 1849.
 Federative Union of the British North American Provinces. By Henry Sherwood. Toronto, 1851.
 The Seigniorial Tenure in Canada, and Plan of Commutation. By J. C. Tache. Quebec, 1854.
 The Canadian Repealer's Almanac for 1856, containing Statistics, etc. By William Lyon Mackenzie. Toronto, 1856.
 An Almanac of Independence and Freedom, for 1860. By William Lyon Mackenzie. Toronto, 1860.

Emigration and Colonization. By Thomas Rolph.

From DAVID THOMPSON, Esq., M.P. for Haldimand :—

A large and valuable donation of Official Documents belonging to the old Province of Upper Canada, and the late Province of Canada ; in all, 49 volumes.

The number of books now in the Library, exclusive of the Official Documents of the late Province of Canada, the Confederation and its various Provinces, is 11,500 volumes.

Respectfully submitted,

S. J. WATSON,

Librarian.

ANNUAL REPORT

OF THE

SCHOOL OF PRACTICAL SCIENCE, TORONTO.

To His Honour the Honourable JOHN BEVERLEY ROBINSON,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR :

The undersigned respectfully begs to submit the accompanying Annual Report of the School of Practical Science, Toronto, for the year 1880.

I have the honour to be,

Your Honour's

Obedient Servant,

ADAM CROOKS,

Minister of Education.

EDUCATION DEPARTMENT, ONTARIO,
TORONTO, 8th February, 1881.

To the Honourable ADAM CROOKS, &C., &C., Minister of Education.

SIR,—I have the honour to submit herewith the Report of the School of Practical Science, Toronto, for the year 1880.

1. The academic year of the School commences in October of each year; and the Annual Report prepared at this date necessarily includes part of the work of two years: viz., the Easter term of 1879-80, and the Michaelmas term of 1880-81.

2. The following is a classified list of the students during the above named terms:

Chemistry :—

	Easter.	Michaelmas.
Students from University College	122	130
Regular Students in Engineering	11	12
Special Students—		
Veterinary	40	0
Medical	25	5

Biology :—

Students from University College	48	60
Special Students—		
Medical	26	18

Mineralogy and Geology :—

Students from University College	37	46
Regular Students in Engineering	7	7

Engineering :—

Regular Students	11	13
Special “	6	3

Mathematics :—

Regular Students in Engineering	11	18
Special Students	4	3

3. The fees derived from the students proceeding to a Diploma of the School of Engineering, and paid to the Provincial Treasurer, amounted to \$385.

CHEMISTRY.

4. The students of the School of Practical Science and those of University College attend the course of lectures given by Dr. Pike on the Theory of Chemistry. In addition to this they are engaged in practical instruction and laboratory work, under Dr. Pike Dr. Ellis, for thirty-six hours each week. A course of elementary lectures on Theoretical Chemistry, given by Dr. Ellis during the Easter term, adapted for students entering on the study of the science, has hitherto been chiefly taken advantage of by the students of the Veterinary College; but with greater publicity given to the advantages which it offers, it is anticipated that others will avail themselves of the opportunity. The greatly increased provision for practical instruction and laboratory work, consequent on the facilities which the School of Science now furnishes, receives illustration from the fact that, whereas the College students formerly devoted in all only about thirty hours to practical instruction in one year of their undergraduate course, it now forms an important branch of study throughout the whole course of four years.

BIOLOGY.

5. In this department Professor Ramsay Wright includes theoretical and practical instruction in Zoology and Botany; and, in addition to the regular courses of lectures given to the students of University College, he devotes six hours each week to a special course of instruction for the students of the School of Science.

MINERALOGY AND GEOLOGY.

6. Professor Chapman's instructions in the branches of Mineralogy and Geology include practical teaching in the determination of minerals, the use of the blow-pipe, and assaying, in addition to the lectures on the theory of the science.

ENGINEERING.

7. In this department Professor Galbraith's Lectures embrace Civil, Mechanical, and Mining Engineering. The various branches of instruction in descriptive geometry, strength of materials, theory of construction, and applied mechanics, are of special value to intending engineers, architects, and surveyors. Practical instruction is also given in drawing and in surveying, including field work.

MATHEMATICS AND NATURAL PHILOSOPHY.

8. Professor Loudon and Mr. Baker jointly carry out a comprehensive system of instruction, embracing the various branches included in the Department of Mathematics and Natural Philosophy. The physical laboratory is now furnished with a valuable collection of instruments for verifying the laws of dynamics, sound, light and heat. The practical work is at present limited to the subject of acoustics; but the laboratory when completed is intended to place within reach of the students in this department ample opportunity for gaining a practical acquaintance with the processes required for the determination of a large number of physical constants; and with the mode of con-

ducting physical experiments generally. It is anticipated that the work of instruction next year will be so far extended as to embrace all the branches of physics except electricity.

9. In carrying out the work in the various departments as here specified, the time of the various instructors is so largely occupied as to leave little or no time available for supplementing the instruction carried on from October to May by any additional lectures; but in some of the branches now taught the work already carried on may be made available to a larger number. Plans are under consideration for additional lectures, embracing instruction of a more elementary character, at the end of the regular courses; and the attention of the Board is anxiously directed to secure the increased efficiency of the School of Practical Science, and to provide the best means for adapting its instruction to students of every class.

All which is respectfully reported,

DAN'L. WILSON,
Chairman.

STATEMENT

Of the Returns of all Fees and Emoluments received by the Registrars of Ontario for the year 1880, made in accordance with the provisions of Section 97 of Chapter III., Revised Statutes of Ontario.

By Command,

ARTHUR S. HARDY,
Secretary.

“ 500 “ 1,000—	Kingston City, Parry Sound District.
“ “ 500—	Haliburton, Nipissing, Algoma District.

REMARKS.

ALGOMA DISTRICT.—The operations of Loan Companies on Manitoulin Island have been the cause of increased registrations, as the number of transactions between private parties, in the way of land transfers of all kinds, is much under last year. The number of mortgages to the several corporations is this year seventy-two.

CARLETON.—The registrations this year are 603 instruments less than in 1878, and 377 less than last year (1879); can only account for this as a result of the general depression and depreciation in values—difficulty to further mortgage or sell to an advantage.

GREY, North Riding.—The abundance of money seeking investment through the Loan Companies—a steady shrinkage in the price of money—the multiplicity of agents, and the persistency with which they press loans on the farmers are the principal causes of the comparatively large business done by this office—the chief of the above causes being the decline in the rate of interest causing a renewal in the same or some other company at a reduced rate of interest. There has been very little buying and selling of lands during the past year.

HALIBURTON.—The affidavit does not include fees received prior to April 5th, 1880; all prior to this for 1880, were received by Edward Noice and deputies, my predecessors in office. Statement of fees prior to April 5th, 1880, are taken from entries made in Receiving Book from close of year 1879 to above date, affidavit includes all subsequent entries.

KINGSTON CITY.—The almost cessation of building operations have no doubt tended to decrease the fees this year.

MUSKOKA DISTRICT.—The increase in fees this year can be attributed to the Metropolitan P. B. Society having assigned all their mortgages in this District to the Real Estate Loan and Debenture Company; the Registration of such assignments and searches coming to over \$155.00; and all insolvents' estate sold, in which over 300 lots had to have abstracts and searches, bringing in fees to the amount of \$175.00; and a party making a mortgage, in which title to 280 lots had to be gone into, brought \$150.00; consequently the increase to amount of \$455.00 in this year's business, is one that cannot reasonably be expected to take place again.

NORFOLK.—Received from Francis Logh Walsh, Registrar of the County of Norfolk, \$389.20, as the proportion of fees received by him as such Registrar (as per annexed return), during the year 1880, which, under Statute 35 Vic., cap. 27, he was not entitled to retain to his own use. Signed in duplicate, Treasurer's Office, Simcoe, 15th January, 1881. Henry Groff, Treasurer.

OTTAWA CITY.—The small amount of fees for the past year is owing to the continued state of depression in all land transactions in the City of Ottawa, the greatness of such depression being seen by comparing the returns of 1874 (which amounted to over \$4,400.00) with the present return.

RENFREW.—In excess over last year, \$44.35. I don't know any particular reason for the small increase.

WELLINGTON, South and Centre Riding.—A slight increase in the number of instruments registered and in the number of abstracts, making the fees amount to \$361.00 more than in the year 1879.

OXFORD.—113 documents less than last year.

THE ANNUAL REPORT

OF THE

COUNCIL OF UNIVERSITY COLLEGE,

T O R O N T O,

FOR 1880-81.

ANNUAL REPORT

OF THE

COUNCIL OF UNIVERSITY COLLEGE, TORONTO.

To *His Honour the Honourable* JOHN BEVERLEY ROBINSON, *Lieutenant-Governor of the Province of Ontario, Visitor of the University of Toronto, and University College.*

MAY IT PLEASE YOUR HONOUR :

The President and Council of University College beg leave to present to your Honour, as Visitor on behalf of the Crown, the following Report on the condition and progress of the College for the year ending December 31st, 1880.

Since the Council presented their last Report important changes have been made on the College staff. The Rev. Dr. McCaul, after fulfilling for thirty-three years the duties of Classical Professor, and during the same period successively holding the offices of Vice-President and President, has retired. The vacant presidency has been conferred on Dr. Wilson, the occupant for twenty-seven years of the Chair of History and English Literature; and Professor Maurice Hutton, B.A., a Fellow of Merton College, Oxford, and late Professor of Classics in Firth College, Sheffield, has been selected to fill the Chair of Classical Literature. At the close of the Michaelmas term in 1879, Professor Henry H. Croft, D.C.L., resigned the Chair of Chemistry and Experimental Philosophy, which he had occupied for thirty-seven years, and the vacancy was filled by the appointment of Dr. William Herbert Pike, M.A., Ph.D., a gentleman who, after completing his scientific training at the Universities of Vienna, Berlin, and Gottingen, and obtaining at the latter the degree of Dr. of Philosophy, was successively Assistant to the Professor of Physics in the Royal School of Mines, South Kensington; Demonstrator in the University Laboratory, Oxford, under Professor Odling; Science Tutor of Merton College; and Lecturer in Chemistry to University, Magdalen, Trinity and Worcester Colleges, Oxford.

The offices of Dean and Classical Tutor, rendered vacant by the resignation of Mr. Pearman, have been filled by the appointment of Mr. Frederick Austin Vines, B.A., of Baliol College, Oxford, a gentleman highly recommended for his acquirements, and for special qualifications fitting him for the responsible duties of Dean of Residence.

The Council confidently anticipate that the changes thus made on the College staff will conduce to the efficient carrying out of the work of the Institution, and promote the special objects aimed at in the organization of the Faculty with a view to overtaking the requirements of the University in all the departments embraced in the Faculty of Arts.

The number of students in attendance at University College at the close of the academic year, 1879-80, was 324. At the commencement of the Michaelmas term in October last, 116 additional students were admitted, of whom ninety had passed in all the examinations required for matriculation in the Faculty of Arts, and 26 were received as matriculants. It may be of interest to the friends of the College, as a Provincial Institution designed to render the advantages of higher education and the privileges of

a university degree, accessible to all, to present the following synopsis of the localities from which the students at present in attendance on College lectures have come. This return includes under the head of Toronto some who have been induced to take up their residence for a time in this City with a view to avail themselves of the advantages which its educational institutions afford.

Toronto	70	County of Brant	6
County of York	24	“ Peterborough	4
“ Perth	21	“ Kent	4
“ Ontario	19	“ Essex	4
“ Oxford	16	“ Victoria	4
“ Bruce	14	“ Cardwell	3
“ Wellington	13	“ Elgin	3
“ Middlesex	13	“ Leeds	3
“ Huron	13	District of Muskoka	3
“ Wentworth	10	County of Renfrew	2
“ Carleton	9	“ Lanark	2
“ Grey	8	“ Russell	2
“ Lincoln	8	“ Norfolk	2
“ Peel	7	“ Prince Edward	1
“ Waterloo	7	“ Lennox	1
“ Halton	7	“ Dundas	1
“ Simcoe	7	“ Prescott	1
“ Durham	7	“ Haldimand	1
“ Northumberland	7	“ Lambton	1
“ Hastings	6		

These numbers include the whole of the student from within the limits of the Province. From beyond its bounds there are students from New Brunswick, Nova Scotia, Prince Edward Island, Manitoba, and from the United States.

At the Convocation held by the University on the 8th of June, 1880, the following degrees were conferred on students who had received their education in University College:—Sixty-two, in all, were admitted to the following degrees: 7 to the degree of Master of Arts, 2 to the degree of Bachelor of Medicine, and 53 to the degree of Bachelor of Arts. Since the reorganization of the University and College on their present basis in 1853, the degrees conferred in the Faculties of Arts, Medicine, and Law, on students trained in University College, have numbered in all 713, classified as follows:—LL.D., 4; LL.B., 23; M.D., 14; M.B., 44; M.A., 216; B.A., 412.

The graduates who thus completed their training in University College have included a considerable number who took high rank in the University Honor Lists, and have since given practical evidence of the value of the instruction they received. Of those who have distinguished themselves at the Bar, two of them—including the late Chief Justice Moss, whose recent loss is deplored alike by his Alma Mater and by the entire Province,—have filled high judicial positions. Others have taken their places in the Dominion and Provincial Parliaments. Fifteen of them are at present fulfilling the duties of principals, professors and lecturers, in the colleges and normal schools of this and other Provinces. Eighty-three are masters and teachers, including forty-five head masters in the collegiate institutes and high schools of the Province. Brief, therefore, as is the period which University College has thus far had for furnishing evidence of the fruits of its training, it can already appeal to results affording some satisfactory proof of its value as a Provincial Institution.

In the various branches of instruction embraced in the curriculum of the College, and included in the four years course, required by the University for the degrees in Arts, lectures are now given as follows, including practical instruction in the the laboratories and lecture rooms of the teachers of the sciences :

Classical Literature, embracing the Greek and Latin languages, by Professor Hutton, B.A., and Mr. F. A. Vines, B.A.

Oriental Literature, including Hebrew, Chaldee, Syriac, and Arabic, by Mr. J. M. Hirschfelder.

German, by Mr. W. H. Vandersmissen, M.A.

French, by Mr. Emile Pernet.

Italian, by W. Oldright, M.A., M.D.

Rhetoric and English Literature, by Professor D. Wilson, LL.D.

Logic, Metaphysics and Ethics, by Professor G. P. Young, M.A.

Ancient and Modern History, by Professor D. Wilson, LL.D.

Mathematics and Natural Philosophy, by Professor J. Loudon, M.A., and Mr. Alfred Baker, M.A.

Mineralogy and Geology, by Professor Chapman, Ph. D., LL.D.

Botany and Zoology, by Professor Ramsay Wright, M.A., B.Sc.

Chemistry, by Professor W. H. Pike, M.A., Ph.D.

In addition to the instruction thus given by the College Staff, arrangements now existing between the College and the School of Practical Science afford the students facilities for additional instruction from Dr. W. H. Ellis, M.A., M.D., in Practical Chemistry; and from Professor J. Galbraith, M.A., C.E., in Mechanical and Mining Engineering, Surveying, including Field Work and in Applied Mechanics. In the Department of Chemistry, the additional opportunities for instruction promise to be of great value. Owing to the facilities thus afforded, whereas formerly the time devoted to Practical Chemistry by the students in University College was limited to the last term in their fourth year, and amounted in all to about thirty hours of practical instruction throughout the whole course; the number of hours now devoted to this important branch of study will extend over fully 600 hours. Such increased opportunities for mastering this important science, alike in its theory and practice, cannot fail to beget valuable results hereafter.

By arrangements carried out with the approval of the Minister of Education, a supply of apparatus requisite for use by the students in the different branches of scientific instruction has been obtained, to be held as the property of the College, and to be maintained in permanency by a small fee charged to the students for their use. The instruction embraced in the various branches of the Natural Sciences required by the University, as now given in the College class room and laboratories, will thus be more comprehensive and of greater practical value to the student than it was possible to render it before such facilities were available.

Examinations were held at the close of each term during the past academic year, and honors and prizes awarded to the successful competitors in accordance with the results. The Honor Lists for the year 1879-80, along with a synopsis of lectures, prescribed courses of study, text books, and other details, will be found in the College Calendar for the present year, of which a copy is herewith appended.

All which is most respectfully submitted.

DAN'L. WILSON,
Pres.

RETURN

To an Order of the Legislative Assembly for copies of all Correspondence between the University of Toronto and any College or Collegiate Institute, respecting Affiliation, since 1873.

By Command,

ARTHUR S. HARDY,
Secretary.

PROVINCIAL SECRETARY'S OFFICE,
TORONTO, 4th March, 1881.

CORRESPONDENCE between the University of Toronto, and Colleges and Collegiate Institutes (since 1873) in the matter of Affiliation.

APPLICATION FOR AFFILIATION FROM THE TORONTO SCHOOL OF MEDICINE.

TORONTO, Dec. 18th, 1876.

To the Chancellor, Vice-Chancellor and Senate of the University of Toronto.

The memorial of the President and Faculty of the Toronto School of Medicine respectfully

SHEWETH :

That the Toronto School of Medicine has been affiliated with the University of Toronto since 1854.

That, for the purpose of reconsidering the whole question of Schools of Medicine, the Senate has reported to the Lieutenant-Governor in Council, that the affiliation of any Medical School, which is now assumed to exist, should cease.

That the Toronto School of Medicine has hitherto given every publicity to such affiliation:—1st. By inscribing on the entrance to its building its title "The Toronto School of Medicine in affiliation with the University of Toronto;" 2ndly. By issuing its tickets of admission to lectures under the same heading; 3rdly. By engraving the same words upon its corporate seal; 4thly. By using them in its annual announcement, and lastly, by causing all its advertisements to appear under the style and title of the Toronto School of Medicine in affiliation with the University of Toronto.

That a reference to the University awards will shew that of 257 students who have graduated in Medicine at the University of Toronto, between the years 1855 and 1875, no less than 236 were students of the Toronto School of Medicine.

That when these numbers are brought into comparison with those from other teaching bodies, it will be seen that of the 123 students who have received degrees in Medicine in Trinity College, only four have sought the Degree of the University of Toronto.

That while Victoria College has conferred her Degree upon 567 gentlemen, that institution has only contributed four graduates in Medicine to the University of Toronto.

That while Queen's College has conferred her own Degree upon 264 gentlemen, only three of these have sought the Degree of the University of Toronto.

That these figures demonstrate, conclusively, that the Toronto School of Medicine has observed the most perfect allegiance to the University of Toronto.

That if the Toronto School of Medicine had not supported the Provincial University by its influence, and by sending to it its students for graduation, it is respectfully submitted that the position and popularity of the said University, both in the Dominion and abroad, would not have been as great as they now are.

That the Toronto School of Medicine is eminently non-sectarian in its character, and recognizes no religious or political creed, class, or sect.

That the Toronto School of Medicine has no connection with any University other than the University of Toronto; that it has not the power of conferring degrees in Medicine, but exerts its whole influence in promoting the interests of the University of Toronto.

That the Toronto School of Medicine receives no aid, pecuniary or otherwise, from the Government, from the University of Toronto, or from any other University, but relies solely for its support upon the revenue derived from the fees of its students.

That there is no desire on the part of your memorialists to ask for themselves any advantages, which they would not cheerfully see accorded to any other institution, established and conducted upon a like basis.

That the Toronto School of Medicine has, by no act, merited the censure of Toronto University, but, on the other hand, has in the fullest manner, discharged all the duties which would have devolved upon a Faculty of Medicine endowed by the University.

Wherefor your memorialists pray that your Honourable Body will, at as early a date as possible, recommend that the Toronto School of Medicine may be admitted to re-affiliation with the University of Toronto.

And your memorialists, as in duty bound, will ever pray.

W. T. AIKINS, M.D.,

President, Toronto School of Medicine.

APPLICATION OF TRINITY MEDICAL SCHOOL FOR AFFILIATION.

TRINITY MEDICAL SCHOOL, April 7th, 1877.

To the Vice-Chancellor and Members of the Senate of the Toronto University.

GENTLEMEN,—I am requested by the Faculty of this Medical School, which has to-day been organized under its recently obtained Act of Incorporation, to apply for affiliation with the University of Toronto. The Faculty will endeavour to conduct the School, in its new position, with the utmost possible efficiency, so as to enable the students to fulfil, in every respect, the curriculum which from time to time may be laid down by the Senate.

I have the honour to be, gentlemen,

Your obedient servant,

W. B. GEIKIE,

Sec.-Treas., Medical School

UNIVERSITY OF TORONTO,
REGISTRAR'S OFFICE, 18th Dec., 1876.

SIR,—I have the honour to acknowledge the receipt of the petition of the Toronto School of Medicine, and to state that the same shall be laid before the Senate in due course.

Your obedient servant,

W. G. FALCONBRIDGE,
Registrar,

DR. W. T. AIKINS,
Toronto.

UNIVERSITY OF TORONTO,
REGISTRAR'S OFFICE, April 9th, 1877.

DEAR SIR,—I beg to acknowledge the receipt of your favour of 7th inst., enclosing application of Trinity Medical School for affiliation with this University.

I shall lay the same before the Senate at its first meeting.

Sincerely yours,

W. G. FALCONBRIDGE,
Registrar.

DR. W. B. GEIKIE,
Toronto.

UNIVERSITY OF TORONTO,
REGISTRAR'S OFFICE, June 13th, 1877.

SIR,—I have the honour to enclose herewith copy of Resolutions of the Senate, passed at a meeting held last night, with reference to the subject of medical affiliation.

I am instructed to enquire whether your school desires affiliation upon the terms therein suggested.

I have the honour to be, sir,

Your obedient servant,

W. G. FALCONBRIDGE,
Registrar.

DR. GEIKIE,
Secretary, Trinity Medical School, Toronto.

UNIVERSITY OF TORONTO,
REGISTRAR'S OFFICE, June 13th, 1877.

SIR,—I have the honour to enclose herewith, copy of the Resolutions of the Senate with reference to the subject of medical affiliations, passed at a meeting held last night.

I am instructed to enquire whether your school desires affiliation on the terms suggested.

I have the honour to be, sir,

Your obedient servant,

W. G. FALCONBRIDGE,
Registrar.

DR. W. T. AIKINS,
Toronto School of Medicine.

RESOLUTIONS REFERRED TO IN THE TWO PRECEDING LETTERS.

Resolved. Firstly. That no Medical School or College should be admitted to or continued in affiliation which is or becomes connected with another University, either as its Medical Faculty, or by its Professors or Lecturers being examiners for the Degrees, Honours, Scholarships or standing of another University, or its holding out in any way that its examination will be accepted by another University as entitling to Degrees, Honours, Scholarships or standing. Provided that this shall not preclude any one or more individual Professors or Lecturers, *bonâ fide*, becoming examiners in another University, the intent being that the Faculty of any affiliated College, or any part thereof, shall not be permitted substantially to conduct the examinations of their own students for Degrees, Honours, Scholarships or standing in another University.

Any school applying to be affiliated shall be informed of this regulation, and shall be required to enter into an undertaking to observe it, subject to the express condition that upon breach of such undertaking the statute shall be repealed and affiliation cancelled.

Secondly. That students shall be admitted to the ordinary examinations necessary for obtaining a Degree in Medicine in this University from all Medical Schools of good standing, giving such courses of instruction as the Senate shall, from time to time, determine, whether belonging to or not belonging to the Province, and even if falling within the class, to which it is in the last paragraph resolved that affiliation shall not be extended, and even if such candidates are, at the same time, undergraduates in another University.

Thirdly. That the statute relative to Degrees in the Faculty of Medicine shall be amended by requiring all candidates for a Degree to pass a matriculation examination, and annual examinations after matriculation, and by prescribing a uniform course for every candidate for the Pass Degree.

Fourthly. That, in the opinion of the Senate, the examination for Honours, Scholarships and Medals, while extended in the fullest and most liberal manner to students coming from any Medical School of good standing whether or not affiliated to this University, and whether or not affiliated to any other University, should not be open to those who are at the same time undergraduates or graduates in Medicine in another University.

UNIVERSITY OF TORONTO,

REGISTRAR'S OFFICE, Oct. 4th, 1877.

DEAR SIR,—A statute of the University, affiliating Trinity Medical School, was some time since duly passed by the Senate, and transmitted to the Provincial Secretary for the approval of His Excellency the Lieutenant-Governor. It has not yet, however, been returned to me with the approval of the Government.

Yours truly,

W. G. FALCONBRIDGE,
Registrar.

DR. W. B. GEIKIE,
Toronto.

NOTE.—The Registrar of the University regrets that he is unable to find amongst the records of the office the letters from the corresponding officers of the Schools of Medicine, stating that they accepted the terms of affiliation proposed by the Senate.

THE PETITION OF THE PRINCIPAL AND MASTERS OF THE HAMILTON COLLEGIATE
INSTITUTE,

To the Chancellor, Vice-Chancellor and Senate of the University of Toronto,

HUMBLY SHEWETH :

Whereas the course of study prescribed for High Schools and Collegiate Institutes by the Minister of Education now embraces all the work required for the first examination and first year in Arts of the University of Toronto ;

And whereas provision is made in the published curriculum of the said University by which the benefits of a scholarship may be postponed for one year.

And whereas there are, at present, a number of matriculated students living in Hamilton, some of whom are holders of scholarships for the present year, who desire to attend the said Institute whilst preparing for the examination of the first year, and who find it expensive to prepare at Toronto for an examination for which they feel ample facilities are afforded at home for doing the work.

And whereas the employment of the Masters of the said Institute in teaching the subjects of the first year in Arts, will in no way impair the efficiency of said Institute, but on the contrary, contribute largely to its success as a feeder to the said University.

And whereas the said Institute possesses the necessary equipment for enabling it to carry on the work for senior matriculation, and is already, as required by law, maintaining classes for that examination.

Therefore, it would, in the opinion of your petitioners, conduce to the best interest of said University and of University College, and in harmony with the general scheme of public education, to grant to the said Collegiate Institute, the privilege of allowing those of its students who pass the junior matriculation examination to attend classes in said Collegiate Institute, in order to prepare for the first examination and the examination required for first year.

Your petitioners will humbly pray.

(Signed), GEO. DICKSON, M.A.

J. C. L. ARMSTRONG, M.A.

P. S. CAMPBELL, B.A.

CHAS. ROBERTSON, M.A.

N. McKECHNIE.

W. M. SUTHERLAND, B.A.

J. W. SPENCER, Ph. D., F.G.S.

D. K. CLARKE, B.A.

D. E. SHEPPARD.

J. McINNES.

Your petitioners are pleased to call the attention of the Honourable the Members of the Senate to the following particulars and considerations :—

1. Ottawa, Kingston, Belleville, Cobourg, Toronto, Woodstock, and London are provided with local institutions which take their students beyond the High School course of study, while Hamilton, the second city of Ontario in population and wealth, and one of the most important feeders of the University and University College, is not so provided, and by the requirements of the present regulations of the Senate is even prohibited from retaining its students until they complete the High School course.

2. Permission is granted by the Senate of Toronto University to the Canadian Literary Institute, Woodstock, to retain its students to the end of the second year in Arts, and it is believed by your petitioners that the teaching staff, accommodation and equipment of the Hamilton Collegiate Institute are quite equal to those of Woodstock.

3. Permission from the Senate of Toronto University to the Hamilton Collegiate Institute to retain its students to the end of the first year will tend to check the multiplication of local universities, and local affiliated colleges, and extend the influence of the University and of University College, and greatly benefit the latter by sending to it yearly, as it has done in the past, a large number of students.

A list of the Masters, and the High School programme, are hereunto annexed.

Dated this 25th Sept., 1879.

UNIVERSITY OF TORONTO,
REGISTRAR'S OFFICE, Sept., 29th, 1879.

DEAR SIR,—I beg to acknowledge the receipt of the petition of the Principal and Masters of the Hamilton Collegiate Institute. It will be laid before the Senate at an early date.

Yours truly,

W. G. FALCONBRIDGE,
Registrar.

THE PRINCIPAL,
Hamilton Collegiate Institute.

REPORT OF COMMITTEE ON APPLICATIONS AND MEMORIALS ON FOREGOING PETITION.

The Committee on applications and memorials beg leave to present their report :

“The petition of the Principal and Masters of the Hamilton Collegiate Institute prays that on the grounds therein stated, the Senate should grant to the Institute the privilege of allowing those of its students who pass the junior matriculation examination, to attend classes in the Institute, in order to prepare for the first year's examination. It is recommended that the Registrar be instructed to inform the Principal that under the existing regulations the Senate may permit a scholar to postpone attendance upon lectures for a year without forfeiting his scholarship, the payment of which is merely deferred ; and may grant dispensation to other students of the first year from attendance upon lectures ; and that according to the existing practice the desire of a student to attend a Collegiate Institute is accepted as a reason for granting such indulgence. Under these circumstances it is suggested to the Principal that no further provision is necessary.”

The report was adopted.

APPLICATION OF ST. MICHAEL'S COLLEGE FOR AFFILIATION.

To the Senate of the University of Toronto.

Memorial of the Superior and Community of St. Michael's College, Toronto,

SHEWETH :

Your memorialists being aware of the advantages to young men of having a Degree in Arts from some University of high standing, and being unwilling under the present circumstances to apply for any legislative powers enabling them to confer such Degrees, and in view of the position of the University of Toronto, and of the facilities that University College affords for the teaching of some branches not yet included in the curriculum of studies at your memorialists' College, and also on account of the proximity of the said Colleges to each other, have concluded to propose to your honourable body in the question of affiliating your memorialists' College to the University of Toronto.

Your memorialists therefore pray that a committee of your Honourable Body be appointed to confer with a committee appointed by your memorialists in regard to the proposed affiliation, and the terms to be mutually agreed upon in reference thereto.

That in case your Honorable Body appoint such committee your memorialists will be represented in the conference by the following gentlemen :—Rev. J. R. Teefy, B.A., J. J. Cassidy, M.D., and D. A. O'Sullivan, M.A., LL.B.

And your memorialists, etc.

UNIVERSITY OF TORONTO,
REGISTRAR'S OFFICE, Dec. 22nd, 1880.

SIR,—I beg to acknowledge the receipt of the memorial respecting the affiliation of St. Michael's College with the University of Toronto. I shall lay it before the Senate at its next meeting.

Your obedient servant,

W. G. FALCONBRIDGE,
Registrar.

The REVEREND THE SUPERIOR,
St. Michael's College.

UNIVERSITY OF TORONTO,
REGISTRAR'S OFFICE, Jan. 29th, 1881.

The REV. FATHER VINCENT,
Superior of St. Michael's College.

SIR,—I have the honour to inform you that the Vice-Chancellor, Dr. Wilson, Mr. Taylor, and Prof. Loudon have been appointed a committee to meet the representatives of your College to consider and report on the terms of the affiliation of your College with the University. Our committee will be glad to have an early conference with the committee named in your memorial.

Yours obediently,

W. G. FALCONBRIDGE,
Registrar.

REPORT
OF THE
INSPECTOR OF INSURANCE,
ONTARIO.

TREASURY DEPARTMENT—INSURANCE BRANCH,

Office of the Inspector of Insurance,

Toronto, February 10th, 1881.

SIR,

I have the honour to enclose an abstract of the standing, on the 31st December, 1880, of such of the Fire Insurance Companies, in the Province of Ontario, as have sent in their Annual Statements down to this date.

This abstract is made from the attested statements returned by the Companies according to law, but must be considered as subject to such corrections as I may find it necessary to make upon a personal inspection of the books at the Head Offices.

On the completion of my tour of inspection, I shall have the honour to lay before you a continuation of this Report, with the statements in full of all the Companies.

I have the honour to be,

Sir,

Your obedient Servant,

W. T. O'REILLY,

Inspector.

HON. S. C. WOOD,

Treasurer, Ontario.

RETURN (IN PART)

To an Order of the Legislative Assembly that there be laid before the House : 1st,—Copy of the Report of the Department of Public Works of the late Province of Canada, dated 3rd of April, 1856, on the probable cost of erecting Parliamentary Buildings in the City of Toronto. 2nd,—Report as to any proceedings taken by such Department, or by the Government of the late Province of Canada for the selection of a site for such Parliamentary Buildings in the University Park at the head of the College avenue, pursuant to the Act 16 Vic., Ch. 161, and for the sale of the lands and water lots mentioned in Sec. 4 of the said Act. 3rd,—A statement shewing the total amount expended for repairs of the Parliamentary and Departmental Buildings, and for rent and repairs of temporary offices since 1st July, 1867. 4th,—An estimate of the value of the lands and buildings now used for Parliamentary and Departmental Buildings ; and an estimate of the probable cost of erecting new public buildings for such purposes.

ARTHUR S. HARDY,
Secretary.

PROVINCIAL SECRETARY'S OFFICE,
TORONTO, February 24th, 1881.

SCHEDULE OF CORRESPONDENCE RELATING TO A REPORT OF THE DEPARTMENT OF PUBLIC WORKS OF CANADA, DATED 3RD OF APRIL, 1856, HAVING REFERENCE TO THE SELECTION OF A SITE FOR PARLIAMENTARY BUILDINGS IN UNIVERSITY PARK.

1880.

January 17th.—Letter from Assistant-Secretary of Ontario to the Honourable the Secretary of State, Ottawa.

“ 19th.—Acknowledgement of the same by the Under-Secretary of State, Ottawa.

“ 28th.—Letter from Assistant-Secretary of Ontario to the Honourable Secretary of State Ottawa, urging action.

February, 12th.—Letter from Under-Secretary of State to the Honourable the Provincial Secretary, transmitting copies of Documents and plans relating to the erection of Public Buildings in University Park, Toronto.

“ 23rd.—Statement shewing the total amounts expended for repairs of the Parliamentary and Departmental Buildings, and for rents and repairs of temporary offices, since 1st July, 1867.

TORONTO, *January 17th, 1880.*

SIR,—I am directed to request you to be good enough to furnish this Government with a statement of the proceedings taken by the Department of Public Works, or by the Government of the late Provinces of Canada under the report of the Department of Public Works, dated 3rd April, 1856, for the selection of the site for Parliamentary Buildings in the University Park at the head of College Avenue, in the City of Toronto, pursuant to the Act 16 Vic. Cap. 161, and for the sale of the land and water lots mentioned in Sec. 4 of the said Act.

As this information is required for submission to the Legislature of this Province, I am further to ask that it may be furnished with the least possible delay.

I have the honour to be,

Sir,

Your obedient servant,

I. R. ECKART,

Assistant Secretary.

*The Honourable the Secretary of State,
(Canada), Ottawa.*

[No. 87.]

DEPARTMENT OF THE SECRETARY OF STATE,

OTTAWA, *January 19th, 1880.*

SIR,—I have the honour to acknowledge the receipt of your letter of the 17th inst., requesting that you may be furnished with a copy of a statement of the proceedings taken

under the report of the Department of Public Works, dated 3rd April, 1856, for the selection of the site for Parliamentary Buildings in the University Park, Toronto.

I have the honour to be,

Sir,

Your most obedient servant,

EDWARD J. LANGEVIN,

Under-Secretary of State.

The Honourable the Provincial Secretary,
Toronto.

[No. 107.]

TORONTO, 28th January, 1880.

SIR,—I am directed to call your attention to my letter of 17th instant, requesting you to furnish this Government with a statement of the proceedings taken by the Department of Public Works, or by the Government of the late Province of Canada under the report of the Department of Public Works, dated 3rd April, 1856, for the selection of the site for Parliamentary Buildings in the University Park, Toronto, pursuant to the Act 16th, Vic. Cap. 161, and for the sale of the land and water lots mentioned in Sec. 4 of the said Act. I am again directed to request that as this information is required for submission to the Legislature, it may be furnished at your earliest convenience.

I have the honour to be,

Sir,

Your obedient servant,

I. R. ECKART,

Assistant Secretary.

The Honourable the Secretary of State,
(Canada), Ottawa.

OTTAWA, February 12th 1880.

SIR,—With reference to Mr. Assistant-Secretary Eckart's letter of the 17th instant, I am directed to transmit to you herewith for the information of his Honour the Lieutenant-Governor of Ontario, a copy of a letter from the Secretary of the Department of Public Works, together with the copies of the documents and the Plans therein referred to, relative to the contemplated erection of Public Buildings in the University Park, Toronto.

I have the honour to be,

Sir,

Your obedient servant,

EDWARD J. LANGEVIN,

Under-Secretary of State.

The Honourable the Provincial Secretary.
Toronto.

OTTAWA, *February 10th, 1880.*

SIR,—In obedience to the request contained in your letter of the 20th ultimo, I have the honour to transmit to you herewith—

1st,—A copy of a report of a Committee of the Honourable the Executive Council, dated 19th March, 1856.

2nd,—A copy of a letter, under date of 3rd of April, 1856, addressed to the Honourable the Provincial Secretary by the Deputy or Assistant Commissioner of Public Works, on the subject of Public Buildings at the Cities of Montreal, Quebec, Toronto, Kingston, and Ottawa.

3rd,—Plans of contemplated buildings to be erected in the University Park, Toronto.

I have also the honour to inform you that there are no other documents or plans bearing upon the subject, in the possession of this Department.

I have, &c.,

S. CHAPLEAU,

Secretary.

The Honourable the Secretary of State,

Ottawa.

Copy of a Report of a Committee of the Honourable the Executive Council, dated 19th of March, 1856, approved by his Excellency the Governor General in Council on the following day.

It having been declared by resolution of the House of Assembly that it was expedient to postpone the consideration of a permanent seat of Government, until a statement were furnished to the Legislature of the estimated expenditure for the erection of the necessary public buildings at the cities of Montreal, Quebec, Toronto, Kingston and Ottawa.

The Committee respectfully recommend that the Commissioner of Public Works be instructed to produce with the least possible delay, the required estimates, and that for that purpose they do refer to the estimates already made for public buildings at Toronto or elsewhere, and establish the probable difference of cost of construction of similar buildings at Montreal, Quebec, Kingston and Ottawa; and that they be also instructed to state in their report what are the grounds and buildings belonging to the Government, or about to be transferred to the Government, which may be made available in each of the cities above named for the accommodation of the Government and Legislature.

Certified,

W. H. LEE,

C. E. C.

DEPARTMENT OF PUBLIC WORKS,

April 3rd, 1856.

SIR,—I have the honour to acknowledge the receipt of a copy of an Order in Council of the 19th ultimo, based upon a Resolution of the House of Assembly, and directing that “the Commissioner of Public Works be instructed to produce within the least possible delay, estimates for the erection of the necessary public buildings at the cities of Montreal, Quebec, Toronto, Kingston and Ottawa; that for this purpose reference be made to the estimates already made, for public buildings at Toronto and elsewhere, to establish the probable difference of the cost of construction of similar buildings at Montreal, Quebec, Kingston and Ottawa;” and also, “that it should be stated what are the grounds and buildings belonging to the Government, or about to be transferred to the Government, which may be made available in each of the cities above named, for the accommodation of the Government and Legislature.”

Upon receipt of this order no time was lost in giving the necessary instructions to the proper officer to collect all the information in the office upon the subject, and to prepare the estimates called for.

From the Report of Mr. Rubidge, the officer referred to, the following may be taken as the result of his calculations; and from the careful manner they have been made in, I am of opinion they may be considered as near the truth as can be, under the circumstances.

The only plans and estimates in the offices for buildings of the class immediately under consideration, are those furnished by Messrs. Cumberland & Storm, in 1854; but on referring to them, it was found they would not form a safe basis for the estimates now called for. Within the last year, plans and estimates for various public buildings in several parts of the Province have been furnished to the Department by some of the principal architects, and by calculating the respective cubic quantities in each, in connection with the amount of the estimate, it is found in fifteen of such estimates, the rate per cubic foot varies from 5d. to 9d., and that of twelve of the principal of them, the average rate is 6½d.; 6d per foot is assumed therefore as a safely approximating rate, on which to base the amount of outlay required.

The estimate of Messrs. Cumberland & Storm was as follows:

Parliament buildings	£51,592	0	0
Departmental offices	49,553	0	0
Government house and offices	21,600	0	0
	£122,745	0	0
Lodges, barracks, guard-house, fencing, road-making, planting grounds, drainage.	11,000	0	0
	£133,745	0	0

On calculating the rate per cubic foot, which this estimate would give, it is found to be but 3½d. The cost, therefore, is taken as under-estimated, whether as compared with the average rate already stated or with the cost of other public buildings lately erected under this Department.

Increasing the rate per cubic foot of the cost of the buildings, as planned by Messrs. Cumberland & Storm, from 3½d to 6d. per foot, the estimates would stand thus:

Parliament buildings	£85,393	0	0
Departmental offices	82,018	0	0
Government house and offices	35,752	0	0
	£203,163	0	0
Lodges, barracks, guard-house, fencing, road-making, planting grounds, drainage.	11,000	0	0
	£214,163	0	0

To this amount should be added, in my opinion, the cost of erecting those buildings on the modern fire-proof principles, now generally adopted in England. The Province has already, unfortunately, been a severe sufferer in the destruction of records and property by fire.

Estimate as above.	£214,163	0	0
Add for fire-proof erection, say	35,000	0	0
For general drainage and sewerage, introduction of gas, water, heating and ventilation	25,000	0	0
	£274,163	0	0
Add 10 per cent. contingencies and superintendence.	27,416	0	0
	£301,579	0	0

From the foregoing it will be seen that the sum calculated to be required to cover the cost of properly constructing the buildings, may be taken at £300,000 in round numbers. In them is of course embraced all the accommodation necessary, including a capacious library, with suitable provision for picture gallery, museum of fine arts, geology, etc., etc.

The second point to which the Order in Council refers, is the comparison of cost of erecting the required buildings in the several sites enumerated. On this I would observe that there is not, in my opinion, such a difference in the prices of material, balancing one class with another, or in the rate of wages, and in the greater facilities or otherwise of carrying on the works, as would make any important difference to the Province, whether the contractors had to erect the buildings at one site or the other.

The third and last point requires, "a report as to what grounds and buildings belonging to the Government, or about to be transferred to the Government, which may be made available in each of the cities above named for the accommodation of the Government and Legislature.

At *Toronto* there are no such accommodations of a permanent description; the arrangements now existing for the Governor-General, the Legislature, and a portion of the public departments, on property belonging to the Province might serve for some time to come; the other public departments must in such case be provided for, as at present, by leasing suitable premises. There is a fine site within the city limits available for the erection of the buildings contemplated.

At *Kingston* there are no buildings belonging to the Government available; but there is a fine site on the public grounds, known as the Murney property.

At *Ottawa* there are no public buildings available; but I believe on the transfer of the Ordnance property, the Province will be in possession of a fine site whereon to erect the necessary buildings, if so decided on.

At *Montreal* there are no buildings belonging to the Province available. There is a valuable provincial property on Notre Dame street not suitable, in my judgment, as a site for the several buildings contemplated; but if sold the proceeds would be sufficient to purchase a proper site.

At *Quebec* there are no buildings belonging to the Province that may be considered available; the only one being the old Chateau. A very fine site has been acquired without the walls for the required buildings, but it might be a question deserving consideration, in the event of this city being fixed on, whether it would not be more expedient to appropriate the property known as the Jesuits' Barracks, to a site for the public offices, &c. The Legislative buildings to stand on their old ground, and Governor's residence to be on or near the Government garden.

I have the honor to be,

Sir,

Your obedient servant,

HAMILTON H. KILLALY,

Assistant Commissioner,

Public Works.

THE HON. GEORGE E. CARTIER,

Provincial Secretary.

* Dunkin Act in force in 1878, and a large number were heavily fined for breaches of its provisions, which accounts for the great difference in the two years.

(No. 27.)

Return from the Clerks of the Municipalities and the County Treasurers of the expenses incurred in each Municipality of the Province under the Voters' List Act, shewing the respective amounts paid in each for preparing, printing, publishing, distributing and filing with the Clerks of the Peace, the Voters' Lists; the number of appeals to the Judge's Court, and the expenses attending the hearing and disposal of said appeals and the amounts paid to the several officers of said Courts of Appeal for the years 1878 and 1879: also, all correspondence and accounts that may have passed between the Judges and the Government with respect to the expenses of holding the said Courts of Appeal in these years. (*Not Printed.*)

(No. 28.)

Return shewing the time elapsing between the sentences of the prisoners and their removal to the Central Prison for the years 1879 and 1880, distinguishing those who were tried by the Judges alone at the Interim Sessions from those tried before a Jury.
(Not Printed.)

RETURN

RETURN

To an Address of the Legislative Assembly to the Lieutenant-Governor, passed on the 19th January, 1881, praying that he will cause to be laid before this House, copies of all Correspondence which has taken place between the Executive Council of the Province of Ontario, or any member thereof, and the Privy Council of Canada, or any member thereof, respecting the award relating to the Boundaries of the Province of Ontario, and respecting the territory in dispute between the Dominion and the Province, and which has not yet been laid before this House.

By Command,

ARTHUR S. HARDY,

Secretary.

PROVINCIAL SECRETARY'S OFFICE,
TORONTO, 29TH JANUARY, 1881.

SCHEDULE OF CORRESPONDENCE AND PAPERS.

1880

- Jan. 20.—Copy of Report of the Hon. the Minister of Justice, on the Act of the Ontario Legislature respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario.
- And Appendix thereto;
- “A” being memorandum of same date by J. S. Dennis, Esq., respecting the Boundary;
- “B” containing extracts from a former Report on a Bill passed in British Columbia for establishing Mining Courts; and
- “C” being extract from a former Report as to an Act of this Province with respect to Algoma, etc.
- Feb. 12.—Copy of Report of Committee of Privy Council on the Report of the Minister of Justice, and concurring therein.
- “ 14.—Letter from the Under-Secretary of State, Ottawa, to the Hon. the Provincial Secretary of Ontario, of 20th January, 1880, enclosing same.
- “ 17.—Letter from the Under-Secretary of State, to the Hon. the Provincial Secretary, enclosing the Minister’s Report of 20th January.
- Mar. 13.—Letter from the Hon. the Secretary of State, to His Honour the Lieutenant-Governor of Ontario.
- “ 15.—Copy of Report of the Hon. the Attorney-General of Ontario, on the despatch bearing date 14th February, 1880, from the Hon. the Under-Secretary of State, Ottawa.
- “ 15.—Copy of Order in Council approving said Report.
- “ 17.—Copy of further Report by the Hon. the Minister of Justice, respecting the Act for the Administration of Justice in the Northerly and Westerly Parts of Ontario.
- “ 22.—Copy of Proceedings of Privy Council disallowing the Ontario Act for Administration of Justice in the Northerly and Westerly Parts of Ontario.
- “ 22.—Letter from the Hon. the Secretary of State, Ottawa, to His Honour the Lieutenant-Governor of Ontario, enclosing copy thereof.
- “ 15.—Letter from His Honour the Lieutenant-Governor of Ontario, to the Hon. the Secretary of State, Ottawa, enclosing both documents.
- “ 25.—Letter from His Honour the Lieutenant-Governor of Ontario, to the Hon. the Secretary of State, requesting copy of the further Report.
- “ 30.—Letter from the Hon. the Secretary of State, to His Honour the Lieutenant-Governor of Ontario, enclosing same.
- Apr. 23.—Letter from the Hon. the Attorney-General, to the Hon. the Minister of Justice, respecting the provisional legislation thereby rendered necessary.

DEPARTMENT OF JUSTICE,

OTTAWA, 20th January, 1880.

I have the honour to report:—That an Act was passed by the Legislature of the Province of Ontario, at its last Session, intituled (chapter 19) “An Act respecting the Administration of Justice in the Northerly and Westerly parts of Ontario.”

This Act is apparently based upon the assumption that the conclusion come to by the Right Honourable Sir Edward Thornton, the Honourable Sir Francis Hincks, and the late Chief Justice Harrison, respecting the northerly and westerly boundaries of Ontario settled such boundaries.

I would call attention, however, to the fact that, as the Parliament of Canada have not yet legislated upon the subject, the question of the boundaries still remains, as a matter of law, unsettled. If the Parliament of Canada thinks proper to pass the necessary Act declaring the boundaries to be those decided upon by the gentlemen referred to, the Act under consideration would not in this point of view be objectionable.

I append a memorandum (marked “A”) prepared by the Deputy of the Minister of the Interior respecting the provisional boundary agreed upon by the Governments of Canada and Ontario in the year 1874, together with a plan shewing the territory included in the description in sections 1, 2, 3 and 8, of the Act now under consideration.

I submit for the consideration of Council the question whether, pending action by the Parliament of Canada with respect to the boundaries of Ontario, this Act should be left to its operation. It was received by this Government on the 26th day of March, 1879, so that the year within which the power of disallowance must be exercised will expire on the 25th of March, 1880. Assuming that it is concluded not to disallow the Act in connection with the boundary question, there are questions arising upon it which require serious consideration.

The 96th section of the British North America Act, 1867, provides that the Governor-General shall appoint the Judges of the Superior, District, and County Courts in each Province, except those of the Courts of Probate in Nova Scotia and New Brunswick; and by the 100th section, the salaries, allowances, and pensions of the Judges of the Superior District and County Courts are to be fixed and provided by the Parliament of Canada.

By the 92nd section the Provincial Legislatures are empowered to make laws for the constitution, maintenance and organization of Provincial Courts, both official and criminal jurisdiction, and including procedure in civil matters in those Courts.

Several of the Provinces of Canada have, since Confederation, provided for the appointment of officers called Magistrates, Stipendiary Magistrates, Commissioners, etc., and have given to those officers certain judicial functions. Till lately their powers have been confined to matters in which small amounts only have been in dispute, ranging from \$100 and less.

In 1877 the Legislature of British Columbia passed a Bill respecting the Gold Commissioner's Court in that Province. This Bill gave to the Gold Commissioner, who was a local officer appointed by the Lieutenant Governor, very extended jurisdiction in civil matters. It was reserved for the signification of the pleasure of His Excellency the Governor-General thereon. It was not assented to. I append an extract (marked “B”) from the approved report to Council from this Department upon the Bill.

In 1877 an Act was passed by the Province of Ontario intituled “An Act respecting the Territorial and Temporary Judicial Districts of the Province and the Provisional County of Haliburton.”

This Act gave to Stipendiary Magistrates referred to therein, and to the Division Court of the District of Algoma, certain extended jurisdiction.

The Act was left to its operation, but not without the attention of Council being called to its provisions. I append an extract (marked “C”) from the approved report of the Department to Council respecting the same.

The Act now under consideration goes a step further, and practically provides for the whole administration of civil justice, for some time to come, within the territory referred to in the Act, by a Court, the Judge of which is appointed by the Lieutenant Governor, and the salary and allowances of whom are fixed by the Provincial Legislature.

The 6th section gives to this Court, in the district of Algoma, the following jurisdiction :—

1. In all personal actions where the amount claimed does not exceed \$400.

2. In all actions and suits relating to debt, covenant and contract, where the amount or balance claimed does not exceed \$800.

Provided always, as to the additional jurisdiction so hereby conferred, that the contract was made within Algoma, or the cause of action arose therein, or the defendant resides therein.

3. For the recovery of the possession of real estate in the said district.

4. "In replevin, where the value of the goods, or other property or effects distrained, taken or detained, does not exceed the sum of \$400, and the goods, property, or effects to be replevied are in the said district."

Previous to the Act its jurisdiction was confined to personal actions where the debt or damages claimed did not exceed \$100 (see Revised Statutes of Ontario, chapter 90, section 16), except by consent of the parties, when the Stipendiary Magistrate could, on their written consent, try cases to the extent of \$800.

Section 8 gives to the Stipendiary Magistrate holding Courts in certain remote districts therein mentioned the following jurisdiction :—

1. In all personal actions where the amount claimed does not exceed \$100 (except as in the next section excepted).

2. "In all causes and suits relating to debt, contract, and covenant, where the amount or balance claimed does not exceed \$200, or, if the amount is ascertained by the signature of the defendant, to the sum of \$400.

"Provided always, that the contract or covenant was made within the said portion of the district of Thunder Bay or Nipissing in which the Court is held, or the cause of action arose therein, or the defendant resides therein.

3. "In certain actions for the recovery of the possession of lands or other corporeal hereditaments situated in the said portion of the district aforesaid in which the Court is held, and the yearly value of which lands or hereditaments, or the rent payable in respect whereof, does not exceed \$100, that is to say :—

(a) "Where the term and interest of the tenant of any such corporeal hereditaments has expired or has been determined by the landlord or the tenant by a legal notice to quit.

(b) "Where the rent of any such corporeal hereditaments is sixty days in arrear, and the landlord has the right by law to re-enter for non-payment thereof.

"And in respect to such actions the said Courts shall have and exercise the same powers as belong to and may be exercised by the Superior Court of Common Law, in and in respect to actions of ejectment.

4. "In replevin, where it is made to appear that the value of the goods or other property or effects distrained, taken, or detained, does not exceed the sum of \$100, and the goods, property or effects to be replevied are in the said portion of the district in which the Court is held."

Section 10 provides for the appointment of an officer for the district of Algoma, to be called the Deputy Clerk for Thunder Bay, and power is given to him to issue writs for the commencement in the District of Thunder Bay, of actions in the District Court. Provision is made for a seal for the Court with which all writs and processes are to be sealed. An appeal is given from the Stipendiary Magistrate's order or decision to the Judge of Sault Ste. Marie.

The 14th section is as follows :—

14. "Where the amount claimed in any action in the said District Court, or where, in the case of ejectment or replevin, the subject matter of the action as appearing in the writ in ejectment, or in the affidavit filed to obtain the writ in replevin, is beyond the

jurisdiction of the County Courts in other parts of Ontario, costs to a successful defendant shall be taxed upon the Superior Court scale.

2. "In like manner, where the plaintiff recovers in respect to a cause of action beyond the jurisdiction of the said County Courts, costs shall be taxed to him on the Superior Court scale, subject, however, to his obtaining the certificate or order of the Judge, where, under the common law procedure Act, such certificate or order is required in the Superior Courts.

3. "In respect to any action within the provisions of the first part of this section, the attorney of a successful plaintiff shall be entitled to charge his client County Court costs only, unless he was instructed in writing by such client to sue in respect to a matter beyond the jurisdiction of the said County Courts, in which case the said attorney shall be entitled to charge costs upon the Superior Court scale.

4. "Either party may, as of right, upon giving twenty days' notice to the opposite party, have the taxation of costs by the Deputy Clerk revised by the Clerk at Sault Ste. Marie."

The 15th section provides for the appointment of a Sheriff of the district of Thunder Bay, and for the execution by him of writs and of other processes issuing out of the District Court.

The 16th section empowers the Stipendiary Magistrates, upon the trial of any cause where the amount claimed is over \$200, or where the matters in dispute relate to the title of real estate, to state a special case for the opinion of the Court of Appeal in Ontario.

The 18th and 19th sections are as follows:—

18. "Every judgment of the said Division Courts may be enforced by writs or other process framed in accordance with the requirements of the case and similar in form to writs or other process for like purposes issued out of the Superior Courts.

19. "Every Stipendiary Magistrate of the District of Thunder Bay, or Nipissing, may exercise the authority conferred upon County Court Judges by the revised statute respecting over-holding tenants."

The Legislature unquestionably has authority to constitute a Court possessing the jurisdiction of the Courts referred to in this Act, but I submit to Council whether this Act, which seems to encroach upon the powers of the Dominion Government with respect to the appointment of Judges, and which goes far beyond any previous Act of a similar character, should be disallowed, notwithstanding that other Acts, equally objectionable on principle, but less objectionable in degree, have been left to their operation. In my opinion, the Act should be disallowed, unless the same be repealed within the time for disallowance.

(Signed) J. A. S. McDONALD,

Minister of Justice.

"A."

MEMORANDUM BY J. S. DENNIS, ESQUIRE, AS TO BOUNDARY.

DEPARTMENT OF THE INTERIOR,

OTTAWA, 21st January, 1880.

The undersigned has the honour to submit for the information of the Honourable the Minister of Justice, that on the 8th July, 1874, an Order in Council was passed, agreeing upon a constitutional boundary between the Province of Ontario and the Dominion, in the following terms:

"1. That the conventional boundary of the Province of Ontario, for the purposes set forth in the said Order in Council of the 3rd of June, instant, shall be on the west of the meridian line, passing through the most easterly point of Hunter's Island, running south

until it meets the boundary line between the United States and Canada, and north until it intercepts the fifty-first parallel of latitude, and the said fifty-first parallel of latitude shall be the conventional boundary of the Province of Ontario on the north.'

"2. That all patents for lands in the disputed territory to the east and south of the said conventional boundaries, until the true boundaries can be adjusted, shall be issued by the Government of Ontario, and all patents for lands on the west or north of these conventional boundaries shall be issued by the Dominion Government.

"3. That when the true west and north boundaries of Ontario shall have been definitely adjusted, each of the respective Governments shall confirm and ratify such patents as may have been issued by the other for lands then ascertained not to be within the territory of the Government which granted them, and each of the respective Governments shall also account for the proceeds of such lands as the true boundaries when determined may shew to belong of right to the other.

"4. That the Government of the Dominion shall transfer to the Government of the Province of Ontario all applications for lands lying to the east and south of the conventional boundaries, and also all deposits paid on the same; and the Ontario Government shall transfer to the Dominion Government all applications for lands lying to the west and north of the said boundaries, and likewise all deposits paid thereon, and such of the said applications as are *bona fide* and in proper form shall be dealt with finally, according to the priority of the original filing, and where applications for the same lands have been filed in the departments of both Governments the priority shall be reckoned as if all had been filed in one and the same office."

The undersigned has further the honour to submit for the information of the Minister of Justice, a map shewing the territory included in the several descriptions in sections 1, 2, 3 and 8 of the Act of the Ontario Legislature, passed at the last session thereof, chapter 19.

Respectfully submitted,

(Signed)

J. S. DENNIS,

Deputy of the Minister of the Interior.

—
"B."

(Extracts from a former Report on a Bill passed in British Columbia for establishing Mining Courts.)

In addition to the above Acts of the Legislature of British Columbia, a Bill was passed intituled "An Act to amend the Gold Mining Amendment Act, 1872," which Bill was reserved by His Honor the Lieutenant-Governor for the signification of the pleasure of His Excellency the Governor-General thereon. The Act is as follows: "Every Mining Court in this Province shall in addition to its present jurisdiction, have jurisdiction in all personal actions arising within the limits of its present district, and the Gold Commissioner presiding in any such court shall have the like powers to enforce any judgment, decree, rule, or order of such courts as are conferred by section 12 of the Gold Mining Amendment Act, 1872. The provisions of this Act shall only have effect in the Electoral District of Kootenay, and in that part of the Province known as Cassiar."

The Attorney-General of the Province reported upon this Act to the Lieutenant-Governor as follows: "This Act gives jurisdiction in all personal actions to the Gold Commissioners in Kootenay and Cassiar, and appears to trench upon the provisions of the 96th section of the British North America Act, which vests the appointment of the Supreme and County Court Judges in the Governor-General alone, in as much as it provides that the paid employees of the Local Government in the district aforesaid shall have and exercise almost as much power as a Supreme Court Judge. As I think this Legislature has not the power in effect, to make these appointments, I would suggest that the Act be reserved for the consideration of His Excellency the Governor-General." I refer to the re-

marks made upon the Mining Court in connection with the 11th section of Act No. 14. This Bill is an illustration of the danger I have above alluded to, as, if it became law, the jurisdiction of the Mining Court in the districts referred to will be greater than the jurisdiction of the County Court, and equal to that of the Supreme Court.

It might be convenient that a somewhat extended jurisdiction should be given to a District Court or magistrates, in the Districts of Kootenay and Cassiar, thereby avoiding the expense and delay attendant upon a Judge of the Supreme Court travelling to these distant parts of the Province for the purpose of holding assizes, and it is probable that this Bill was passed with that object in view. I would mention however, that even were this Bill assented to, it would be necessary for a Supreme Court Judge to proceed to the district mentioned for the trial of criminal cases.

Upon the whole, I recommend that the assent of the Governor-General be not given to this Bill, which, in fact, should have been disposed of by the local authorities themselves.

The following are the remarks above alluded to: The sections of the Act now under consideration further extends the powers of Gold Commissioners as Judges of the Mining Court. The 96th section of the British North America Act, 1867, empowers the Governor-General to appoint the judges of the Superior districts and County Court in each Province, except those of the Courts of Probate in Nova Scotia and New Brunswick. By the 92nd section the Provincial Legislatures have power to make laws in relation to the administration of justice, including the constitution, maintenance and organization of Provincial Courts, both of civil and criminal jurisdiction. They have also power to legislate respecting the establishment and tenure of provincial officers, and the appointment and payment of provincial officers.

If there be power in the Legislature of British Columbia to establish this so-called Mining Court, and appoint and pay the judges thereof, it must be found in the section I have just quoted. I think however, that this court, which is declared to have original jurisdiction, to be a court of law and equity, and a court of record with a specific seal, and for the purpose of enforcing its judgments, orders and decrees, to have (with certain exceptions), the same powers and authority legally and equitably, as are exercised in the Supreme Court of Civil Justice of British Columbia by any judge thereof, which has power also to summon a jury to assess damages, may be considered a court within the meaning of the 96th section of the Confederation Act. It is not in my opinion necessary to bring a provincial court within the provisions of this section, that it should be called by the particular name of Superior, District or County Court.

The exception to that section itself indicates that the Courts of Probate in Nova Scotia and New Brunswick would, unless specially excepted, have come within the definition of Superior, District or County Courts.

It will be readily seen how easy it would be for the Local Legislature, by gradually extending the jurisdiction of these mining courts, and by curtailing the jurisdiction of the County Courts or Supreme Courts as now established, to bring within their own reach, not only the administration of justice in the Province, but also practically the appointment of the judges of the courts in which justice is administered. Inasmuch however as legislation of a similar nature to that contained in the section now under consideration, has been left to its operation in previous years, and as the provisions of the section appear to be convenient, I do not recommend a disallowance of the Act.

“C.”

(Extracts from a Report on a former Act of this Province, respecting Algoma.)

“Were this the first enactment of a similar nature passed by a provincial legislature, I would hesitate long before recommending that it should be left to its operation, as it appears to intrench upon the powers conferred upon the Governor-General of Canada by the 96th section of the British North America Act, 1857, which section is as follows:—

“The Governor-General shall appoint the judges of the Superior, District and County Courts in each Province, except those of the Courts of Probate in Nova Scotia and New Brunswick.”

Inasmuch however, as provincial legislation has been previously left to its operation, whereby certain judicial powers in civic matters have been conferred upon stipendiary magistrates, and whereby courts presided over by the stipendiary magistrates and having in effect the powers of the Division Courts of Ontario have been constituted, I do not feel at liberty to object to the provision of the present Act, provided the jurisdiction conferred by the former legislation upon the subject, which has been left to its operation, has not in effect been substantially extended.

In a report dated 29th September last, upon the Acts of last session of the Legislature of British Columbia, I had occasion to remark at some length upon legislation of a nature similar to that now under consideration, and I then pointed out the danger which might ensue from this class of legislation.

I refer to that report, the Act, 31st Vic., 1868, Ontario, chap. 35, which was passed to provide for the organization of the Territorial District of Muskoka, and under which the stipendiary magistrate of that district was appointed, declared that certain provisions of chapter 128 of the Consolidated Statutes of Upper Canada, intituled “An Act respecting the administration of justice in unorganized tracts should extend and apply to the said District of Muskoka.”

Similar provisions are contained in the Act 33rd Vic. (1869) Ontario, chapter 24, which provides for the organization of the Territorial District of Parry Sound, and in the Act 34 Vic. (1871) Ontario, chapter 4, which provides for the organization of the Territorial District of Thunder Bay. The provisions of the Act of the Consolidated Statutes, thus made applicable to these territorial districts in effect, provided for the holding of a Court of Civil Jurisdiction in each district under the name and style of the first (or other as the case may be), Division Court for the District of D. C. over which the stipendiary magistrate should preside and be the sole Judge in all actions brought in such Division Court, and determine all questions as well of fact as of law in relation thereto, in a summary manner, with power, should he think fit, to summon a jury of five persons to try the fact controverted in a case.

For every such court provision is made for an appointment of a clerk and one or more bailiffs. The jurisdiction of the court is declared to be over all personal actions, save certain excepted ones where the debtor's damages claimed is not more than \$100. Each court is to have a seal with which all summonses and other processes shall be sealed or stamped.

Suits are to be commenced by summons to the defendant issued by the clerk, containing the particulars of the plaintiff's demand.

Provision is made for the subpoenaing of witnesses; the judgment of the court with certain exceptions to be final and conclusive.

Provisions are made for the enforcement of the judgments by execution. Proceedings and suits against absconding debtors are provided for.

The Magistrate is given jurisdiction on the consent of the parties to try and determine cases up to \$300, in amount. In addition to the Act in the Consolidated Statutes, above referred to, which has been made applicable to the three districts mentioned, certain provisions of the Act respecting Division Courts, being chapter 19 of the Consolidated Statutes of Upper Canada, and of the Act to amend the Acts respecting Division Courts, being chapter 23 of 32 Vic. (1869-9), Ontario, are made applicable to the Districts of Parry Sound and Thunder Bay. The provisions of the Act respecting Division Courts referred to, relate to examination of judgment debtors' claims of landlords to goods seized in execution.

The provisions of the Act 32 Vic. (1868-9), Ontario, amending the Acts respecting Division Courts, provide that all judgments in the Division Courts shall have and continue to have the same force and effect as judgments of courts of record. Provisions are made for the entry of final judgments by the clerk where the claim is not disputed, and proceedings for the garnishment of debts are provided for. It will be thus seen that the jurisdiction of the courts presided over by the Stipendiary Magistrates of the three districts above mentioned, was, before the passing of the Act now under consideration, practically as extensive as the jurisdiction of the various division courts in the Province, and in some cases

was more extensive. The present Act does not therefore seem to extend to any substantial extent the jurisdiction previously possessed by those courts.

The section now under consideration however, not only declares that the Stipendiary Magistrate as Division Court Judge, shall have the like jurisdiction and powers as are now possessed by the County Court Judges in Division Courts in counties, but goes on to provide that the provisions of law from time to time in force in Ontario relating to the Division Courts in counties and the officers thereof, etc., shall apply to the Division Courts of these districts. This provision is, I think, objectionable, inasmuch as although it may be quite within the legislative authority of Ontario to increase the jurisdiction of the Division Courts in counties, as such courts are now presided over by Judges appointed by the Dominion, yet their jurisdiction might be increased to an extent that might be objectionable in the case of these District Division Courts, the Judges of which are appointed by Ontario. Were the section united in its operation to the jurisdiction and power, etc., of the County Court Judges in Division Courts and counties as now existing, I would not, for the reasons above mentioned, recommend any interference with the Act.

I recommend however, that the attention of the Lieutenant-Governor be called to the objection referred to, with a request that his Government may promote, at the next session, and before the time expires for determining as to the disallowance of the Act, amendatory legislation.

COPY of a Report of a Committee of the Honourable the Privy Council, approved by His Excellency the Governor-General in Council on the the 12th February, 1880.

The Committee have had under consideration a report dated 20th January, 1880 from the Honourable the Minister of Justice upon an Act passed by the Legislature of the Province of Ontario at its last session, intituled, "An Act respecting the Administration of Justice in the Northerly and Westerly parts of Ontario."

In concluding his report, the Minister submits whether this Act, which seems to encroach upon the powers of the Dominion Government with respect to the appointment of Judges, and which goes far beyond any previous Act of a similar character, should be disallowed notwithstanding that other Acts equally objectionable on principle, but less objectionable in degree, have been left to their operation; and he states that, in his opinion, the Act should be disallowed, unless the same be repealed within the time for disallowance.

The Committee concur in the opinion above stated, and submit the same for Your Excellency's approval.

Certified.

(Signed) J. O. COTE,
Clerk, P. C

OTTAWA, 14th February, 1880.

SIR,—I am directed to transmit to you herewith for the information of His Honour the Lieutenant-Governor of Ontario, a copy of an order of His Excellency the Governor-General in Council on the subject of an Act passed by the Legislature of that Province at its last session, intituled "An Act respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario."

I have the honour to be, Sir,

Your obedient servant,

(Signed) EDWARD J. LANGEVIN,
Under-Secretary of State.

*The Honourable the Provincial Secretary,
Toronto.*

OTTAWA, 17th February, 1880.

SIR,—With reference to my letter of the 14th instant, I am directed to transmit to you herewith for the information of His Honour the Lieutenant-Governor of Ontario, a copy of a report of the Minister of Justice and of its appendices, A, B, C, on the subject of the Act passed by the Legislature of Ontario at its last session, intituled “An Act respecting the Administration of Justice in the Northerly and Westerly Boundaries of Ontario.”

I have the honour to be, Sir,

Your obedient servant,

(Signed) EDWARD J. LANGEVIN,
Under-Secretary of State.

*The Honourable the Provincial Secretary,
Toronto.*

OTTAWA, 13th March, 1880.

SIR,—Adverting to the letters of Mr. Under-Secretary Langevin to the Honourable the Provincial Secretary of Ontario, under date the 14th and 17th ultimo, and their respective enclosures, I have the honour to request that you will inform me whether your Government intends to address to this Government any communication with reference to the Act, cap. 19, 42 Vic. (1879) “An Act respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario.”

I have the honour to be, Sir,

Your obedient servant,

(Signed) J. C. AIKINS,
Secretary of State.

*His Honour the Lieutenant-Governor of Ontario,
Toronto.*

GOVERNMENT HOUSE,

TORONTO, 15th March, 1880.

SIR,—I have the honour to transmit herewith for the information of His Excellency the Governor-General in Council a copy of an Order in Council approved by me this day, together with the annual report of the Honourable the Attorney-General with respect to the despatch of the Under-Secretary of State, dated 14th February last, having reference to an Act of the Legislature of Ontario, entitled “An Act respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario,” being 42 Victoria, chapter 19.

I have the honour to be, Sir,

Your obedient servant,

D. A. MACDONALD,
Lieutenant-Governor.

*The Honourable the Secretary of State,
Ottawa.*

Copy of an Order in Council approved by His Honour the Lieutenant-Governor, the 15th day of March. A.D., 1880.

The Committee of Council advise that Your Honour do approve of the annexed report of the Honourable the Attorney-General with respect to a despatch of the Under-Secretary of State, dated the 14th day of February, having reference to an Act of the Legislature of Ontario, entitled "An Act respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario," being 42 Victoria, Chapter 19.

Certified.

(Signed) J. G. SCOTT,

Clerk Executive Council,

Ontario.

The undersigned respectfully submits the following observations on a despatch of the Under-Secretary of State, dated the 14th day of February ultimo, transmitting a copy of an Order of His Excellency the Governor-General in Council, concurring in a Report of the Honourable Minister of Justice, wherein it is stated, that, in the opinion of the Minister, an Act passed by the Legislature of this Province at its last session, entitled "An Act respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario," should be disallowed, unless the same were repealed within the time for disallowance. The undersigned has also had under consideration a copy of the said report, transmitted in a subsequent despatch, dated the 17th day of February.

The objections suggested to the Act, in the Report of the Minister of Justice, are these:—

(1) That the Act is "based on the assumption that the award of the Right Honourable Sir Edward Thornton, the Honourable Sir Francis Hincks, and the late Chief Justice Harrison, respecting the Northerly and Westerly Boundaries of Ontario, settles such Boundaries;" and (2) that (independently of that question) the Act "seems to encroach upon the powers of the Dominion Government, with respect to the appointment of Judges, and goes far beyond any previous Act of a similar character."

With respect to the first objection, it is matter of profound disappointment that, after the exhaustive investigation which the question of our Northerly and Westerly Boundaries received, and the unanimous decision, eighteen months ago, by the distinguished and able gentlemen selected as arbitrators, the Government of the Dominion is not yet prepared to abide by the award, or to recognize the just rights of the Province which the award established; but the Honourable the Minister of Justice appears to have overlooked that the Act in question (while making no allusion whatever to the award) assumes no more with regard to the extent of our territory than that we have *some* territory west of "a line known as the provisional westerly boundary line of Ontario," and *some* territory north "of the height of land separating the waters which flow into Hudson's Bay from those which flow into Lake Superior and the Georgian Bay." Now, independently of a mass of other proofs in favour of Ontario's claim, our right to territory as far west as the Lake of the Woods, and as far north as the boundary or shore of Hudson's Bay, is demonstrated by the terms of the Royal commissions, from the 27th December, 1774, to Sir Guy Carleton, Captain-General and Governor-in-Chief of the Province of Quebec, and the subsequent commissions to successive Governors-General, to the commission to Lord Elgin, of the 1st October, 1846, being the last of the commissions to our Governors-General which contained boundary line descriptions. There is far more reason for maintaining that the award gave us too little, than for maintaining that it gave us too much; and it gave us considerably less than Dominion Ministers had claimed before the purchase of the rights of the Hudson's Bay Company. The Minister of Justice does not, however, advise the disallowance of the Act on this ground, but advises its disallowance upon the ground of the other objection which he suggests, namely, that the Act "seems to encroach upon the powers of the Dominion Government with respect to the appointment of Judges, and goes far beyond any previous Act of a similar character."

The undersigned is respectfully of opinion that this objection has arisen from inadvertence, as he will now proceed to shew.

The Minister refers altogether to the 6th section of the Act, and to the jurisdiction which it confers on the District Court of Algoma,—“a Court,” he observes, “the Judge of which is appointed by the Lieutenant-Governor, and the salary and allowances of whom are fixed by the Provincial Legislature.” Now, the fact is, that by the British North America Act, it is provided that the Governor-General has the appointment of the Judges, not only of Superior and County Courts, but of District Courts also; and the 100th section provides that the salaries and allowances of the Judges of District Courts are, like those of the Superior and County Court Judges, to be fixed and provided by the Parliament of Canada. These sections have always been held to apply to the Judge of the District Court of Algoma; and accordingly, ever since Confederation, his salary has been provided by the Parliament of Canada, and not by this Province. The present Judge was appointed previous to Confederation; and it has not before been suggested that the Lieutenant-Governor has the power of appointing his successor, or that the Provincial Legislature has anything to do with his salary or allowances. The undersigned respectfully submits that there is no ground whatever for either suggestion.

The Minister refers also to the 10th, 14th, and 15th sections of our Act. The 14th section relates to the costs in the District Court; and the 10th and 15th provide for the appointment of certain additional officers for the transaction of the business of the same Court; namely, a Deputy Clerk and a Sheriff. The undersigned assumes that the right of the Province to pass these sections was not intended to be questioned by the Minister or by the Dominion Government.

The only other suggested encroachment “upon the powers of the Dominion Government with respect to the appointment of Judges,” is, the jurisdiction which the Act gives to Stipendiary Magistrates, these officers being appointed by the Lieutenant-Governor. The Minister observes that several of the Provinces “of Canada have, since Confederation, provided for the appointment of officers called Magistrates, Stipendiary Magistrates, Commissioners, etc., and have given to these officers certain judicial functions.” As illustrative of this statement, the Minister refers to an Act of the Legislature of British Columbia, respecting the Gold Commissioner’s Court in that Province; which Act purported to give to the Gold Commissioner, who was a local officer to be appointed by the Lieutenant-Governor, very extensive jurisdiction in civil matters. But, as respects this Province, the office of Stipendiary Magistrate was not created since Confederation, but had existed under our laws for many years previously. These officers are for unorganized tracts, where the population is too sparse and the transactions are too limited to require or justify the holding of Courts of Assize or County Courts; and the object or policy was, and is, to provide by such means for the due administration of justice in such territories until the population and transactions should become such as to require and justify other judicial arrangements. Under the law in force for this purpose at the time of Confederation (C. S. U. C., chap. 128), a Stipendiary Magistrate had part of the jurisdiction which, in the more settled portions of the Province, belonged to County Court Judges, and part of that which, in the more settled portions, belonged to the Superior Courts. By the 13th section of the Act, Stipendiary Magistrates were authorized to hold Division Courts, which, elsewhere in the Province, were held by County Court Judges; and by the 23rd section, jurisdiction was given to them in all personal actions (save as thereafter excepted) where the debt or damages did not exceed \$100. In Division Courts presided over by County Court Judges (C. S. U. C., chap. 19, sec. 55), it was only as to claims and demands of a specified kind that the jurisdiction existed to try cases of that amount; while in other personal actions, the jurisdiction was confined to cases where the debt or damages claimed did not exceed \$40. By the 74th and 75th sections of C. S. U. C., chap. 128, a Stipendiary Magistrate had jurisdiction, by consent of parties, to refer to arbitration matters in dispute, “within the jurisdiction of the Court as to subject matter, but irrespective of amount, if not exceeding \$800;” the arbitration to be “to such persons and in such manner, and in such terms, as he may think reasonable and just.” The Stipendiary Magistrate had jurisdiction also to set aside the award, or to enforce it as a judgment of

his Court, an authority which, in the case of so large an amount, belonged, elsewhere in the Province, to a Superior Court or Judge only.

Such was the jurisdiction of these temporary officers when the British North America Act was passed; and yet, their appointment, or the duty of providing for their salaries and allowances, was not given to the Dominion authorities, and therefore fell to the Province. Whether, if the office were a new one, unknown before Confederation, or if a Stipendiary Magistrate had by law before Confederation no part of the jurisdiction which was exercised elsewhere by Judges of the Superior or District or County Courts, the Legislature would have had jurisdiction to create the office, or to give to the holder of it the jurisdiction mentioned, is another question altogether; but it is plain, under the British North America Act, that, as respects our distant outlying and sparsely populated territories, it is no encroachment on Dominion authority to assign to Stipendiary Magistrates some of the authority belonging elsewhere in the Province to Courts the appointment of whose Judges, and payment of whose salaries, are given to the Dominion.

Before Confederation, the provisions of the Act last mentioned were in operation in the District of Nipissing. Immediately afterwards, the opening up and partial settlement of Muskoka and Parry Sound rendered desirable the extension of the same provisions to these territories. This could, under the Act, have been legally done by proclamation of the Lieutenant-Governor, without further legislation; but an Act of the Legislature in each case was preferred, and was passed (31 Vic. chap. 35; 33 Vic. chap. 24). Subsequently, similar provisions were in the same way extended to Thunder Bay, by 34 Vic., chap. 4. These statutes were passed by the first Legislature of Ontario, and while the late Honourable John Sandfield Macdonald was Attorney-General of Ontario, and Sir John A. Macdonald was Minister of Justice. The report on the Act now in question does not name these Acts, but names a subsequent Act of Ontario, passed in 1877, by which similar provisions had been applied to the Provisional County of Haliburton.

With reference to these Acts, it may be observed here, that the legislation of the Parliament of Canada respecting Keewatin and the North-West Territory, shews that the Parliament of the Dominion agrees, as well with the Parliament of the old Province of Canada, as with the Legislature of Ontario in 1868, 1869, 1871, and 1877, that exceptional legislation is required for territories so thinly populated as those in question. The jurisdiction which the Ontario Act of last session conferred upon the Stipendiary Magistrates therein mentioned is not nearly so great as that conferred by Dominion Statutes upon similar Magistrates in the territories of the Dominion.

The undersigned further respectfully submits, that, as the administration of Justice in the Province, including the constitution, maintenance, and organization of Provincial Courts, belongs exclusively to the Provincial Legislature, it is to this Province alone that the right belongs of determining what the extent, from time to time, should be of the jurisdiction of these temporary officers. The Act in question, however, did not extend their jurisdiction in our undisputed territory in case of money demands, but merely gave a much needed authority in a few other matters as to which otherwise the people would have no practicable remedy. Thus the 19th section gave to the Stipendiary Magistrates the authority which is conferred upon County Court Judges elsewhere by the statute respecting over-holding tenants, an authority ordinarily exercised by those Judges in Chambers. A reference to R. S. O., chap. 137; sec. 3, will shew that this jurisdiction only exists where tenants over-hold without colour of right, and the 6th section provides for the action taken being subject to the supervision of the superior Courts.

With respect to any territory which Ontario may have west of the provisional boundary line or north of the height of land, the jurisdiction given to the Stipendiary Magistrate sitting in a Division Court is by the 8th section increased from \$100 to \$200 in certain classes of cases, namely, in suits relating to debt contract and covenant, or to \$400, where the amount is ascertained by the signature of the defendant; provided, however, that the contract or covenant was made within the limit for which the Court is held, or provided the cause of action arose therein, or the defendant resides therein. The purchasing power of \$200 in this territory now is less than of \$100 when that sum was named. Jurisdiction is also given in minor cases between landlord and tenant, and in replevin, where the value of the goods claimed does not exceed \$100; an appeal is provided

for from the decision of the Magistrate where the amount claimed is \$200 or upwards, or where title to land or other corporeal property is in question (section 16, sub-section 4); and, on the other hand, various matters are excluded from the jurisdiction of the Magistrate, namely, actions for gambling debts, for spirituous or malt liquors, for malicious prosecution, libel, slander, criminal conversation, seduction, or breach of promise of marriage, and actions against a Justice of the Peace for anything done by him in the execution of his office, if he objects thereto. These provisions shew that the Legislature has carefully refrained from trusting to the decision of the Stipendiary Magistrate matters likely to be of an important nature, and has guarded the rights of parties by providing a convenient mode of appeal where the money or property in question appears sufficient to justify an appeal.

These considerations make it plain that the present Act bears no analogy to the British Columbia Act, which purported to confer upon Mining Courts jurisdiction in all personal actions arising within the limits of their respective districts.

The undersigned trusts that, in view of these considerations, the Government of Canada will perceive that the Act in question is not objectionable on any ground urged against it, and that its disallowance is not necessary, and would not under all the circumstances be a proper exercise of Dominion authority.

The despatch was received when the recent session of the Legislature was far advanced, and it appeared necessary therefore to provide at once for the contingency of the disallowance, it being assumed that the Dominion Government, in common with the Province, felt and would recognize the propriety of some provision being made for the administration of justice, instead of the territory in question being left to utter lawlessness and anarchy. A new Act was accordingly passed, which is not to go into effect unless and until the former Act is disallowed. The new Act confines the jurisdiction of the Stipendiary Magistrates as regards subject matter and amount to the limits provided for by the law in force before Confederation, and avoids any disputable reference to the extent of the territory within which the Act is to operate, leaving that question to be wholly determined, as may be, by the law and the right.

As the territory in dispute is included in the territory which the Province of Canada before Confederation claimed as part of Canada, and therefore of Canada West, or Upper Canada; and in the territory to which the Dominion, through its Ministers, after Confederation, and until the purchase from the Hudson's Bay Company, made the same claim, and on the same grounds; and which territory the Province of Ontario continued afterwards to claim; and as the territory, still it seems in dispute, was eighteen months ago solemnly awarded to the Province as its rightful property by the unanimous decision of three Arbitrators of the highest character and competency, who had been mutually chosen by the two Governments, it is obvious that the *prima facie* right to the territory, if not (as we insist) the certain and absolute right, is, and must be taken to be, in Ontario; and it is the consequent obvious duty of the Province to make such reasonable provision as may be practicable for the administration of justice among the population of the territory. The dispute or delay on the part of the Dominion with respect to the award causes uncertainty and its daily increasing and grave evils in connection with the administration of justice; and if the dispute or delay is to continue, the undersigned is respectfully of opinion that the evils referred to, which all must regret, will be intensified by the disallowance of the Provincial legislation, and that their removal, or partial removal, calls rather for provisional legislation by the Dominion (without prejudice to the matter in dispute), expressly giving to the laws of Ontario and its officers authority in the territory, pending the dispute by the Dominion, or pending the settlement and recognition of the true boundaries.

The undersigned respectfully recommends that, in case the views which the undersigned has expressed are concurred in by His Honour in Council, a copy of this Report be forthwith transmitted to the Secretary of State, with a copy of the Act passed on the subject at the recent session of the Legislature.

(Signed) O. MOWAT,

March 18th, 1880.

OTTAWA, 17th MARCH, 1880.

I have the honour to report—That, under the Order in Council of the 12th February, respecting an Act passed by the Legislature of Ontario at its session of 1879, intituled “An Act respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario,” it was provided that, unless the same were repealed within the time for disallowance, it should be disallowed.

A copy of my Report, and of the Order in Council passed thereon, were transmitted in due course to the Ontario Government. A reply has just now been received, from which it would appear that the Act has not been repealed, but that another Act, making provision for the administration of justice in the locality, has been passed, but which Act is not to go into operation unless and until the Act now under consideration be disallowed.

The Attorney-General of Ontario states, that “the new Act confines the jurisdiction of Stipendiary Magistrates as regards subject matter, and amount, to the limits provided for by the law in force before Confederation, and avoids any disputable reference to the extent of the territory within which the Act is to operate, leaving that question to be wholly determined as may be by the law and the right.”

I have not yet had an opportunity of seeing this Act, and therefore pass no opinion with respect to it. It will have to be considered and reported upon in the usual way.

Pursuant to the provisions of the Order in Council of the 12th February, I think the Act passed by the Legislature of the Province of Ontario, first above referred to, should be disallowed, and I recommend accordingly.

Before closing this report I desire to refer to some of the remarks of the Attorney-General of Ontario with respect to the Act.

In my previous report I pointed out two grounds upon which it was necessary to take action with respect to the allowance or disallowance, the first being on account of its assuming to make provision for the administration of justice over territory the right of Ontario to which is not admitted by this Government; the second was, that the Act encroached upon the powers of the Dominion Government with respect to the appointment of Judges.

It is unnecessary to reply to the arguments adduced by the Attorney-General with respect to the boundaries of Ontario, as any discussion thereon upon a reference of this kind would seem to be inopportune.

With respect to the second ground, however, the Attorney-General points out that the provisions respecting the “District Court” referred to in the Act were intended to apply only to the Court presided over by the Judge resident in Sault Ste. Marie, who received his appointment before Confederation, and whose successor would have to be appointed by the Governor-General, and that the provisions respecting this Court do not apply to the Court presided over by the Stipendiary Magistrates referred to in the Act.

In this view, so much of the Act as relates to that District Court would not seem to be open to the same objections as those portions which refer to the Stipendiary Magistrates, but the objections pointed out in my previous report to those portions of the Act which refer to the Stipendiary Magistrates and the Courts presided over by them still remain, and of themselves, in my opinion, would warrant the disallowance of the Act.

The Attorney-General remarks in referring to the disputed boundary question, that “the Minister of Justice does not, however, advise the disallowance of the Act on this account, but advises its disallowance upon the grounds of the other objection which he suggests, namely, that the Act seems to encroach upon the powers of the Dominion Government with respect to the appointment of Judges.”

It would seem immaterial upon which of the two grounds the disallowance was recommended; but I would point out that the recommendation in my report was a general one, and was not confined to either ground.

(Signed) JAS. McDONALD,

Minister of Justice.

GOVERNMENT HOUSE,

OTTAWA, Monday, 22nd day of March, 1880.

Present—His Excellency the Governor-General in Council.

Whereas, the Lieutenant-Governor of the Province of Ontario, with the Legislative Assembly of that Province, did, on the 11th day of March, 1879, pass an Act (chapter 19) intituled “An Act respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario;”

And Whereas, the said Act has been laid before the Governor-General in Council, together with a Report from the Minister of Justice, setting forth that he is of opinion that it was not competent for the Legislature of the Province of Ontario to pass such Act, and therefore recommending that the said Act should not receive the confirmation of the Governor-General;

His Excellency the Governor-General has thereupon this day been pleased, by and with the advice of his Privy Council, to declare his disallowance of the said Act, and the same is hereby disallowed accordingly;

Whereof the Lieutenant-Governor of the Province of Ontario, and all other persons whom it may concern, are to take notice and govern themselves accordingly.

J. O. COTE,

Clerk Privy Council.

I, Sir John Douglas Sutherland Campbell, commonly called the Marquis of Lorne, Governor-General of Canada, do hereby certify that the Act passed by the Legislature of Ontario the 11th day of March, 1879, (Chapter 19) intituled “An Act respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario,” was received by me on the 26th day of March, 1879.

Given under my hand and seal this twenty-second day of March, 1880.

(Signed)

LORNE.

[Seal.]

OTTAWA, 22nd March, 1880.

SIR,—I have the honour to transmit to you herewith for the information of your Government an Order of His Excellency the Governor-General in Council disallowing an Act passed by the Legislature of the Province of Ontario on the 11th day of March, 1879, (Chapter 19) intituled “An Act respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario.”

I have the honour to be, Sir,

Your obedient Servant,

J. C. AIKINS,

Secretary of State.

His Honour the Lieutenant-Governor of Ontario,

Toronto.

GOVERNMENT HOUSE,

TORONTO, 25th March, 1880.

SIR,—Adverting to your letter of the 22nd March forwarding an Order of His Excellency the Governor-General in Council, disallowing an Act passed by the Legislature of this Province on the 11th instant, intituled “An Act respecting the Administration of

Justice in the Northerly and Westerly Parts of Ontario," I have the honour to request you to forward to me a copy of the Report of the Minister of Justice therein alluded to.

I have the honour to be, Sir,

Your obedient servant,

(Signed)

D. A. MACDONALD,

Lieutenant-Governor.

The Honourable the Secretary of State, Canada,

Ottawa.

OTTAWA, 30th March, 1880.

SIR,—In compliance with the request contained in your despatch of the 25th instant, I have the honour to transmit to you herewith a copy of the Report of the Honourable the Minister of Justice upon which the Order of His Excellency the Governor-General of the 22nd instant, disallowing the Act of the Legislature of the Province of Ontario, entitled "An Act respecting the Administration of Justice in the Northerly and Westerly Parts of Ontario," was passed.

I have the honour to be, Sir,

Your obedient servant,

(Signed)

J. C. AIKINS,

Secretary of State.

His Honour the Lieutenant-Governor of Ontario.

TORONTO, April 23rd, 1880.

DEAR SIR,—Since our conversation at Ottawa with reference to the steps to be taken for the administration of justice in the disputed territory in the North-West, I have given to the matter some further consideration, and as your Government is not yet prepared to concede our right to the territory, I have drafted a Bill, which I send herewith, embodying the provisions which seem to me necessary or desirable for the government of the territory in the meantime.

The Supreme Court has decided that your Parliament has power to pass a prohibitory liquor law, and I presume it is of special importance that no intoxicating liquors should be sold along the line of the Pacific Railway. Your claim to the territory up to the meridian of the confluence of the Ohio and Mississippi implies a claim that the Keewatin law as to intoxicants extends to that meridian; but as by the decision of the Supreme Court you have power to make that law or a similar law applicable, whether your claim to the territory is well founded or not, I suggest an enactment declaring in express terms that the Act, or such modification of it as you may prefer, is to have effect whether such territory is within Ontario or Keewatin.

If you do not consider it advisable that a prohibitory law should be in force so far east, then, to avoid clashing, I suggest that Parliament confer on the License Commissioners of Ontario for Thunder Bay the right to issue licenses in so much of the disputed territory as is not to be covered by the prohibition.

As the jurisdiction in regard to criminal procedure in every part of the Dominion belongs to the Dominion Parliament, I suggest as, on the whole, the more convenient course with respect to the disputed territory, that, in the territory west of what was formerly the Provisional Boundary, ordinary criminal cases be disposed of according to the procedure in force in Keewatin, and in the territory east of the line according to the procedure in force in other parts of Ontario. I suggest this as a rule to be acted upon as far as practicable without being embodied in a Legislative enactment; authority to be given to Justices, etc., of Keewatin and of Thunder Bay or Algoma, to act in any part of the disputed territory.

A Bill now before Parliament provides for the committal of criminals to gaol either at Prince Arthur's Landing or at Winnipeg. To provide for cases where the summary procedure applicable to Keewatin is not considered sufficient, you might enact that any person charged with crime may be tried in either Manitoba or Ontario, and in any county or district of either of these Provinces.

You are aware that a man named Horn is in custody at Prince Arthur's Landing, charged with murder. I do not at present know sufficient of the facts of the case to determine whether it will be more convenient to try him where the murder took place or at Prince Arthur's Landing. If the latter course is decided upon, the trial had better be before Commissioners of Oyer and Terminer. The Chief Justice of Manitoba would not care to come so far east from Winnipeg in order to try the case. I do not know what ordinances have been issued for the administration of justice in Keewatin, but I assume that a murder case ought to be tried by a Judge. In case you issue a commission for this purpose, we would issue a commission to the same Commissioners and in the same terms, according to the course taken under preceding Governments to avoid unnecessary questions as to the proper authority for issuing such commissions.

The Court of Queen's Bench, in the case of *Regina vs. Amer* (42 U. C. R., 391), decided that the District Judge of Algoma could be commissioned to hold a Court of Oyer and Terminer and General Gaol Delivery, but Mr. Justice Cameron was counsel for the Amers, and was not satisfied with the judgment; he might take the same view as a Judge; and there is a possibility that the Supreme Court might not decide as our Court of Queen's Bench did. The point taken was, that the Act C. S. U. C., Cap. 11, Sec. 2, prevented the Crown from issuing a Commission of Oyer and Terminer addressed to any one not named in that section, and that as a District Judge is not expressly named, Judge McCrae, the District Judge, could not be nominated. As it is not likely that our Superior Court Judges will go so far west to hold Assizes for some years to come, I suggest an Act settling this question so far as Parliament has jurisdiction to do so. I send a short Bill for this purpose.

In regard to civil matters, to assume or declare that the Keewatin law as to civic procedure shall be in force in any part of the disputed territory would put it in the power of any suitor to raise the boundary question, as, if our claim of boundary is correct, such an enactment would be *ultra vires*. I think, therefore, that for the determination of civil rights, you will find it the convenient and indeed only practicable course, to confirm, in reference to the disputed territory, the jurisdiction of our Stipendary Magistrate (Sec. 43, Victoria cap. 12, sec. 3), and to provide that matters beyond his jurisdiction shall be determined in the District Court of Algoma where the cause of action is within the jurisdiction of that Court (Ib. sec. 5). Where the matter is beyond the jurisdiction of the District Court of Algoma, authority to try in any Superior Court of Ontario, and in any County, should be given.

I presume, since your Government declines to admit our title, you will pay the expenses of the administration of justice in the disputed territory so long as it is disputed.

Yours truly,

(Signed)

O. MOWAT.

*The Honourable James McDonald, Minister of Justice,
Ottawa.*

SPECIAL REPORT

OF

THE MINISTER OF EDUCATION

ON

THE UPPER CANADA COLLEGE

AND

ROYAL GRAMMAR SCHOOL.

EDUCATION DEPARTMENT (Ontario),
31st January, 1881.

To His Honour

THE HONOURABLE JOHN BEVERLEY ROBINSON,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR :

I respectfully beg to present herewith the following Special Report on the Upper Canada College and Royal Grammar School :—

I.—*Foundation.*

The origin of Upper Canada College and Royal Grammar School is set out in the Final Report of the Commission of Enquiry as to King's College, dated August 7, 1848. The circumstances were, that in 1798 a grant of 549,000 acres of land, from the public domain, was made by the Crown, in response to a joint address of the Legislative

Council and Assembly of Upper Canada, which prayed that His Majesty would be pleased to direct his Government in the Province to appropriate a certain portion of the lands of the Crown as a fund for educational purposes, including the establishment and support of a respectable Grammar School in each district thereof, and also a College or University for the instruction of youth in the different branches of liberal knowledge.

The Province at that time was divided in four Districts. Of the above lands 190,573 acres were assigned by the Imperial Government to a General Board of Education for the Province, established in 1823, for the support of Grammar and Common Schools. In 1826 there were 350 Common Schools and 11 District or Grammar Schools, the former having an attendance of 8,000 and the latter about 300.

The residue of the grant being 358,427 acres, was regarded by the Provincial Government as applicable to the support of the contemplated University, and an exchange was made by the Imperial Government of Crown Reserves of an equal quantity of land, with the view of securing the immediate establishment of the University. (*See Report of Commissioners on King's College, pages 15 to 17*).

In the Message of the Lieutenant-Governor to the Legislative Assembly (*see Journals of the Assembly, 26th December, 1831*) it is stated that from this land 66,000 acres had been set apart for the support of Upper Canada College and Royal Grammar School. This Report (page 349) also shows that the total quantity granted was 63,996 acres, of which 22,048 had been sold, leaving 41,941 then unsold.

II.—*Present Condition of the Endowment.*

The present condition is shown by the Bursar's statement of capital and income, on the 31st December, 1880, to be as follows:—

PARTICULARS.	CAPITAL.		INCOME.	
	\$	cts.	\$	cts.
1. Debentures	180,920	00	10,423	00
2. Mortgages (1st) on real estate	41,700	00	3,405	00
3. Purchase money unpaid on sales of land	14,038	00	842	00
4. Bursar's office building, rent			400	00
5. Lots on block "D" (Toronto), rent			62	00
			\$15,137	00

Block "A," Russell Square, Toronto, containing 9 acres, occupied by the College buildings is also owned by the College.

2. The annual income derived from endowment is \$14,677; from tuition fees, \$10,000. Total annual resources, \$24,677.

3. The annual expenses are, for salaries of Principal, Masters and Instructors, \$16,168, and the following pensions: ex-Principal Barron, \$1,000; Dr. Barrett, \$800. Total, \$17,968. Other charges, such as for insurance, current expenditure and management, amount to \$15,648, or a total annual expenditure of \$23,616, leaving an apparent surplus of \$1,058.

4. *Tuition Fees.*—Chargeable to pupils from Toronto, \$50 per annum; from those boarding in the College residence, \$30.

5. The Sessional Papers of 1878, vol. x., No. 35, and of 1879, vol. xi., No. 18, give the particulars of cash transactions of the College for the periods therein mentioned.

III.—Statement of Pupils.

1. Total number of pupils who have entered from the first opening of the College, in January, 1830, until June 30th, 1867, (a) from places of residence in the Province outside of the limits of Toronto, is 1325 ; (b) from within such limits, 1848. Total, 3173.

2. Total number of pupils who have entered between 1st July, 1867, and 1st July, 1880, (a) from places of residence in the Province outside of Toronto, is 1784 ; (b) from within the limits of Toronto, 2,099. Total, 3,883.

The total from Toronto being 3,947 ; other places in the Province, 3,103, or a total number who have entered of 7,050.

3. The number of pupils in the several forms in the last three academic years (being 1877-8, 1878-9, 1879-80) are as follows :—

NUMBER OF PUPILS.				NUMBER OF PUPILS.			
	Session 1877-8.	Session 1878-9.	Session 1879-80.		Session 1877-8.	Session 1878-9.	Session 1879-80.
Form 6	15	12	11	Form 2 (b).	37	38	31
“ 5	14	24	29	“ 2 (a)	31	35	33
“ 4 (b)	24	29	26	“ 1 (b)	36	33	33
“ 4 (a)	30	28	29	“ 1 (a)	34	28	27
“ 3 (b)	35	39	32				
“ 3 (a)	37	32	31	Total	293	298	282

Of total number in 1877-8—being 293—pupils from Toronto were 164 ; other parts of the Province, 116 ; Province of Quebec, 5 ; United States, 8.

Of total number in 1878-9—being 298—pupils from Toronto were 161 ; other parts of the Province, 125 ; Quebec, 5 ; United States, 7.

Of total number in 1879-80—being 282—pupils from Toronto were 139 ; other parts of the Province, 130 ; Quebec, 6 ; United States, 5 ; other places, 2.

Number of pupils in forms No. 6 to 3 (a) inclusive, and from 2 (b) to 1 (a) inclusive :—

	1877-8	1878-9.	1879-80.

“ 2 (b) to 1 (a)	138	134	124
	293	298	282

4. The several occupations of the parents of the pupils in the Session of 1880 are shown in Schedule A.

From this it will appear that the greater number of the parents are in moderate circumstances, and in many instances are doubtless struggling to afford their children the benefits of the instruction at the College, for which they are paying the yearly tuition fee, for day pupils of \$50, and for boarders of \$80, when at the Toronto Collegiate Institute this fee is \$20.

IV.—*Statement of Boarders in Residence.*

The number of pupils in residence during the period from 1st July, 1867, to 1st July, 1880, appears as follows, distinguishing (1) as to residents of Toronto, (2) other parts of the Province, (3) other Provinces of Canada, (4) elsewhere:—

Year.	City.	Province of Ontario.	Other Provinces.	Elsewhere.	Total.
1867-8.....	7	55	13	75
1868-9.....	11	49	1	11	72
1869-70.....	10	62	2	23	97

V.—*Statement of Honors and Scholarships Gained by Pupils.*

There is a list of scholars gaining distinctions inscribed in the public hall of the College for the years from 1845 to 1857, and printed lists have been published from the years from 1858 to 1866, and thence to, and including, the year 1877, showing the names and distinctions of pupils obtaining scholarships, medals or prizes at the University of Toronto, University College, and Trinity College, Toronto.

The printed lists show the following results at the Entrance or Matriculation Examination, beginning with the year 1858, and having regard to the number of such

honors gained in the University of Toronto, University College, and Trinity College, respectively:—

YEARS.	University of Toronto.	University College.	Trinity College.	YEARS.	University of Toronto.	University College.	Trinity College.
1858.....	16	21	7	1868.	19	11	10
1859.....	19	16	5	1869.	22	13	0
1860.....	7	9	11	1870.....	29	21	3
1861.....	4	4	14	1871.....	26	13	4
1862.....	14	7	6	1872.....	19	12	3
1863	11	10	6	1873.....	15	10	2
1864.....	11	10	5	1874*.....	21	9	0
1865.	11	8	5	1875.....	20	15	1
1866.....	12	16	5	1876†.....	15	13	1
1867.....	18	14	7	1877‡.....	19	10	1

From the published lists of the University of Toronto as to the Matriculation Examinations held for the years from 1867 to 1879 inclusive, the following results appear:—

Total Scholarships awarded in Junior Arts, Law and Medicine, years 1867-1879.	Obtained by pupils educated at Upper Canada College in whole or in part.	Obtained by pupils educated at Collegiate Institutes and High Schools, in whole or in part.	Obtained by pupils educated in other schools privately and self-taught, in whole or in part.	TOTALS.
146	(a) 40 whole	66 whole	17 whole	=123
	(b) 10 part	27 part	9 part	46=23

The credit to each Institution for pupils thus gaining scholarships and educated in two or more is always shown on the University lists, and for what period.

In case of pupils gaining scholarships and partially educated at Upper Canada College, it is to be noticed that in such credits assigned to the College, in every case it was the last school attended, thus showing that it was for the express purpose of preparation for the Matriculation Examination.

The following statement has been obtained from the Registrar of the University, and it shows the number of matriculants in the last three academic years in the different

* Two First-class Honors, University of McGill, Montreal. Gold Medal for Oration at Cornell University, and also six Honors from 1870 to 1874.

† McGill University, Macdonald Exhibition.

‡ First-class Honors in Moderations, Oxford. Shakespeare Prize, Balliol College, Oxford. Emperor of Russia's First Prize for "History of Cavalry."

Faculties, with the respective numbers from the College, Collegiate Institutes, High Schools, and other sources, as follows:—

No.	—	1877.			1878.			1879.			1880.			Total.
		Arts.	Medicine.	Law.	Arts.	Medicine.	Law.	Arts.	Medicine.	Law.	Arts.	Medicine.	Law.	
1	Upper Canada College	17	0	0	15	0	0	13	0	0	16	3	0	64

4	Other sources—chiefly private tuition and study	5	0	0	16	0	0	20	0	2	35	0	0	78
														619

The following further results have been obtained from an examination of the class and prize lists of the University of Toronto, from 1867 to 1880, during which period the following honors were obtained, viz.:—First-class, 175; Second-class, 204; Scholarships, 51. Total, equal 430.

In the last three years, amongst other Honors obtained in the regular University course, by Upper Canada College pupils, beginning in 1878, are the following:—

HONORS.	1878.	1879.	1880.
Degrees in Arts.....	5	7	8
“ “ Medicine.....	4	3	3
“ “ Law.....	1	0	1
Medals in Arts.....	1	2	4
Scholarships in Law.....	2	0	0
“ “ Arts.....	7	9	7

VI.—Public and other Positions.

No record has been kept which would show the names of pupils in the period between January, 1830, and July, 1867, who gained distinctions in their careers in life, but the following will show some of the positions occupied by them:—

In the Province of Canada.

Executive Council—members	4
Legislative Council—members.....	2
“ Assembly—members (last Session)	8
“ “ Speakers.....	2
Solicitors-General	5

An examination of the register of pupils, and information from contemporary records and other sources show many other important positions filled by ex-pupils in the professions of law and medicine and as clergymen; several became distinguished in the British military service: several filled County Court judgeships, and others mayorships of cities and municipal offices; many have succeeded in mercantile and manufacturing pursuits, and several became distinguished as civil engineers; while in science, three obtained high places as wranglers in the mathematical tripos at Cambridge, and afterwards filled professors' chairs; and others have been principals and masters in colleges and high schools.

Since July, 1867, more specific data is obtainable. Thus, in the Dominion of Canada, in the first Parliament, there was in the Senate one ex-pupil; in the House of Commons, eight; in 1871, in the House of Commons, there were seven, including the Speaker; in 1873 there were nine, including the Speaker, and in 1874 there were eleven. One ex-pupil also became Minister of Justice and Attorney-General of the Dominion of Canada, and another Attorney-General of the Province of Ontario. The law list shows that nine ex-pupils are Benchers of the Law Society, nine Queen's Counsel, and 154 barristers and attorneys, of whom 50 practice in Toronto.

On the Bench of the Superior Courts there are now four ex-pupils, while the late Chief-Justice of Ontario and his immediate predecessor were also pupils.

Of the County Court Judges five are ex-pupils.

The present Lieutenant-Governor of Ontario is an ex-pupil, and also one of the Lieutenant-Governors who preceded him. The Chancellor of the University of Toronto, and an ex-Chancellor and five Vice-Chancellors thereof were ex-pupils.

In the *Ontario Medical Register*, of May, 1878, amongst the regular practitioners are 44 ex-pupils.

VII.—*Course of Study.*

The course of study now in force is to be found printed in the College Prospectus. From this it appears that the entrance qualification for the first, or lowest, form, is that the pupil should possess a fair knowledge of English, reading and spelling, writing, and the first four rules of arithmetic, the usual age of the pupil being about ten. For admission to other forms there is an examination in studies, corresponding with the work of the particular form. If the pupil is 14 years of age a certificate of character must be produced from the Head Master of the school last attended. It is optional to enter the classical or modern department. In the first form the study of Latin and French is commenced. Instruction is also given in the ordinary English subjects, as well as in modern geography and arithmetic. In the second form there is a further advance in the subjects of the first, with arithmetic to decimal fractions, and algebra is begun. In the third form a further advance, Greek being commenced, and in arithmetic and algebra, also in French. In the fourth form further progress in Latin and Greek, in Roman history (ancient), and antiquities, also in English composition and literature, modern geography, algebra, and simple equations, books I. and II. of Euclid, dictation, reading and French, and beginning of chemistry. Each of these forms are divided into two divisions, A and B, doing the same work. In the fifth and sixth forms the Classical studies are under the Principal himself, aided by the Classical master. In the fifth form the Classics read are Ovid, Virgil, Cicero, Cæsar, Zenophon, Homer, and in the sixth form, in addition, Horace, Demosthenes, and in Modern Languages, Linnæus, Buffon, Corneille, Dumas, Schiller, Mælius, and the whole of the matriculation work of the University prescribed for honours.

Exhibitions were founded in 1843 by the Council of King's College, and have since been modified by statute of the Senate of the University. They are eight in number, four being competed for annually in the subjects of the fourth form, and four of those in the fifth. The rewards are free tuition for one year, with eighty dollars in money, to the highest in each examination, and forty dollars to the next. They are open to the whole Province, being tenable for one year in the fifth and sixth forms of Upper Canada College respectively, or any High School or Collegiate Institute in Ontario.

VIII.—*Fees payable by Pupils.*

1. There are four Terms in the school year, and the fee for tuition in all the regular subjects taught is per term, for one pupil, \$12.50.

2. The fee for residents in the Boarding-house includes tuition, and is per term, for one pupil, \$52.50.

IX.—*Accommodation.*

The College building now possesses class-rooms complete in every particular, and with a capacity for more than 300 pupils. The position of the centre building with the class-rooms, relatively to the Masters' residences and the Boarding-house, is shown in the diagram, schedule B.

The inferior condition in which the Boarding-house then was, and still continues, appears from the report of the Committee of Management to the Lieutenant-Governor in Council, dated 27th February, 1880. Schedule C.

X.—*Management.*

The management of Upper Canada College was, from its foundation in 1829 until March, 1833, by its own Board of Directors and Trustees, when by an order of the Lieutenant-Governor it was transferred to the Council of King's College, and by the Act of 1837 was incorporated with, and formed an appendage of the University of King's College, subject to its jurisdiction, and it thus remained until the 1st of January, 1850, when the University Act of 1849 came into force, which, while declaring that the College was an appendage of the University, conferred upon it the management by its own Council subject to the authority of the caput of the University as to the disallowance of any statute or rule, also with an Endowment Board.

By the Act of 1853 Upper Canada College was placed under the control and management of the Senate of the University, with power to make statutes for the good government and regulation of the College and Royal Grammar School, and for the Principal and masters, and the fees and the general management of the business and affairs thereof.

The duty of reporting to the Government from time to time is imposed upon the Senate.

Under this authority a committee appointed by the Senate, consisting of five members, constitutes the Board of Management of the College, which is entrusted by Order-in-Council with the administration of its financial affairs so far as regards the disposition of its income, and subject to the Lieutenant-Governor in Council, as to the capital and endowment.

Reports of such committee will be found in the sessional papers of 1878, in the return to the House on the 26th February of that year. The report of the Chairman, the late Honourable Thomas Moss, Chief Justice of Ontario and Vice-Chancellor of the University, of the 17th January, 1877, presents the then condition of the College in its financial and other respects.

In the constitution of this committee the Chancellor and Vice-Chancellor are members *ex officio*, and three members are elected by the Senate. The present committee consists of the Chancellor, the Honourable Edward Blake, the Vice-Chancellor, Mr. Mulock, the Honourable Mr. Justice Patterson, Colonel Gzowski, and His Honour Judge Boyd.

XI.—*Teachers' Salaries and Duties.*

A list of the masters will be found in Schedule D, with their salaries, allowances and dates of appointment.

The following additions to salaries are paid from tuition fees authorized by statutes of the Senate, in Schedule E, namely:—\$400 each to the Principal, first and second Classical masters, Mathematical master, second English master, French and German master, and the Principal also receives ten per cent. of the tuition fees, equal \$1,000.

XII.—*Comparison with High Schools.*

Tabular statement in Schedule F shows for the period from 1872 to 1879 inclusive, the number of High Schools and the receipts, (1) from the Legislative grants, (2) from municipal grants, (3) from tuition fees, and (4) from all other sources, and the totals thereof. Also the number of pupils, the number in the upper school, and the number in the lower school; the number in Latin, and the number in Greek: also the percentage of receipts from each source compared with the total receipts: also the cost per capita of each pupil. From this statement it appears that the percentage of receipts from the Legislative grants in the respective years of 1872, 1873, 1874, 1875, 1876, 1877, 1878, and 1879 was 35, 31, 20, 22, 24, 21, 19, 19. This grant has taken the place of grants from the High School Fund, the interest upon which was, by Act 33 Vic., chap. 9, transferred to the Consolidated Revenue, from which the High Schools now receive more than three times the annual interest on the capital which would represent the Fund. The highest amount in any one year being 1872, equal \$79,543, and the lowest in 1877, being \$76,721. The amounts in 1878 and 1879 were nearly the same, being \$78,903 and \$78,180.

The increase in the municipal grants in the respective years as above, is represented in the percentages following: 38, 40, 46, 47, 44, 44, 48, 46. The largest amount in any year being \$202,848 in 1878, when the County Grant was for the first time made equal to the Legislative Grant, the smallest amount being in 1872, equal \$84,970. The amount in 1879 was less than in 1878, being \$190,326, or a decrease of \$12,522.

The percentage of tuition fees received in the respective years, as above, was as follows: 9, 8, 7, 5, 6, 6, 5, 6. The highest amount was in 1879, being \$26,225; the smallest amount was in 1875, \$17,990.

The percentage of receipts in the respective years was as follows: 17, 21, 22, 26, 26, 28, 27, 29.

The cost per pupil in such years was as follows: \$28, \$29, \$38, \$42, \$37, \$31, \$39, \$34.

The number of High Schools in which tuition is free is 72, and 32 in which fees are charged, the maximum being \$28 per annum, and the minimum \$4, according to the following table:

2 at \$0 75 per Term.	6 at \$4 00 per Term.
3 at 1 00 "	1 at 4 37½ "
4 at 1 50 "	1 at 4 50 "
3 at 2 00 "	4 at 5 00 "
2 at 2 50 "	1 at 6 00 "
3 at 3 00 "	1 at 7 00 "
1 at 3 50 "	—
	32

There is only one High School (namely, Galt) which provides accommodation for boarders, so far as there is any information in the Education Department; while in several instances lodgings are provided in private families.

The regulations, which first came into force in 1873, required each pupil, before admission to the High Schools, to successfully pass the Entrance Examination. The object of the High School is to afford secondary education in all such subjects as each pupil may require, in addition to elementary instruction, for any career in life. The course of study is therefore comprehensive, and while the Department prescribes the subjects of study and the amount to be done in the lower and upper schools respectively, it is left to the High School Board to decide, according to the varying circumstances of the schools, the order in which the subjects shall be taken, the amount of work to be done in a given time, and the number of classes. At page 254 of the School Compendium will be found the course of study and the subjects in detail, with the options and other privileges allowed. In 1876 the regulations for two half-yearly examinations in

the subjects of the lower school came into force at the June examinations, but subsequent experience proved that one yearly examination was more beneficial, and this change was made in the year 1879.

The intermediate examination is now also further utilized for determining the non-professional standing of candidates for both Second and Third-class Certificates, who all come up to this examination together.

The High Schools are inspected in each half-year by one of the three High School Inspectors of this Department visiting in rotation, and their reports are returned to the Department for my perusal and any necessary action. The High School Board is also required to submit its annual report, as well as the half-yearly return of the attendance of pupils, showing those admitted at the entrance examination, and in the lower and upper schools respectively.

A comparison between Upper Canada College and the High Schools and Collegiate Institutes, in some educational and financial respects, will appear in Schedule G.

From statements in this schedule it appears, (1) that in the College the percentage of pupils in Classics and Modern Languages is much larger than that in the Collegiate Institutes and High Schools, while in Algebra and Geometry it is lower; (2) that the cost per pupil in the College from the income of the endowment, is \$42, while in the Collegiate Institutes and High Schools, from receipts from all sources (exclusive of fees), is \$38; (3) that the College contributes, in tuition fees (exclusive of board dues), \$10,333, or 45 per cent. of its total receipts, and the 104 Collegiate Institutes and High Schools contribute, in tuition fees, \$21,581, or 5 per cent. of their total receipts, or exactly one-ninth of tuition fees received by the College; (4) that the cost per pupil from public sources, is \$4, in the College, in excess of the cost per pupil from the like sources in the Collegiate Institutes and High Schools, while in the College forty per cent. more is paid directly by parents of the pupils who, moreover, as ratepayers, contribute in common with all other ratepayers, according to the amount of their assessment, to the support of the Public Schools, Collegiate Institutes, and High Schools throughout the Province.

XIII.—*General Remarks.*

The following statements will also assist in affording further information upon the position and relations of the College, in our Provincial system of education.

1. While the subjects comprised in the present course of study in the College are in general similar to those which prevail in the High Schools, and both have a common test at the Matriculation examinations of the Provincial University, yet a much smaller number of pupils in the High Schools take advantage of the subjects of study which include Latin or Greek classics, or the French and German languages.

100 per cent. of the College pupils are in Latin, 40 per cent. in Greek, 100 per cent. in French, and 33 per cent. in German, while the High Schools show 44 per cent. in Latin, 8½ per cent. in Greek, 34 per cent. in French, and 5 per cent. in German. In the subjects of Arithmetic, Algebra, Geometry and Trigonometry, there is a higher percentage in the High Schools; while in English Grammar, History and Geography, the percentages are higher in the College. The proportion of Masters to pupils is nearly the same. The College exceeds by four dollars per pupil the cost from public sources, but while from tuition fees, it receives 45 per cent., the High Schools receive only 5 per cent. The cost per pupil in the College from all sources, is \$76.60 while in the High Schools the cost is \$40.

2. As the entrance examination upon elementary English subjects is the test of admission to the High School, the pupil if well grounded, should be in a favourable position for obtaining all the benefits of secondary instruction, in the different classes of the High School course, but there is a marked disproportion between the average attendance in the classes of the Lower School, and those of the Upper School, the percentage of average attendance in the Lower School in the four years from 1876 to 1879 inclusive, was 50 per cent., and in the upper school 6½ per cent, while in the College the attendance in the upper forms from 4 (a) to the sixth represents 33 per cent.

3. At the University Matriculation Examinations a larger percentage of scholarships was obtained by the College pupils than by those from the High Schools. In the twelve years from 1867 to 1879 inclusive, the average annual number of pupils in the College being 300 the number of scholarships gained was 45, while the High School pupils numbering 10,000 gained 80. The one thus showing an average of 15 per cent. and the other of $\frac{8}{10}$ per cent. The results of the Matriculation Examinations for the last three years show that the number of matriculants was 64 from the College, with its 300 pupils, and 477 from the High Schools with their 10,000 pupils. While the charge per pupil in the College upon public funds is \$4 in excess of that in the High Schools, the parents of the pupils in the College contribute from their own means 45 per cent. of the total cost, while the parents of those in the High Schools contribute only 5 per cent. The cost per pupil in the College (\$76.60) is largely in excess of that in the High Schools (\$40).

4. From its name and the circumstances attending its foundation, Upper Canada College was intended to meet a Provincial want in higher education, and notwithstanding its location, and limited boarding house accommodation and other causes, nearly one half of the pupils who have enjoyed its benefits came from the Province at large, while those in Toronto are called upon to pay much larger tuition fees. The High Schools are the successors of the District Grammar Schools, eleven of which were established as early as 1823, and from time to time as the different counties increased in population and wealth, the demands for higher education in each county also became greater. In their objects and chief sources of support from county and municipal rates, they are similarly related to the county, for the purposes of secondary education, as the Public Schools are in their localities for elementary education, and the spheres which they legitimately occupy, correspond, the High School being a county institution, and the Public School that of the township or minor municipality. In each county there are two or more High Schools, so that the opportunity is afforded to the greater number of pupils for daily attendance from their own homes. No boarding house or residence is therefore found an integral part of the High Schools, and there is nothing in the High Schools Act which contemplates this. Private boarding is resorted to by the comparatively small number of pupils who come from a distance, and in the case of the Galt Collégiate Institute the Principal himself arranges for such accommodation.

5. The College and the High Schools differ, educationally, in the longer period of study occupied by the course in the College, and in the earlier ages when Latin is begun, and while, from time to time, the subjects have been enlarged, and the opportunities extended for Modern Languages and other studies, and a satisfactory standard generally aimed at, no such test of previous elementary instruction has been applied to pupils entering the College, as has been the case in the High Schools since 1873. Annual examinations prevail in the College and have their advantages, while the Intermediate Examinations of the Education Department determine in each year the number of High School pupils who are sufficiently prepared to enter the Upper School. The results of that in July last shows that out of the total number of candidates, viz., 3,152, 1,097 passed, and 2,055 failed.

6. The College has always possessed a distinctive element, in nearly one-half of its pupils being resident, and so subjected when under wholesome influences to a further process of educational development, and which in the experience of other countries as well as the fiftieth year of the College itself, has been found advantageous in the training and education of youth.

7. The number of day pupils, especially in the lower forms, interfere with a larger element of resident boarders, as well as the present inferior Boarding-house accommodation; and the high rates paid by boarders both for tuition fees and board dues, and which, as one of the objects of the Provincial endowment, should be rendered much more accessible and less burdensome to the parents of the pupils throughout the Province, who may desire to avail themselves of the special advantages afforded by the discipline and other educational influences of the College residence.

XIV.—*Conclusion.*

The record of the College, as shown in the foregoing Report, has been one of much educational usefulness, and, from the nature of its work, it has performed an important and beneficial part in the higher education of the youth of the Province, and, in its existence of half a century, must have had an important influence upon our national character. Upon the opening of the Provincial University in 1843, the College was found ready to supply it with a large number of matriculated students, and this source has been constant to the present time. Since the great educational improvement in the work of the High Schools, recently effected by the Entrance and Intermediate Examinations and half-yearly inspection, and the increase in their financial resources, the College is surrounded by numerous energetic and worthy competitors for scholastic honours, and in the important work of affording a satisfactory standard in Higher Education to youth throughout the Province, and thus providing the opportunities for secondary education unequalled in any other country. This proud position has proceeded from small beginnings, and the same foresight, prudence and intelligence, to which we owe so much, are none the less needed to ensure its permanency.

I therefore beg to respectfully recommend to your Honour in Council such further means as will tend to promote the efficiency of the College as well as to extend its benefits, namely—a reduction in the number of forms in the College, so as not to exceed five; pupils to be admitted only on an examination in elementary English subjects equal at least to the High School entrance; inspection as to its educational condition from time to time by the Education Department; diminution in the cost of board and tuition fees for pupils from the Province generally; the improvement of Boarding-house accommodation, and residences of the masters made available for the like purpose; the number of admissions for pupils residing in or near Toronto to be limited; and an extension made of the Exhibition Regulations so as to be more generally beneficial to pupils from all parts of the Province; and, further, that the duties and salaries of the Principal and masters, and the principles upon which they should be paid, be revised, with the view especially of inciting personal interest on the part of each master in the success of all the pupils. I would also respectfully recommend that the requisite measures for accomplishing such of the above as may be approved of by your Honour may be entered upon, so as to ensure the improved conditions hereby recommended at the opening of the College after the next summer vacation.

I have the honour to be,

Your obedient servant,

ADAM CROOKS,

Minister of Education.

EDUCATION DEPARTMENT (ONTARIO),
5th February, 1881.

SCHEDULE A—Occupation of Parents of Pupils.
SESSION, 1880.—FORM I, DIVISION A.

JAN., 1881.]

UPPER CANADA COLLEGE GROUNDS

SCALE 80 FEET TO AN INCH

SCHEDULE C.

Report of the U. C. College Committee, as to Boarding House.

To His Honour the Lieutenant-Governor in Council :

The Memorial of the Committee on Upper Canada College, humbly sheweth as follows :—

The attention of the Committee and of the friends of the College has been earnestly directed to the necessity of providing additional and improved accommodation in the Boarding House. The greater part of the present building was erected about fifty years since, and although large sums have necessarily been expended in its maintenance, it has been found impossible to adopt it to modern requirements. The sleeping accommodation is very inadequate ; the sanitary arrangements are very defective ; the mode of heating and ventilation is costly and imperfect : and the position of the rooms is such as to largely increase the difficulty of maintaining discipline. The Principal has also been obliged to refuse admittance to many boys, whom it would have been highly desirable to secure as pupils. The Committee have therefore been satisfied for some time that it is essential to the preservation of the Provincial character of the College that these defects should be removed. But before venturing to recommend to Your Honour the appropriation of any sum of money from capital, they were desirous of assuring themselves that the expenditure could be incurred without any danger of impairing the educational efficiency of the College.

In connection with this subject, the Committee have also considered the necessity of providing a proper gymnasium. This is necessary, not only for the purpose of affording physical recreation to the boys, but for the purpose of assisting in the improvement of internal discipline. All experience demonstrates that boys are much more difficult to manage, and much more prone to acquire bad habits during the inclement season, when out-door exercise cannot well be taken. Holding these views, the Committee have obtained careful plans and estimates, from which they are satisfied that the Boarding House can be re-modelled so as to make it worthy of the College, and such a residence as parents would be willing to select for their children, and a reasonably sufficient gymnasium erected at a cost of not more than \$30,000. From a continuance of the careful and economical management, which has been exercised by the Principal and Resident Master, from certain savings that may reasonably be expected to result from the introduction of the proposed improvements, from increased number of pupils who can be accommodated, and from a moderate addition to the fee, which the Committee believe will be cheerfully borne in view of the greater comfort and convenience, they have arrived at the conclusion that the income derivable from the Boarding House will be sufficient to pay the general funds of the College, interest at the rate of seven per cent. per annum upon the contemplated outlay. The proposed expenditure can, therefore, be made without drawing upon the income applicable to the general purposes of the College.

It is proposed by the Committee, with a view to securing prudent and economical management, that the interest aforesaid be made a first charge upon the surplus annually arising from the Boarding House. In this manner the Masters who receive fees in respect of the residence will have a direct interest in exercising judicious economy.

The Committee therefore humbly pray your Honour to be pleased to authorize the expenditure of a sum not exceeding \$30,000 for the purpose, upon the terms and subject to the conditions aforesaid.

THOMAS MOSS,

Vice-Chancellor and Chairman U. C. Coll. Com.

February 27th, 1880.

UPPER CANADA COLLEGE BOARDING HOUSE.

Disbursements, 1879.

Salaries—

G. B. Sparling, assistant master	\$200 00

Memo.—Master's residences contain 1 dining-room, 1 parlour, 6 bed-rooms, 1 bath-room, 1 kitchen and scullery, &c. Principal's residence contains 1 drawing-room, 1 dining-room, 1 library, 2 bath-rooms, 9 bed-rooms, kitchen and scullery, &c. The amount payable by each resident pupil, per term, is \$45 for board. The length of term is about ten a-half weeks. The application of board dues is regulated by statutes.

SCHEDULE E.

EXTRACTS FROM THE REVISED STATUTES OF THE UNIVERSITY OF TORONTO.

Statute XXXIX.—Of Fees in Upper Canada College.

III. The half of all the tuition fees collected shall not be divided amongst the masters, as provided by the 5th section of the 27th Statute, but the sum of two and a-half dollars only for each pupil shall continue to be so divided.

Statute LVII.—Of Boarding-House Fees in Upper Canada College.

I. The share of the boarding-house fees which, by the sixth section of Statute No. 27, intituled "Of Salaries and Fees in Upper Canada College," is payable to the Principal, shall only be so paid to him to the extent of any surplus which there may be after paying all the expenses of maintenance and superintendence.

II. If the boarding-house fees do not produce enough in any year to cover the expenses of maintenance and superintendence, then the share of the fees which, by resolution of the Senate, is payable to the Superintendent, shall only be paid to him to the extent of any surplus which there may be after paying all other expenses.

Statute LX.—Of Fees and Salaries in Upper Canada College.

II. The sixth section of Statute XXVII., providing for the payment of the Principal of the sum of fifteen shillings for every pupil who shall have resided during the term in the College boarding-house is hereby repealed.

UPPER CANADA COLLEGE.

10 per cent. Tuition Fees.

Copy of an Order-in-Council approved by His Honour the Lieutenant-Governor, the 13th December, 1873.

Upon consideration of the report of the Honourable the Attorney-General, dated the 9th December, 1873, the Committee of Council advise that the Bursar be authorized to pay to the Principal, out of the Upper Canada College Income Fund, a sum equal to ten per cent. of the tuition fees annually received, provided there shall be a surplus of the annual General Income Fund, from the endowment of Upper Canada College, over the present annual income appropriation amount of \$14,000, sufficient to meet such payment, and if not, then only so far as such annual surplus from the General Income Fund shall extend; any deduction so made for any one year not to be absolute at first, but to be payable out of any surplus over the amount of the said annual appropriation available from the General Income Fund in succeeding years, but any deduction so made for any year, and remaining unpaid for five years thereafter, shall become final.

The Committee further advise that this arrangement take effect from the commencement of the present financial year of the College.

13th Dec., 1873.

Statute CIV., amending Statute LX. of Fees and Salaries in Upper Canada College.

By the Senate of the University of Toronto.

BE IT ENACTED,

1. That Statute LV., section 1, be repealed, and that the following be substituted therefor :—

Upon report of the Upper Canada College Committee, the Senate may, from time to time, by resolution, alter and modify the tuition fees; and until the passage of any such resolution, they shall be at the following rates :—For students not resident in the boarding-house, they shall be at the rate of twelve dollars and a-half per term.

If there shall be two pupils from one family, the tuition fee shall be at the rate of eleven dollars and a-half each per term, and if there shall be three or more pupils from one family they shall be at the rate of ten dollars and a-half each per term. The proportion of the fees now payable to the masters' shall remain as established by Statute XXXIX., section 3. The tuition fees for pupils in the boarding-house shall be seven dollars and a-half each per term. And that as soon as conveniently may be after the conclusion of each financial year, the Committee on Upper Canada College shall report to the Senate the amount derived from said additional fees which, in their opinion, should be reserved to the purposes of additions and permanent improvements, and the Senate may thereupon, by resolution, direct that such sum or any part thereof shall be set apart and invested for that special purpose.
